# Preface

This volume contains the proceedings of the *11th International Conference on Rewriting Techniques and Applications*. The conference was held July 10-12, 2000, at the University of East Anglia, Norwich, U.K. It is the major forum for the presentation of research on all theoretical and practical aspects of rewriting. Information about previous RTA conferences can be found at

<http://rewriting.loria.fr/rta/>

and information about the general research area of rewriting at

<http://www.loria.fr/~vigneron/RewritingHP/>

The program committee selected 18 papers, including three system descriptions, from a total of 44 submissions. In addition the program included invited talks by Jose Meseguer, Dale Miller, and Andrei Voronkov; and an invited tutorial by Sophie Tison.

Many people contributed to RTA-2000 and I would like to express my sincere thanks to all of them. I am grateful to the program committee members and the external referees for reviewing the submissions and maintaining the high standard of the RTA conferences; to Richard Kennaway, who was responsible for the local arrangements for the conference; and to José Meseguer, the RTA publicity chair. It is a particular pleasure to thank Ashish Tiwari for his extensive assistance in many of my tasks as the program chair. Finally, I wish to thank the School of Information Systems at the University of East Anglia both for financial support and for providing the facilities.
