

Lecture Notes in Artificial Intelligence
Subseries of Lecture Notes in Computer Science
Edited by J. Siekmann

Lecture Notes in Computer Science
Edited by G. Goos and J. Hartmanis

Editorial

Artificial Intelligence has become a major discipline under the roof of Computer Science. This is also reflected by a growing number of titles devoted to this fast developing field to be published in our Lecture Notes in Computer Science. To make these volumes immediately visible we have decided to distinguish them by a special cover as Lecture Notes in Artificial Intelligence, constituting a subseries of the Lecture Notes in Computer Science. This subseries is edited by an Editorial Board of experts from all areas of AI, chaired by Jörg Siekmann, who are looking forward to consider further AI monographs and proceedings of high scientific quality for publication.

We hope that the constitution of this subseries will be well accepted by the audience of the Lecture Notes in Computer Science, and we feel confident that the subseries will be recognized as an outstanding opportunity for publication by authors and editors of the AI community.

Preface

This book contains the lecture notes prepared for the Second Advanced School on Artificial Intelligence (EAIA'90), held in the Hotel de Turismo, Guarda, Portugal, October 8-12, 1990. The EAIAs are organized every two years by the Portuguese Artificial Intelligence Association. This year the focus was on Natural Language Processing.

There are some divergences between the present texts and the actual lectures. António Zampolli was most unfortunately unable to come because of health problems. António Porto kindly accepted at very short notice to replace Zampolli's lectures by presenting the last developments of his Intermediate Semantic Representation formalism, for which no text is included here. Luís Damas gave lectures on Constraint Logic Grammars, but did not produce a text for inclusion here.

It is a pleasure to thank all those who helped to make EAIA'90 and this book possible, namely:

- all the lecturers/authors for their successful effort;
- the members of the Programme Committee, António Porto, João Falcão e Cunha, Luís Damas, Luís Moniz Pereira, Luís Monteiro and Miguel Filgueiras, and also José Gabriel Lopes for their comments on drafts of the texts;
- Control Data Portuguesa, Data General Portugal, and Digital Equipment Portugal, for their financial support and provision of equipment for demonstrations;
- Banco Português do Atlântico, for its gift of course material, and
- Centro de Informática da Universidade do Porto, for its secretarial support.

Contents

General Introduction	
<i>Miguel Filgueiras, Nelma Moreira, Ana Paula Tomás</i>	1
Methods and Tools for Lexical Acquisition	
<i>Nicoletta Calzolari, António Zampolli</i>	4
X-Bar Theory: Its Role in GB Theory	
<i>Inês Duarte</i>	25
Information-Based Linguistics and Head-Driven Phrase Structure	
<i>Sergio Balari Ravera</i>	55
Three Lectures on Situation Theoretic Grammar	
<i>Robin Cooper</i>	102
Basic Aspects of the Theory of Generalized Quantifiers	
<i>João Peres</i>	141
The Semantics of Tense and Aspect	
<i>Frank Van Eynde</i>	158
Simplifying and Correcting the Treatment of Intentionality in Montague Semantics	
<i>João Falcão e Cunha</i>	185
Compositionality and Omniscience in Situation Semantics	
<i>João Falcão e Cunha</i>	206
Some Remarks on First-Order Intensional Logic	
<i>João Falcão e Cunha</i>	225
References	235
