Preface

It was our great pleasure to organize and host the Second International Workshop on Biologically Motivated Computer Vision (BMCV 2002), which followed the highly successful BMCV 2000 in Seoul. We welcomed biologists, computer scientists, mathematicians, neuroscientists, physicists, and psychologists to share their views of how the brain solves the ill-posed problems of vision. Nature is the best existence proof that there is a solution of the most fundamental vision problems, and we hope to learn from nature the way to build artificial vision systems which can adapt to different environments and tasks as easily and reliably as we do. We enjoyed a lively discussion of vision topics spanning early vision, mid-level vision, attention, recognition, robotics and cognitive vision systems.

Even though the decision to host the workshop in Tübingen came very late (March 2002), and therefore the deadlines were rather tight, we received a total of 97 papers by the end of June. Each of the papers was thoroughly reviewed by at least two members of the program committee and in addition by the local organizing committee. In this context, we especially want to thank the program committee and additional referees for the time and effort that went into the reviews. In the end, 22 papers were accepted for oral presentation and 37 for poster presentation. The selected papers span the whole range of vision from neuronal models of vision to psychophysical investigations of human recognition performance. Correspondingly, the workshop was divided into seven sessions, proceeding (roughly) from topics concerning low-level early vision to high-level cognitive aspects of vision. In addition to these presentations we are very grateful that six distinguished scientists accepted our invitation to give an introduction to these topics and present their work at BMCV 2002.

BMCV 2002 was organized by the Max Planck Institute for Biological Cybernetics in Tübingen and took place in the main lecture hall building (Kupferbau) of the University of Tübingen. We are grateful to the Max Planck Society for financial support and to the Eberhard Karls Universität for local support and for hosting the conference registration webpage.

On behalf of the organizing and program committees we welcomed attendees to BMCV 2002 in Tübingen. We deliberately arranged for ample time outside the lecture hall to meet colleagues during the posters sessions and coffee breaks. The posters were situated right outside the lecture hall and all posters were on display for the whole conference.

Finally, we hope you found the BMCV 2002 workshop a rewarding and memorable experience, and that you had an enjoyable stay in the beautiful old town of Tübingen and other parts of Germany.

Organization

BMCV 2002 was organized by the Max Planck Institute for Biological Cybernetics (MPI).

Sponsoring Institutions

Max Planck Institute for Biological Cybernetics, Tübingen, Germany
University of Tübingen, Germany
Computer Koch, Tübingen, Germany

Executive Committee

Conference Chair:	Heinrich H. Bülthoff (MPI Tübingen, Germany)
Program Chair:	Christian Wallraven (MPI Tübingen, Germany)
Co-chair:	Seong-Whan Lee (Korea University, Korea)
Co-chair:	Tomaso Poggio (MIT, USA)

Program Committee

Andrew Blake	Microsoft Research, Cambridge, UK
Volker Blanz	University of Freiburg, Germany
Joachim Buhmann	University of Bonn, Germany
Hans Burkhardt	University of Freiburg, Germany
Henrik I. Christensen	Royal Institute of Technology, Sweden
Chan-Sup Chung	Yonsei University, Korea
Luciano da F. Costa	University of Sao Paulo, Brazil
James Crowley	INPG, France
Gustavo Deco	Siemens, Germany
Shimon Edelman	Cornell University, USA
Jan-Olof Eklundh	KTH, Sweden
Dario Floreano	EPFL, Switzerland
Pascal Fua	EPFL, Switzerland
Kunihiko Fukushima	University of Electro-Communications, Japan
Martin Giese	University Clinic Tübingen, Germany
Luc van Gool	ETH Zürich, Switzerland
Stefan Hahn	DaimlerChrysler Research, Germany
Katsushi Ikeuchi	University of Tokyo, Japan
Christof Koch	Caltech, USA

Michael Langer	McGill University, Canada
Choongkil Lee	Seoul National University, Korea
James Little	University of British Columbia, Canada
David Lowe	University of British Columbia, Canada
Hanspeter Mallot	University of Tübingen, Germany
Heiko Neumann	University of Ulm, Germany
Heinrich Niemann	University of Erlangen, Germany
Giulio Sandini	University of Genoa, Italy
Bernt Schiele	ETH Zürich, Switzerland
Bernhard Schölkopf	MPI Tübingen, Germany
Pawan Sinha	MIT, USA
Tieniu Tan	Academy of Sciences, China
Shimon Ullman	Weizmann Institute of Science, Israel
Thomas Vetter	University of Freiburg, Germany
Rolf Würtz	Ruhr University of Bochum, Germany
Hezy Yeshurun	Tel-Aviv University, Israel
Steven W. Zucker	Yale University, USA

Additional Referees

P. Bayerl	R. Jüngling	L. Natale
L. Bergen	M. Kagesawa	M. Riesenhuber
O. Bousquet	D. Katsoulas	O. Shahar

Table of Contents

Neurons and Features

Invited Paper (1)

Ultra-Rapid Scene Categorization with a Wave of Spikes	1
<i>Simon Thorpe</i>	

A Biologically Motivated Scheme for Robust Junction Detection	16
<i>Thorsten Hansen, Heiko Neumann</i>	

Iterative Tuning of Simple Cells for Contrast Invariant Edge Enhancement	27
<i>Marina Kolesnik, Alexander Barlit, Evgeny Zubkov</i>	

How the Spatial Filters of Area V1 Can Be Used for a Nearly Ideal Edge Detection	38
<i>Felice Andrea Pellegrino, Walter Vanzella, Vincent Torre</i>	

Posters (1)

Improved Contour Detection by Non-classical Receptive Field Inhibition	50
<i>Cosmin Grigorescu, Nicolai Petkov, Michel A. Westenberg</i>	

Contour Detection by Synchronization of Integrate-and-Fire Neurons	60
<i>Etienne Hugues, Florent Guilleux, Olivier Rochel</i>	

Reading Speed and Superiority of Right Visual Field on Foveated Vision	70
<i>Yukio Ishihara, Satoru Morita</i>	

A Model of Contour Integration in Early Visual Cortex	80
<i>T. Nathan Mundhenk, Laurent Itti</i>	

Computational Cortical Cell Models for Continuity and Texture	90
<i>Luís M. Santos, J.M. Hans du Buf</i>	

A Neural Model of Human Texture Processing: Texture Segmentation vs. Visual Search	99
<i>Axel Thielscher, Anna Schuboe, Heiko Neumann</i>	

Unsupervised Image Segmentation Using a Colony of Cooperating Ants . . .	109
<i>Salima Ouadfel, Mohamed Batouche</i>	

Image Reconstruction from Gabor Magnitudes	117
<i>Ingo J. Wundrich, Christoph von der Malsburg, Rolf P. Würtz</i>	
A Binocular Stereo Algorithm for Log-Polar Foveated Systems	127
<i>Alexandre Bernardino, José Santos-Victor</i>	
Rotation-Invariant Optical Flow by Gaze-Depended Retino-Cortical Mapping	137
<i>Markus A. Dahlem, Florentin Wörgötter</i>	
An Analysis of the Motion Signal Distributions Emerging from Locomotion through a Natural Environment	146
<i>Johannes M. Zanker, Jochen Zeil</i>	

Motion

Invited Paper (2)

Prototypes of Biological Movements in Brains and Machines	157
<i>Martin A. Giese</i>	
Insect-Inspired Estimation of Self-Motion	171
<i>Matthias O. Franz, Javaan S. Chahl</i>	
Tracking through Optical Snow	181
<i>Michael S. Langer, Richard Mann</i>	
On Computing Visual Flows with Boundaries: The Case of Shading and Edges	189
<i>Ohad Ben-Shahar, Patrick S. Huggins, Steven W. Zucker</i>	
Biological Motion of Speech	199
<i>Gregor A. Kalberer, Pascal Müller, Luc Van Gool</i>	

Mid-Level Vision

Invited Paper (3)

Object Perception: Generative Image Models and Bayesian Inference	207
<i>Daniel Kersten</i>	
The Role of Propagation and Medial Geometry in Human Vision	219
<i>Benjamin Kimia, Amir Tamrakar</i>	
Ecological Statistics of Contour Grouping	230
<i>James H. Elder</i>	
Statistics of Second Order Multi-Modal Feature Events and Their Exploitation in Biological and Artificial Visual Systems	239
<i>Norbert Krüger, Florentin Wörgötter</i>	

Recognition – From Scenes to Neurons

Invited Paper (4)

Qualitative Representations for Recognition	249
<i>Pawan Sinha</i>	

Scene-Centered Description from Spatial Envelope Properties	263
<i>Aude Oliva, Antonio Torralba</i>	

Visual Categorization: How the Monkey Brain Does It	273
<i>Ulf Knoblich, Maximilian Riesenhuber, David J. Freedman, Earl K. Miller, Tomaso Poggio</i>	

A New Approach towards Vision Suggested by Biologically Realistic Neural Microcircuit Models	282
<i>Wolfgang Maass, Robert Legenstein, Henry Markram</i>	

Posters (2)

Interpreting LOC Cell Responses	294
<i>David S. Bolme, Bruce A. Draper</i>	

Neural Mechanisms of Visual Flow Integration and Segregation – Insights from the Pinna-Brelstaff Illusion and Variations of It	301
<i>Pierre Bayerl, Heiko Neumann</i>	

Reconstruction of Subjective Surfaces from Occlusion Cues	311
<i>Naoki Kogo, Christoph Strecha, Rik Franssen, Geert Caenen, Johan Wagemans, Luc Van Gool</i>	

Extraction of Object Representations from Stereo Image Sequences Utilizing Statistical and Deterministic Regularities in Visual Data	322
<i>Norbert Krüger, Thomas Jäger, Christian Perwass</i>	

A Method of Extracting Objects of Interest with Possible Broad Application in Computer Vision	331
<i>Kyungjoo Cheoi, Yillbyung Lee</i>	

Medical Ultrasound Image Similarity Measurement by Human Visual System (HVS) Modelling	340
<i>Darryl de Cunha, Leila Eadie, Benjamin Adams, David Hawkes</i>	

Seeing People in the Dark: Face Recognition in Infrared Images	348
<i>Gil Friedrich, Yehezkel Yeshurun</i>	

Modeling Insect Compound Eyes: Space-Variant Spherical Vision	360
<i>Titus R. Neumann</i>	

Facial and Eye Gaze Detection	368
<i>Kang Ryoung Park, Jeong Jun Lee, Jaihie Kim</i>	

1-Click Learning of Object Models for Recognition	377
<i>Hartmut S. Loos, Christoph von der Malsburg</i>	
On the Role of Object-Specific Features for Real World Object Recognition in Biological Vision	387
<i>Thomas Serre, Maximilian Riesenhuber, Jennifer Louie, Tomaso Poggio</i>	
Object Detection in Natural Scenes by Feedback	398
<i>Fred H. Hamker, James Worcester</i>	
Stochastic Guided Search Model for Search Asymmetries in Visual Search Tasks	408
<i>Takahiko Koike, Jun Saiki</i>	
Biologically Inspired Saliency Map Model for Bottom-up Visual Attention	418
<i>Sang-Jae Park, Jang-Kyoo Shin, Minho Lee</i>	
Hierarchical Selectivity for Object-Based Visual Attention.....	427
<i>Yaoru Sun, Robert Fisher</i>	
Attention	
Invited Paper (5)	
Attending to Motion: Localizing and Classifying Motion Patterns in Image Sequences	439
<i>John K. Tsotsos, Marc Pomplun, Yueju Liu, Julio C. Martinez-Trujillo, Eugueni Simine</i>	
A Goal Oriented Attention Guidance Model	453
<i>Vidhya Navalpakkam, Laurent Itti</i>	
Visual Attention Using Game Theory.....	462
<i>Ola Ramström, Henrik I. Christensen</i>	
Attentional Selection for Object Recognition – A Gentle Way.....	472
<i>Dirk Walther, Laurent Itti, Maximilian Riesenhuber, Tomaso Poggio, Christof Koch</i>	
Audio-Oculomotor Transformation	480
<i>Robert Frans van der Willigen, Mark von Campenhausen</i>	
Posters (3)	
Gender Classification of Human Faces	491
<i>Arnulf B.A. Graf, Felix A. Wichmann</i>	

Face Reconstruction from Partial Information Based on a Morphable Face Model	501
<i>Bon-Woo Hwang, Seong-Whan Lee</i>	
Dynamics of Face Categorization	511
<i>Jeounghoon Kim</i>	
Recognizing Expressions by Direct Estimation of the Parameters of a Pixel Morphable Model	519
<i>Vinay P. Kumar, Tomaso Poggio</i>	
Modeling of Movement Sequences Based on Hierarchical Spatial-Temporal Correspondence of Movement Primitives	528
<i>Winfried Ilg, Martin Giese</i>	
Automatic Synthesis of Sequences of Human Movements by Linear Combination of Learned Example Patterns	538
<i>Martin A. Giese, Barbara Knappmeyer, Heinrich H. Bülthoff</i>	
An Adaptive Hierarchical Model of the Ventral Visual Pathway Implemented on a Mobile Robot	548
<i>Alistair Bray</i>	
A New Robotics Platform for Neuromorphic Vision: Beobots	558
<i>Daesu Chung, Reid Hirata, T. Nathan Mundhenk, Jen Ng, Rob J. Peters, Eric Pichon, April Tsui, Tong Ventrice, Dirk Walther, Philip Williams, Laurent Itti</i>	
Learning to Act on Objects	567
<i>Lorenzo Natale, Sajit Rao, Giulio Sandini</i>	
Egocentric Direction and the Visual Guidance of Robot Locomotion Background, Theory and Implementation	576
<i>Simon K. Rushton, Jia Wen, Robert S. Allison</i>	
Evolving Vision-Based Flying Robots	592
<i>Jean-Christophe Zufferey, Dario Floreano, Matthijs van Leeuwen, Tancredi Merenda</i>	

Robotics

Object Detection and Classification for Outdoor Walking Guidance System	601
<i>Seonghoon Kang, Seong-Whan Lee</i>	
Understanding Human Behaviors Based on Eye-Head-Hand Coordination	611
<i>Chen Yu, Dana H. Ballard</i>	

Vision-Based Homing with a Panoramic Stereo Sensor	620
<i>Wolfgang Stürzl and Hanspeter A. Mallot</i>	

Cognitive Vision

Invited Paper (6)

Unsupervised Learning of Visual Structure	629
<i>Shimon Edelman, Nathan Intrator, Judah S. Jacobson</i>	

Role of Featural and Configural Information in Familiar and Unfamiliar Face Recognition	643
<i>Adrian Schwaninger, Janek S. Lobmaier, Stephan M. Collishaw</i>	

View-Based Recognition of Faces in Man and Machine: Re-visiting Inter-extra-Ortho	651
<i>Christian Wallraven, Adrian Schwaninger, Sandra Schuhmacher, Heinrich H. Bülthoff</i>	

Author Index	661
