Preface

This is the third edition of the CDVE conference series. The cooperative design, visualization and engineering community is growing steadily, even if it is still in its infancy. Again, we gathered together on the beautiful Mediterranean island of Mallorca to exchange our research and development experience.

This year we received numerous papers on cooperative engineering and many different aspects of cooperative applications. The objective of cooperative design, visualization and engineering is for the successful final production of the products and providing solutions for end user problems. We are happy to see the CDVE conference has more successful results in this end.

I would like to thank all the authors who submitted their papers to the CDVE2006 conference. I would also like to express my thanks to the Program Committee and many volunteer paper reviewers for their valuable contribution to the conference. Their contributions together with the papers published in the CDVE2006 proceedings form part of the history that we will be proud to look back on after years.
