Preface

This volume is the Proceedings of the International Symposium on Object Technologies for Advanced Software (ISOTAS). Currently object technologies are attracting much attention in diverse areas of research and development for advanced software. Object-oriented programming holds great promise in reducing the complexity of large scale software development, and recent research in this field opens up new paradigms for parallel and reflective computing. Object-oriented databases are expected to serve as a model for next-generation database systems, by overcoming the limitations of conventional data models. Furthermore, recent research in software object bases is aimed at developing a uniform approach to the management of software artifacts produced in the software development process, such as specifications, manuals, programs, and test data, which traditionally were managed in a very ad hoc and arbitrary manner.

Active research and experimentation on object technologies in these diverse areas suggest that there are some underlying, fundamental principles common to a wide range of software development activities. The first of the JSSST (Japanese Society for Software Science and Technology) international series of symposia focuses on this topic. The aim of this symposium is to bring together leading researchers in the areas of object-oriented programming, object-oriented databases, and software object bases. We hope to promote an understanding of object technologies in a wider context and to make progress towards the goal of finding better frameworks for future advanced software development.

The Program Committee received 92 submissions from 18 different countries in Europe, America, Asia, and Australia (including 31 domestic submissions). Each submission was reviewed by at least three members of the Program Committee and sometimes by external referees. This volume contains 25 contributed papers and 6 invited papers presented at the symposium. The contributed papers were selected by a highly competitive process, based on referee reports and painstaking deliberations by members of the Program Committee.

We would like to thank all the people who made the symposium possible, including the object technology researchers who submit their works to this symposium and all those who contributed their expertise and time in reviewing the submissions.

August 1993

Shojiro Nishio, Akinori Yonezawa
Co-Chairs, Program Committee

Symposium Chair
Takuya KATAYAMA (JAIST)

Program Committee Co-Chair
Shojiro NISHIO (Osaka University)
Akinori YONEZAWA
(University of Tokyo)

Finance Chair
Kokichi FUTATSUGI (JAIST)

Local Arrangement Chair
Yoichi SHINODA (JAIST)

Symposium Series Committee Chair
Mario TOKORO
(Keio University/Sony CSL)

Executive Committee Chair
Koichiro OCHIMIZU (JAIST)

Publicity Chair
Takuo WATANABE (JAIST)

Sponsored by

JSSST(Japan Society for Software Science and Technology)
JAIST(Japan Advanced Institute of Science and Technology)

In Cooperation with

ACM SIGSOFT, Japan ACM SIGMOD
IEEE Computer Society(TCSE), IPSJ

Program Committee Members

Co-Chair: Shojiro Nishio (Osaka University)

Akinori Yonezawa (University of Tokyo)

Tsuneo Ajisaka (Kyoto U.)

Mehmet Aksit (U. of Twente)

Malcolm Atkinson (U. of Glasgow)

François Bancilhon (O₂ Tech.)

Klaus R. Dittrich (U. of Zurich)

Kokichi Futatsugi (ETL/JAIST)

Yutaka Ishikawa (ETL)

Hyoung-Joo Kim (Seoul N. U.)

Roger King (U. of Colorado)

Tok-Wang Ling (N. U. of Singapore)

Nazim Madhavji (McGill U.)

Ole L. Madsen (Aarhus U.)

Oscar Nierstrasz (U. of Geneva)

David Notkin (U. of Washington)

Koichiro Ochimizu (JAIST)

Atsushi Ohori (OKI)

Junichi Rekimoto (NEC)

Motoshi Saeki (Tokyo Inst. Tech.)

Edward Sciore (Boston College)

Etsuya Shibayama (Ryukoku U.)

Shinji Shimojo (Osaka U.)

Yoichi Shinoda (JAIST)

Alan Snyder (Sun Microsystems)

Ikuo Takeuchi (NTT)

Katsumi Tanaka (Kobe U.)

Mario Tokoro (Keio U./Sony CSL)

Hideyuki Tokuda (Keio U./CMU)

Katsuyasu Toyama (NTT)

Takuo Watanabe (JAIST)

Grant E. Weddell (U. of Waterloo)

Peter Wegner (Brown U.)

Jack Wileden (Univ. of Mass.)

Kazumasa Yokota (ICOT)

Masatoshi Yoshikawa (AIST, Nara)

Roberto Zicari (J.W. Goethe U.)

Contents

(Invited Paper) Uniting Functional and Object-Oriented Programming <i>John Sargeant</i>	1
Traces (A Cut at the “Make Isn’t Generic” Problem) <i>Gregor Kiczales</i>	27
Gluons: a Support for Software Component Cooperation <i>Xavier Pintado</i>	43
TAO: An Object-Orientation Kernel <i>Kenichi Yamazaki, Yoshiji Amagai, Masaharu Yoshida, Ikuo Takeuchi</i> . . .	61
Change Management and Consistency Maintenance in Software Development Environments Using Object-Oriented Attribute Grammars <i>Katsuhiko Gondow, Takashi Imaizumi, Yoichi Shinoda, Takuya Katayama</i>	77
Design of an Integrated and Extensible C++ Programming Environment <i>Kin’ichi Mitsui, Hiroaki Nakamura, Theodore C. Law, Shahram Javey</i> . . .	95
Metalevel Decomposition in AL-1/D <i>Hideaki Okamura, Yutaka Ishikawa, Mario Tokoro</i>	110
Definition of a Reflective Kernel for a Prototype-Based Language <i>Philippe Mulet, Pierre Cointe</i>	128
Kernel Structuring of Object-Oriented Operating Systems: The Apertos Approach <i>Yasuhiko Yokote</i>	145
(Invited Paper) Object Database Systems: Functional Architecture <i>François Bancilhon</i>	163
Maintaining Behavioral Consistency during Schema Evolution <i>Paul L. Bergstein, Walter L. Hürsch</i>	176
An Object-Centered Approach for Manipulating Hierarchically Complex Objects <i>Ling Liu</i>	194
Towards the Unification of Views and Versions for Object Databases <i>Kwang June Byeon, Dennis McLeod</i>	220
Abstract View Objects for Multiple OODB Integration <i>Qiming Chen, Ming-Chien Shan</i>	237

An Object-Oriented Query Model Supporting Views <i>Suk I. Yoo, Hai Jin Chang</i>	251
(Invited Paper) Refactoring and Aggregation <i>Ralph E. Johnson, William F. Opdyke</i>	264
Transverse Activities: Abstractions in Object-Oriented Programming <i>Bent Bruun Kristensen</i>	279
Dynamic Extensibility in a Statically-Compiled Object-Oriented Language <i>Jawahar Malhotra</i>	297
(Invited Paper) Managing Change in Persistent Object Systems <i>Malcolm P. Atkinson, D.I.K. Sjøberg, R. Morrison</i>	315
An Object-Oriented Pattern Matching Language <i>Marc Gemis, Jan Paredaens</i>	339
CLOG: A Class-Based Logic Language for Object-Oriented Databases <i>Siu Cheung Hui, Angela Goh, Jose Kolencheril Raphael</i>	356
(Invited Paper) Name Management and Object Technology for Advanced Software <i>Alan Kaplan, Jack C. Wileden</i>	371
Constraints in Object-Oriented Analysis <i>Stefan Van Baelen, Johan Lewi, Eric Steegmans, Bart Swennen</i>	393
Integration of the Tool (AWB) Supporting the O* Method in the PCTE-Based Software Engineering Environment <i>Sai Peck Lee, Collette Rolland</i>	408
Minimizing Dependency on Class Structures with Adaptive Programs <i>Karl J. Lieberherr, Cun Xiao</i>	424
First Class Messages as First Class Continuations <i>Ken Wakita</i>	442
A Typing System for a Calculus of Objects <i>Vasco T. Vasconcelos, Mario Tokoro</i>	460
A Type Mechanism Based on Restricted CCS for Distributed Active Objects <i>Yasunori Harada</i>	475
(Invited Paper) Adding Implicit Invocation to Languages: Three Approaches <i>David Notkin, David Garlan, William G. Griswold, Kevin Sullivan</i>	489
Requirements and Early Experiences in the Implementation of the SPADE Repository using Object-Oriented Technology <i>Sergio Bandinelli, Luciano Baresi, Alfonso Fuggetta, Luigi Lavazza</i>	511
Object-Oriented Formal Specification Development using VDM <i>Amarit Laorakpong, Motoshi Saeki</i>	529
