Preface

This was the first conference of a new series devoted to the effective handling of *soft* issues in the design, development, and operation of computing systems. The conference brought together contributors from a range of relevant disciplines, including artificial intelligence, information systems, software engineering, and systems engineering. The keynote speakers, Piero Bonissone, Ray Paul, Sir Tony Hoare, Michael Jackson, and Derek McAuley have interests and experience that collectively span all of these fields.

Soft issues involve information or knowledge that is uncertain, incomplete, or contradictory. Examples of where such issues arise include:

- requirements management and software quality control in software engineering,
- conflict or multiple sources information management in information systems,
- decision making/prediction in business management systems,
- quality control in networks and user services in telecommunications,
- traditional human rationality modeling in artificial intelligence,
- data analysis in machine learning and data mining,
- control management in engineering.

The concept of *dealing with uncertainty* became prominent in the artificial intelligence community nearly 20 years ago, when researchers realized that addressing uncertainty was an essential part of representing and reasoning about human knowledge in intelligent systems. The main methodologies that have emerged in this area are *soft computing* and *computational intelligence*.

It was also about 20 years ago that the notion of *hard* and *soft systems thinking* emerged from the systems community, articulated by Checkland in his seminal work on *Soft Systems Methodology*¹. This work has influenced information system research and practice and is beginning to have an impact on systems and software engineering.

The conference gave researchers and practitioners with an interest in soft issues an opportunity to learn from each other to identify ways of improving the development of complex computing systems.

The conference had a strong industrial focus. In particular, all of the keynote speakers had both industrial and academic experience, and the conference concluded with a session taking an industrial perspective on soft issues. Also, the first day of the conference was integrated with the *2nd European Workshop on Computational Intelligence in Telecommunications and Multimedia*, organized by the Technical Committee C of EUNITE, the European Network on Intelligent Technologies for Smart Adaptive Systems. This has a significant industrial membership. There were two EUNITE keynote speakers: Ben Azvine, chairman

¹ Peter Checkland, *Systems Thinking, Systems Practice*, Wiley, 1981

of the Technical Committee C, and John Bigham who has many years' experience in applying computational intelligence in telecommunications.

The SS Titanic was chosen as a visual image for the conference because it represents the uncertainty associated with any engineering endeavor and is a reminder that the Titanic was built in Belfast – indeed just beside the conference venue. Coincidentally, the conference took place between the date the Titanic first set sail, 2 April 1912, and its sinking on 15 April 1912. Fortunately, the organizing committee is not superstitious!

A total of 24 papers were selected for presentation at the conference. We are very grateful to all authors who submitted papers and to the referees who assessed them.

We also thank Philip Houston and Paul McMenamin of Nortel Networks (Northern Ireland) whose participation in a collaborative project with the University of Ulster provided initial support and encouragement for the conference. The project, Jigsaw, was funded by the Industrial Research and Technology Unit of the Northern Ireland Department of Enterprise, Trade, and Investment. Further support for the conference was provided by other industry and government collaborators and sponsors, especially Des Vincent (CITU-NI), Gordon Bell (Liberty Technology IT), Bob Barbour and Tim Brundle (Centre for Competitiveness), Dave Allen (Charteris), and Billy McClean (Momentum).

Internally, the organization of the conference benefitted from contributions by Adrian Moore, Pat Lundy, David McSherry, Edwin Curran, Mary Shapcott, Alfons Schuster, and Kenny Adamson. Adrian Moore deserves particular mention for his imaginative design and implementation of the Web site, building on the Titanic theme. We are also very grateful to Sarah Dooley and Pauleen Marshall whose administrative support and cheery manner were invaluable throughout. Finally, we thank Rebecca Mowat and Alfred Hofmann of Springer-Verlag for their help and advice in arranging publication of the conference proceedings.

Organization

SOFT-WARE 2002, the 1st International Conference on Computing in an Imperfect World, was organized by the Faculty of Informatics, University of Ulster in cooperation with EUNITE IBA C: Telecommunication and Multimedia Committee.

Organizing Committee

Dave Bustard	General Conference Chair
Weiru Liu	EUNITE Workshop Chair
Philip Houston	Nortel Networks, Belfast Labs
Des Vincent	CITU (NI)
Billy McClean	Momentum
Ken Adamson	Industry
Edwin Curran	Applications and Finance
Pat Lundy	Local Events
David McSherry	Full Submissions
Adrian Moore	Web
Alfons Schuster	Short Submissions
Mary Shapcott	Local Arrangements
Roy Sterritt	Publicity and Proceedings

Program Committee

Behnam Azvine	BT, Ipswich, UK
Salem Benferhat	IRIT, Université Paul Sabatier, France
Keith Bennett	Durham University, UK
Dan Berry	University of Waterloo, Canada
Jean Bezivin	University of Nantes, France
Prabir Bhattacharya	Panasonic Technologies Inc., USA
Danny Crookes	Queen's University, UK
Janusz Granat	National Institute of Telecoms, Poland
Rachel Harrison	University of Reading, UK
Janusz Kacprzyk	Warsaw University of Technology, Poland
Stefanos Kollias	National Technical Univ. of Athens, Greece
Rudolf Kruse	Otto-von-Guericke-University of Magdeburg, Germany
Manny Lehman	Imperial College, UK
Paul Lewis	Lancaster University, UK
Xiaohui Liu	Brunel University, UK
Abe Mamdani	Imperial College, UK
Trevor Martin	University of Bristol, UK

VIII Organization

Stephen McKearney	University of Bournemouth, UK
Andreas Pitsillides	University of Cyprus, Cyprus
Simon Parsons	University of Liverpool, UK
Henri Prade	IRIT, Université Paul Sabatier, France
Marco Ramoni	Harvard Medical School, USA
Alessandro Saffiotti	University of Orebro, Sweden
Prakash Shenoy	University of Kansas, USA
Philippe Smets	Université Libre de Bruxelles, Belgium
Martin Spott	BT Ipswich, UK
Frank Stowell	De Montfort University, UK
Jim Tomayko	Carnegie Mellon University, USA
Athanasios Vasilakos	University of Crete, Greece
Frans Voorbraak	University of Amsterdam, The Netherlands
Didar Zowghi	University of Technology, Sydney, Australia

Additional Reviewers

Werner Dubitzky	Gerard Parr	Bryan Scotney
Sally McClean	William Scanlon	George Wilkie
Mike McTear		

Sponsoring Institutions

- University of Ulster
- EUNITE - EUropean Network on Intelligent TEchnologies for Smart Adaptive Systems
- Nortel Networks, Belfast Labs.
- IRTU - Industrial Research and Technology Unit
- Liberty IT
- INCOSE
- British Computer Society
- Momentum
- Centre for Competitiveness
- Charteris
- CSPT - Centre for Software Process Technologies

Table of Contents

Technical Session 1

Overview of Fuzzy-RED in Diff-Serv Networks	1
<i>L. Rossides, C. Chrysostomou, A. Pitsillides (University of Cyprus), A. Sekercioglu (Monash University, Australia)</i>	
An Architecture for Agent-Enhanced Network Service Provisioning through SLA Negotiation	14
<i>David Chieng (Queen's University of Belfast), Ivan Ho (University of Ulster), Alan Marshall (Queen's University of Belfast), Gerard Parr (University of Ulster)</i>	
Facing Fault Management as It Is, Aiming for What You Would Like It to Be	31
<i>Roy Sterritt (University of Ulster)</i>	
Enabling Multimedia QoS Control with Black-Box Modelling	46
<i>Gianluca Bontempi, Gauthier Lafruit, (IMEC Belgium)</i>	

Technical Session 2

Using Markov Chains for Link Prediction in Adaptive Web Sites	60
<i>Jianhan Zhu, Jun Hong, John G. Hughes (University of Ulster)</i>	
Classification of Customer Call Data in the Presence of Concept Drift and Noise	74
<i>Michaela Black, Ray Hickey (University of Ulster)</i>	
A Learning System for Decision Support in Telecommunications	88
<i>Filip Železný (Czech Technical University), Jiří Zidek (Atlantis Telecom), Olga Štěpánková (Czech Technical University)</i>	
Adaptive User Modelling in an Intelligent Telephone Assistant	102
<i>Trevor P. Martin, Benham Azvine (BTextact Technologies)</i>	

Technical Session 3

A Query-Driven Anytime Algorithm for Argumentative and Abductive Reasoning	114
<i>Rolf Haenni (University of California, Los Angeles)</i>	
Proof Length as an Uncertainty Factor in ILP	128
<i>Gilles Richard, Fatima Zohra Kettaf (IRIT, Université Paul Sabatier, France)</i>	

X Table of Contents

Paraconsistency in Object-Oriented Databases	141
<i>Rajiv Bagai (Wichita State University, US), Shellene J. Kelley (Austin College, US)</i>	
Decision Support with Imprecise Data for Consumers	151
<i>Gergely Lukács (University of Karlsruhe, Germany)</i>	
Genetic Programming: A Parallel Approach	166
<i>Wolfgang Golubski (University of Siegen, Germany)</i>	
Software Uncertainty	174
<i>Manny M. Lehman (Imperial College, University of London, UK), J.F. Ramil (The Open University, UK)</i>	

Technical Session 4

Temporal Probabilistic Concepts from Heterogeneous Data Sequences	191
<i>Sally McClean, Bryan Scotney, Fiona Palmer (University of Ulster)</i>	
Handling Uncertainty in a Medical Study of Dietary Intake during Pregnancy	206
<i>Adele Marshall (Queen's University, Belfast), David Bell, Roy Sterritt (University of Ulster)</i>	
Sequential Diagnosis in the Independence Bayesian Framework	217
<i>David McSherry (University of Ulster)</i>	
Static Field Approach for Pattern Classification	232
<i>Dymitr Ruta, Bogdan Gabrys (University of Paisley)</i>	
Inferring Knowledge from Frequent Patterns	247
<i>Marzena Kryszkiewicz (Warsaw University of Technology, Poland)</i>	
Anytime Possibilistic Propagation Algorithm	263
<i>Nahla Ben Amor (Institut Supérieur de Gestion, Tunis), Salem Benferhat (IRIT, Université Paul Sabatier, France), Khaled Mellouli (Institut Supérieur de Gestion, Tunis)</i>	

Technical Session 5

Macro Analysis of Techniques to Deal with Uncertainty in Information Systems Development: Mapping Representational Framing Influences	280
<i>Carl Adams (University of Portsmouth, UK), David E. Avison (ESSEC Business School, France)</i>	

The Role of Emotion, Values, and Beliefs in the Construction of Innovative Work Realities	300
<i>Isabel Ramos (Escola Superior de Tecnologia e Gestão, Portugal), Daniel M. Berry (University of Waterloo, Canada), João Á. Carvalho (Universidade do Minho, Portugal)</i>	
Managing Evolving Requirements Using eXtreme Programming	315
<i>Jim Tomayko (Carnegie Mellon University, US)</i>	
Text Summarization in Data Mining	332
<i>Colleen E. Crangle (ConverSpeech, California)</i>	
Invited Speakers	
Industrial Applications of Intelligent Systems at BTexact	348
<i>Benham Azvine (BTexact Technologies, UK)</i>	
Intelligent Control of Wireless and Fixed Telecom Networks	349
<i>John Bigham (University of London, UK)</i>	
Assertions in Programming: From Scientific Theory to Engineering Practice	350
<i>Tony Hoare (Microsoft Research, Cambridge, UK)</i>	
Hybrid Soft Computing for Classification and Prediction Applications	352
<i>Piero Bonissone, (General Electric Corp., Schenectady, NY, US)</i>	
Why Users Cannot ‘Get What They Want’	354
<i>Ray Paul (Brunel University, UK)</i>	
Systems Design with the Reverend Bayes	355
<i>Derek McAuley (Marconi Labs, Cambridge, UK)</i>	
Formalism and Informality in Software Development	356
<i>Michael Jackson (Consultant, UK)</i>	
Industrial Panel	
An Industrial Perspective on Soft Issues: Successes, Opportunities, and Challenges	357
<i>Industrial Panel</i>	
Author Index	359
