## **Preface**

FORTE (Formal Techniques for Networked and Distributed Systems) 2005 was sponsored by Working Group 6.1, Technical Committee 6 (TC6) of the International Federation for Information Processing (IFIP). The conference series started in 1981 under the name PSTV (Protocol Specification, Testing, and Verification). In 1988, a second series under the name FORTE was started. Both series merged to FORTE/PSTV in 1996. The conference name was changed to FORTE in 2001. During its 24-year history, many important contributions have been reported in the conference series. The last five meetings of FORTE were held in Pisa (Italy), Cheju Island (Korea), Houston (USA), Berlin (Germany), and Madrid (Spain).

The 25th FORTE was held from Sunday to Wednesday, October 2–5, 2005 on the beautiful campus of the National Taiwan University (NTU), Taipei, Taiwan, ROC. The scope covered formal description techniques (MSC, UML, Use cases, ...), semantic foundations, model-checking, SAT-based techniques, process algebrae, abstractions, protocol testing, protocol verification, network synthesis, security system analysis, network robustness, embedded systems, communication protocols, and several promising new techniques. In total, we received 88 submissions and accepted 33 regular papers and 6 short papers. All submissions received three reviews. The final program also included 3 keynote speeches, respectively by Prof. Amir Pnueli, Dr. Constance Heitmeyer, and Prof. Teruo Higashino, and 3 tutorials, respectively by Prof. Rance Cleaveland, Dr. Constance Heitmeyer, and Prof. Teruo Higashino. The proceedings also include the text of the keynote speeches. In addition, there were social events, including a reception, a banquet, and an excursion.

FORTE 2005 was co-located with ATVA (Automated Technology for Verification and Analysis) 2005 with a two-day overlap. Prof. Amir Pnueli was the joint keynote speaker. The participants of FORTE 2005 and ATVA 2005 also enjoyed a joint banquet/reception and a joint excursion.

FORTE 2005 was organized under the auspices of IFIP TC 6 by the Department of Electrical Engineering, NTU. It was generously supported by the National Science Council, Taiwan, ROC; the Ministry of Education, Taiwan, ROC; the Institute of Information Science, Academia Sinica, Taiwan, ROC; the Center for Information and Electronic Technologies, NTU; the Graduate Institute of Communication Engineering, NTU; and the Computer and Information Networking Center, NTU.

We would like to thank the Steering Committee members of FORTE for all their suggestions, guidance, and assistance. We also owe a lot to all the Program Committee members and reviewers for their effort in compiling rigorous reviews. Prof. Manuel Nunez deserves special thanks for unselfishly passing on his experience as organizer of FORTE 2004. We would also like to thank Prof. Jin-Fu Chang, Prof. Chuan Yi Tang, Prof. Wanjiun Liao, Prof. Sy-Yen Kuo, Prof. Ming-Syan Chen, Dr. Churn-Jung Liau, and Dr. Ching-Tarng Hsieh for their assistance. Finally special thanks go to Ms. Lih-Chung Lin, Ms. Tz-Hua Chen, Mr. Rong-Shiung Wu, and Mr. Zawa Chu for their energetic and careful planning in the local arrangements and webpage management.
