Preface

Greetings. These are the proceedings of the 11th in our series of International Workshops on Security Protocols. Our theme this time was “Where have all the Protocols gone?” Once upon a time security protocols lived mainly in the network and transport layers. Now they increasingly hide in applications, or in specialised hardware. Does this trend lead to better security architectures, or is it an indication that we are addressing the wrong problems?

The intention of the workshops is to provide a forum where incompletely worked out ideas can stimulate discussion, open up new lines of investigation, and suggest more problems. The position papers published here have been revised by the authors in the light of their participation in the workshop. In addition, we publish edited transcripts of some of the discussions, to give our readers access to some of the roads ahead not (yet) taken. We hope that these revised position papers and edited transcripts will give you at least one interesting idea of your own to explore. Please do write and tell us what it was.

Our purpose in publishing these proceedings is to produce a conceptual map which will be of enduring interest, rather than to be merely topical. This is perhaps just as well, given the delay in production. This year we moved to new computer-based recording technology, and of course it failed completely. Fortunately various domestic recorders had been smuggled into the venue, but picking the signal bits out of the noise has taken a long time, and we have had to insert more than the usual number of epicycles to make the discussions come out right.

Our thanks to Sidney Sussex College Cambridge for the use of their facilities, to Lori Klimaszevska of the University of Cambridge Computing Service for the even worse than usual task of transcribing the audio tapes (in which the reverse use of “two rings” provided a test for creative intelligence) and to Johanna Hunt at the University of Hertfordshire for helping us with the Ptolemaic editing of the results.

Previous Proceedings in This Series

The proceedings of previous International Workshops on Security Protocols have also been published by Springer as Lecture Notes in Computer Science, and are occasionally referred to in the text:

10th Workshop (2002), LNCS 2845, ISBN 3-540-20830-5
9th Workshop (2001), LNCS 2467, ISBN 3-540-44263-4
8th Workshop (2000), LNCS 2133, ISBN 3-540-42566-7
7th Workshop (1999), LNCS 1796, ISBN 3-540-67381-4
6th Workshop (1998), LNCS 1550, ISBN 3-540-65663-4
5th Workshop (1997), LNCS 1361, ISBN 3-540-64040-1
4th Workshop (1996), LNCS 1189, ISBN 3-540-63494-5

Table of Contents

Where Have All the Protocols Gone? <i>Bruce Christianson</i>	1
A Protocol's Life After Attacks... <i>Giampaolo Bella*</i> , <i>Stefano Bistarelli</i> , <i>Fabio Massacci</i>	3
Discussion	11
Towards Flexible Credential Negotiation Protocols <i>Piero A. Bonatti</i> , <i>Sabrina De Capitani di Vimercati</i> , <i>Pierangela Samarati*</i>	19
Discussion	24
Man-in-the-Middle in Tunnelled Authentication Protocols <i>N. Asokan*</i> , <i>Valtteri Niemi</i> , <i>Kaisa Nyberg</i>	28
Discussion	42
Towards a Framework for Autonomic Security Protocols <i>Simon N. Foley*</i> , <i>Hongbin Zhou</i>	49
Discussion	55
Client v. Server Side Protocols, Interfaces and Storage <i>Geraint Price</i>	63
Discussion	74
Guaranteeing Access in Spite of Distributed Service-Flooding Attacks <i>Virgil D. Gligor</i>	80
Discussion	97
Protocol Codesign <i>Hassen Saïdi</i> , <i>Victoria Stavridou*</i> , <i>Bruno Duterte</i>	106
Discussion	114
Enforcing Security Policies for Distributed Objects Applications <i>Bogdan C. Popescu*</i> , <i>Bruno Crispo</i> , <i>Andrew S. Tanenbaum</i> , <i>Maas Zeeman</i>	119
Discussion	131

* Speakers.

Regular SPKI	
<i>Mads Dam</i>	134
Discussion	151
Federated Identity-Management Protocols	
<i>Birgit Pfitzmann*, Michael Waidner</i>	153
Discussion	175
Enforcing the Unenforceable	
<i>Peter Y.A. Ryan</i>	178
Is the Verification Problem for Cryptographic Protocols Solved?	
<i>Giampaolo Bella, Cristiano Longo, Lawrence Paulson*</i>	183
Secure Sessions from Weak Secrets	
<i>Bruce Christianson*, Michael Roe, David Wheeler</i>	190
Discussion	206
Panel Session: Is Protocol Modelling Finished?	
<i>Mike Roe</i>	213
WAR: Wireless Anonymous Routing	
<i>Matt Blaze*, John Ioannidis, Angelos D. Keromytis, Tal Malkin,</i> <i>Avi Rubin</i>	218
Discussion	233
Limitations of IPsec Policy Mechanisms	
<i>Jari Arkko*, Pekka Nikander</i>	241
Discussion	252
Deniable Authenticated Key Establishment for Internet Protocols	
<i>Colin Boyd, Wenbo Mao*, Kenneth G. Paterson</i>	255
Discussion	272
Protocols for Supporting a Public Key Infrastructure in Ad Hoc Networks	
<i>Mike Burmester, Alec Yasinsac*</i>	274
Discussion	283
What We Can Learn from API Security	
<i>Ross Anderson</i>	288

Addressing New Challenges by Building Security Protocols Around Graphs	
<i>Kamil Kulesza*, Zbigniew Kotulski</i>	301
From Security Protocols to System Security	
<i>Brian Monahan</i>	307
Discussion	323
Biometrics to Enhance Smartcard Security	
<i>Giampaolo Bella, Stefano Bistarelli, Fabio Martinelli*</i>	324
Discussion	333
Blind Publication: A Copyright Library without Publication or Trust	
<i>James A. Malcolm</i>	336
Discussion	341
And Finally	350
Author Index	351
