Preface

Communities are groupings of distributed objects that are capable of communicating, directly or indirectly, through the medium of a shared context. To support communities on a wide scale will require developments at all levels of computing, from low-level communication protocols supporting transparent access to mobile objects, through to distributed operating systems, through to high-level programming models allowing complex interaction between objects. This workshop brought together researchers interested in the technical issues of supporting communities.

This workshop was the third in the *DCW* series. The first two, entitled *Distributed Computing on the Web*, took place in 1998 and 1999 at the University of Rostock, with proceedings published by the University of Rostock Press. This year, the workshop also incorporated the *ISLIP* (*International Symposium on Languages for Intensional Programming*) symposium. The *ISLIP* symposia have taken place every year since 1988, and have led to two volumes published by World-Scientific (*Intensional Programming I*, 1995, and *Intensional Programming II*, 2000). While the two conferences emerged from different needs, their focus merged to such an extent that it became clear that a joint conference promised to offer great opportunities.

The 19 papers presented in these proceedings were selected from 30 submissions from around the world. Each submission was fully refereed by at least three members of the program committee or by other external referees. The reviewers of each paper were carefully selected to ensure they showed the required expertise for the papers' topics. If a reviewer felt that a paper was not in her/his field of expertise she/he was encouraged to inform the program chair. In this case another program committee member or additional referee was asked to review the paper. Special care was taken to avoid conflicts of interest by ensuring that if a program committee member was co-author of one of the submissions, then the paper would be reviewed by program committee members or additional reviewers who were not close collaborators of the submitters.

This year, we were pleased to welcome two invited speakers who are at the forefront of academic research and of industrial development. Jacob Slonim of Dalhousie University (Canada) presented his work on the *KALI project* about *Creating an electronic commerce device which promotes universal access*. Peter Beckman from TurboLinux' TurboLabs (USA) exposed the most recent developments of emerging on-line communities on the Internet that thrive on instant response and privacy in his talk *Clusters, servers, thin clients, and on-line communities*.

In addition to the papers, the workshop includes a tutorial presentation about the Web Operating System (WOSTM), a working decentralized operating system where the different nodes are *versioned*. This system has been jointly developed by researchers in Canada, Germany, Australia, and the USA.

Along with the official presentations published in these proceedings, a number of poster presentations and system demonstrations of networked systems were given. Summaries of these presentations and demonstrations can be found at the Web site www.wos-community.org/dcw2000.

We would especially like to thank all the members of the program committee and the additional reviewers for their work in preparing the thorough reviews of the submitted papers. A special thanks also to Rachel Lapierre for the administrative support before and during the workshop.

We would also like to thank all the sponsors for their support and especially Laval University for hosting us. Finally, we would like to thank all authors for submitting their contributions and the authors of accepted papers for their collaboration in preparing these proceedings.

We are convinced that this workshop series is very timely, and answers the needs of a great many researchers who want to focus on building networked communities. We hope that you find the contributions of this workshop interesting and stimulating.

Organization

Program and Organization Committee

Peter Kropf	University of Montreal (Canada)	Program Chair
Gilbert Babin	Laval University (Canada)	Organization Chair

David Abramson	Monash University (Australia)
Ioana Banicescu	Mississippi State University (USA)
Arndt Bode	Technical University Munich (Germany)
Thomas Böhme	Technical University Ilmenau (Germany)
Marc Bui	Paris 8 University (France)
Weichang Du	University of New Brunswick (Canada)
Wolfgang Fengler	Technical University Ilmenau (Germany)
Michael Franz	University of California, Irvine (USA)
Thierry Gauthier	IRISA (France)
Beat Hirsbrunner	University of Fribourg (Switzerland)
David Hutchison	University of Lancaster (United Kingdom)
Rudolf Keller	University of Montreal (Canada)
Oliver Krone	Swisscom (Switzerland)
Pierre Kuonen	Valais Engineering School (Switzerland)
Armin Mikler	University of North Texas (USA)
Wolf-Dieter Oberhoff	IBM Heidelberg (Germany)
Joey Paquet	Concordia University (Canada)
John Plaice	University of New South Wales (Australia)
Bernhard Plattner	ETH Zurich (Switzerland)
Panos Rondogiannis	University of Ioannina (Greece)
Peter Schulthess	University of Ulm (Germany)
William Wadge	University of Victoria (Canada)

Reviewers

Morad Benyoucef	Detlef Fliegl	Martin Schulz
Brahim Chaib-draa	Mehmet Orgun	
Alessandro Fabbri	Athanassios S. Poulakidas	

Sponsoring Institutions

SGI – GI – CIRANO – *rcm*₂ – APIIQ – Laval University – WOS-Project Group
DCW 2000 is organized in cooperation with ACM SIGPLAN/SIGSIM/SIGCHI

Table of Contents

Distributed Communities on the Web (DCW 2000)

Tutorial

The Web Operating System – WOS	1
<i>John Plaice (University of New South Wales)</i>	
<i>Herwig Unger (University of Rostock)</i>	

Keynote Speaker I

Creating an Electronic Commerce Device	
Which Promotes Universal Access: The KALI Project	2
<i>Jacob Slonim (Dalhousie University)</i>	
<i>Theodore Chiasson (Dalhousie University)</i>	
<i>Carrie Gates (Dalhousie University)</i>	

Session I: Collaboration in Communities

AntWorld: A Collaborative Web Search Tool	13
<i>Vladimir Meňkov (Rutgers University)</i>	
<i>David J. Neu (Rutgers University)</i>	
<i>Qin Shi (Rutgers University)</i>	
A Multimedia Session Manager Service	
for the Collaborative Browsing System	23
<i>Sandro Rafaeli (Lancaster University)</i>	
<i>David Hutchison (Lancaster University)</i>	

Session II: Business Communities

Adaptive Portals with Wireless Components	34
<i>Carolyn Watters (Dalhousie University)</i>	
<i>David Comeau (Dalhousie University)</i>	
An Evaluation of Formalisms for Negotiations in E-commerce	45
<i>Morad Benyoucef (University of Montreal)</i>	
<i>Rudolf K. Keller (University of Montreal)</i>	

Session III: Managing Communities

Building Intensional Communities Using Shared Contexts 55
 John Plaice (University of New South Wales)
 Paul Swoboda (University of Victoria)
 Ammar Alammam (University of New South Wales)

DSM-Communities in the World-Wide Web 65
 Peter Schulthess (University of Ulm)
 Oliver Schirpf (University of Ulm)
 Michael Schoettner (University of Ulm)
 Moritz Wende (University of Ulm)

A Resource Classification System for the WOS 74
 Simon Schubiger (University of Fribourg)

Session IV: Multidimensional Information Management

Intensional Markup Language 82
 William W. Wadge (University of Victoria)

Towards a Logical Basis for Modelling and Querying
Multi-dimensional Databases 90
 Mehmet A. Orgun (Macquarie University)

Multidimensional XML 100
 Yannis Stavrakas (National Centre for Scientific Research Demokritos)
 *Manolis Gergatsoulis (National Centre
 for Scientific Research Demokritos)*
 Panos Rondogiannis (University of Ioannina)

Session V: Communications and Communities

Application Programming Interface for WOSP/WOSRP 110
 Gilbert Babin (Laval University)
 Hauke Coltzau (University of Rostock)
 Markus Wulff (University of Rostock)
 Simon Ruel (Laval University)

Message Chains and Disjunct Paths
for Increasing Communication Performance in Large Networks 122
 Markus Wulff (University of Rostock)
 Peter Kropf (University of Montreal)
 Herwig Unger (University of Rostock)

Using Corba in the Web Operating System	133
<i>Oliver Krone (Swisscom)</i>	
<i>Alex Josef (Swiss Federal Institute of Technology — ETHZ)</i>	

Keynote Speaker II

Clusters, Servers, Thin Clients, and On-line Communities	142
<i>Peter H. Beckman (TurboLinux Inc.)</i>	

Session VI: Intensionality

The GIPSY Architecture	144
<i>Joey Paquet (Concordia University)</i>	
<i>Peter Kropf (University of Montreal)</i>	
Multidimensional Lucid: Design, Semantics and Implementation	154
<i>John Plaice (University of New South Wales)</i>	
Intensional High Performance Computing	161
<i>Pierre Kuonen (Swiss Federal Institute of Technology — EPFL)</i>	
<i>Gilbert Babin (Laval University)</i>	
<i>Nabil Abdennadher (Swiss Federal Institute of Technology — EPFL)</i>	
<i>Paul-Jean Cagnard (Swiss Federal Institute of Technology — EPFL)</i>	

Session VII: Mobile Agents for Community Support

Java Mobile Agents Implementing On-line Algorithms to Improve the QoS of a 3D Distributed Virtual Environment	171
<i>Marc Bui (Paris 8 University)</i>	
<i>Victor Larios-Rosillo (Technical University of Compiègne)</i>	
IDEAL: An Integrated Distributed Environment for Asynchronous Learning	182
<i>Yi Shang (University of Missouri-Columbia)</i>	
<i>Hongchi Shi (University of Missouri-Columbia)</i>	
Design and Implementation of a Distributed Agent Delivery System	192
<i>Stephen A. Hopper (University of North Texas)</i>	
<i>Armin R. Mikler (University of North Texas)</i>	
<i>John T. Mayes (University of North Texas)</i>
