# Preface

This book presents refereed and revised papers presented at GREC 2001, the 4th IAPR International Workshop on Graphics Recognition, which took place in Kingston, Ontario, Canada in September 2001. Graphics recognition is a branch of document image analysis that focuses on the recognition of two-dimensional notations such as engineering drawings, maps, mathematical notation, music notation, tables, and chemical structure diagrams. Due to the growing demand for both off-line and on-line document recognition systems, the field of graphics recognition has an exciting and promising future.

The GREC workshops provide an opportunity for researchers at all levels of experience to share insights into graphics recognition methods. The workshops enjoy strong participation from researchers in both industry and academia. They are sponsored by IAPR TC-10, the Technical Committee on Graphics Recognition within the International Association for Pattern Recognition. Edited volumes from the previous three workshops in this series are available as Lecture Notes in Computer Science, Vols. 1072, 1389, and 1941.

After the GREC 2001 workshop, authors were invited to submit enhanced versions of their papers for review. Every paper was evaluated by three reviewers. We are grateful to both authors and reviewers for their careful work during this review process. Many of the papers that appear in this volume were thoroughly revised and improved, in response to reviewers' suggestions.

This book is organized into eight sections, reflecting the session topics in the GREC 2001 workshop: technical drawings and forms; validation, user interfaces; symbol segmentation and recognition; perceptual organization; map recognition; graphics recognition technology; vectorization and early processing; and math notation, charts, music notation. As is traditional in the GREC workshops, each session included ample time for panel discussions. A summary of these panel discussions, prepared by Karl Tombre and Atul Chhabra, appears at the end of this book.

Graphics recognition contests are held at GREC workshops to foster the development of high-performance algorithms, and the development of methods for performance evaluation. GREC 2001 featured an arc segmentation contest, organized by Liu Wenying and Dov Dori. During the workshop, contestants ran their programs on given test images, using evaluation criteria developed by the contest organizers. A special section of this volume is devoted to the arc segmentation contest. The three papers in this section describe the contest, the images, the evaluation criteria, and the algorithms developed by the contestants.

We gratefully acknowledge the support provided by the sponsors of GREC 2001: the IAPR (International Association for Pattern Recognition), Queen's University, Canada (Department of Computing and Information Science, Office of Research Services, and Faculty of Arts and Science), CSERIC (Computer Science and Engineering Research Information Center, Korea), the Xerox Founda-

tion (Xerox Palo Alto Research Center, California), and CITO (Communications and Information Technology Ontario).

The next Graphics Recognition Workshop ([www.cvc.uab.es/grec2003/](http://www.cvc.uab.es/grec2003/)) will be held in Barcelona, Spain, in July 2003.

## **Program Committee**

Gady Agam, USA  
Adnan Amin, Australia  
Horst Bunke, Switzerland  
Atul Chhabra, USA  
Luigi Cordella, Italy  
David Doermann, USA  
Dov Dori, Israel  
Georgy Gimelfarb, New Zealand  
Jianying Hu, USA

Gerd Maderlechner, Germany  
Viacheslav Matsello, Ukraine  
Jean-Marc Ogier, France  
Lawrence O’Gorman, USA  
Michail Schlesinger, Ukraine  
Karl Tombre, France  
Toyohide Watanabe, Japan  
Liu Wenying, China  
Marcel Worring, The Netherlands

## **Additional Referees**

Eugene Bodansky  
Rupert Brooks  
Sergey Butenkov  
Bertrand Coüasnon  
Dave Elliman  
Joel Gardes  
Olivier Gibot  
Edward Lank  
Antonietta Lanza  
Josep Lladós  
Serguei Levachkine

Chew Lim Tan  
James Mahoney  
George Nagy  
Laurent Najman  
Kia Ng  
Daisuke Nishiwaki  
Tony Pridmore  
Eric Saund  
Michail Schlesinger  
Richard Zanibbi

# Table of Contents

## Technical Drawings and Forms

3D Reconstruction of Paper Based Assembly Drawings: State of the Art and Approach .....	1
<i>El-Fathi El-Mejbri, Hans Grabowski, Harald Kunze, Ralf-Stefan Lossack, and Arno Michelis</i>	
Interpretation of Low-Level CAD Data for Knowledge Extraction in Early Design Stages .....	13
<i>Hans Grabowski, Harald Kunze, Ralf Lossack, and Arno Michelis</i>	
Knowledge-Based Partial Matching: An Efficient Form Classification Method .....	25
<i>Yungcheol Byun, Joongbae Kim, Yeongwoo Choi, Gyeonghwan Kim, and Yillbyung Lee</i>	
Robust Frame Extraction and Removal for Processing Form Documents ....	36
<i>Daisuke Nishiwaki, Masato Hayashi, and Atsushi Sato</i>	

## Validation, User Interfaces

Issues in Ground-Truthing Graphic Documents .....	46
<i>Daniel Lopresti and George Nagy</i>	
Sketch-Based User Interface for Inputting Graphic Objects on Small Screen Devices .....	67
<i>Liu Wenjin, Xiangyu Jin, and Zhengxing Sun</i>	
Experimental Evaluation of a Trainable Scribble Recognizer for Calligraphic Interfaces .....	81
<i>César F. Pimentel, Manuel J. da Fonseca, and Joaquim A. Jorge</i>	
User Interfaces for On-Line Diagram Recognition .....	92
<i>Dorothea Blostein, Ed Lank, Arlis Rose, and Richard Zanibbi</i>	

## Symbol Segmentation and Recognition

Symbol Recognition: Current Advances and Perspectives .....	104
<i>Josep Lladós, Ernest Valveny, Gemma Sánchez, and Enric Martí</i>	
An Error-Correction Graph Grammar to Recognize Texture Symbols .....	128
<i>Gemma Sánchez, Josep Lladós, and Karl Tombre</i>	

**Perceptual Organization**

Perceptual Organization as a Foundation for Graphics Recognition .....139  
*Eric Saund, James Mahoney, David Fleet, and Daniel Larner*

Exploiting Perceptual Grouping for Map Analysis, Understanding  
and Generalization: The Case of Road and River Networks .....148  
*Robert C. Thomson and Rupert Brooks*

Extraction of Contextual Information Existing  
among Component Elements of Origami Books ..... 158  
*Takeyuki Suzuki, Jien Kato, and Toyohide Watanabe*

**Map Recognition**

Text/Graphics Separation in Maps .....167  
*Ruini Cao and Chew Lim Tan*

Semantic Analysis and Recognition  
of Raster-Scanned Color Cartographic Images .....178  
*Serguei Levachkine, Aurelio Velázquez, Victor Alexandrov,  
and Mikhail Kharinov*

Structure Based Interpretation of Unstructured Vector Maps .....190  
*Manuel Weindorf*

Generating Logic Descriptions for the Automated Interpretation  
of Topographic Maps ..... 200  
*Antonietta Lanza, Donato Malerba, Francesca A. Lisi, Annalisa Appice,  
and Michelangelo Ceci*

**Graphics Recognition Technology**

Scan-to-XML: Using Software Component Algebra  
for Intelligent Document Generation .....211  
*Bart Lamiroy and Laurent Najman*

Interpreting Sloppy Stick Figures by Graph Rectification  
and Constraint-Based Matching ..... 222  
*James V. Mahoney and Markus P. J. Fromherz*

Using a Generic Document Recognition Method  
for Mathematical Formulae Recognition .....236  
*Pascal Garcia and Bertrand Couasnon*

Interpreting Line Drawing Images: A Knowledge Level Perspective .....245  
*Tony P. Pridmore, Ahmed Darwish, and Dave Elliman*

## Vectorization and Early Processing

Smoothing and Compression of Lines Obtained by Raster-to-Vector Conversion .....	256
<i>Eugene Bodansky, Alexander Gribov, and Morakot Pilouk</i>	
A Scale and Rotation Parameters Estimator Application to Technical Document Interpretation .....	266
<i>Sebastien Adam, Jean-Marc Ogier, Claude Cariou, and Joel Gardes</i>	
Improving the Accuracy of Skeleton-Based Vectorization .....	273
<i>Xavier Hilaire and Karl Tombre</i>	
Structural Rectification of Non-planar Document Images: Application to Graphics Recognition .....	289
<i>Gady Agam and Changhua Wu</i>	
An Effective Vector Extraction Method on Architectural Imaging Using Drawing Characteristics .....	299
<i>Young-Jun Park and Young-Bin Kwon</i>	
Thresholding Images of Line Drawings with Hysteresis .....	310
<i>Tony P. Pridmore</i>	

## Math Notation, Charts, Music Notation

A Recognition Method of Matrices by Using Variable Block Pattern Elements Generating Rectangular Area .....	320
<i>Kanahori Toshihiro and Suzuki Masakazu</i>	
Music Manuscript Tracing .....	330
<i>Kia Ng</i>	

## Arc Segmentation Contest

Extended Summary of the Arc Segmentation Contest .....	343
<i>Liu Wenying, Jian Zhai, and Dov Dori</i>	
TIF2VEC, An Algorithm for Arc Segmentation in Engineering Drawings .....	350
<i>Dave Elliman</i>	
RANVEC and the Arc Segmentation Contest .....	359
<i>Xavier Hilaire</i>	
Summary of Panel Discussions at GREC'2001 .....	365
<i>Atul Chhabra and Karl Tombre</i>	
Author Index .....	367
