PREFACE

This volume contains all the papers presented at the Fourth International Workshop on Analogical and Inductive Inference (AII'94) and the Fifth International Workshop on Algorithmic Learning Theory (ALT'94) which were held October 10-11, 1994, and October 13-15, 1994, respectively, at Reinhardsbrunn Castle, Germany. This twin conference was motivated by our efforts to concentrate research work in the area called algorithmic or computational learning theory, and by the intention to extend and intensify the communication within the relevant scientific community. The series of workshops on Analogical and Inductive Inference, which was established in 1986 (cf. Lecture Notes in Computer Science 265), is the first international conference series in learning theory. Subsequently, the series COLT (founded 1988 in the USA), ALT (1990, Japan), and EUROCOLT (1993, Europe) entered the ring. Nowadays, it seems more important to integrate than to diversify the conference business. The coordinated organization of AII'94 and ALT'94 is intended to be one step in this direction. AII and ALT will be amalgamated and held jointly in the future under the single title of Algorithmic Learning Theory. The present volume of common proceedings is understood as a prelude to this amalgamation.

This volume contains the papers presented at AII'94 followed by those of ALT'94.

For AII'94, there were four invited papers by distinguished scientists: "Towards Efficient Inductive Synthesis from Input/Output Examples" by Janis Barzdins, Riga, "Deductive Plan Generation" by Wolfgang Bibel, Darmstadt, "From Specifications to Programs" by Nachum Dershowitz, Urbana-Champaign, IL, and "Average Case Analysis of Pattern Language Learning Algorithms" by Thomas Zeugmann, Fukuoka. For ALT'94 there were three such invited papers: "Towards Realistic Theories of Learning" by Naoki Abe, Tokyo, "A Unified Approach to Inductive Logic and Case-Based Reasoning" by Michael M. Richter, Kaiserslautern, and "Three Decades of Team Learning" by Carl H. Smith, College Park, MD.

There were 24 papers submitted to AII'94 and 51 to ALT'94. Of these 14 were selected for AII'94, 12 from the AII'94 submissions and two from the ALT'94 submissions. 24 papers were selected for ALT'94 from the 51 submitted. The moving of the two papers from ALT'94 submissions to AII'94 presentations was nicely facilitated by cooperation and discussion between the respective program committees. In the proceedings, the submitted papers selected for each subconference follow the invited papers for that subconference.

Among the large number of interesting papers, it seems remarkable to us that one distinguished author has been successful in getting five accepted papers into this volume: Steffen Lange, Leipzig, Germany, did exceptional research work together with several co-authors in formal language learning. Four of his papers were selected for ALT'94 and one for AII'94.

On behalf of the Steering Committee for the ALT series, the Program Committee for AII'94, and the Program Committee for ALT'94, we express our sincere gratitude to all those who made this twin conference on Algorithmic Learning Theory possible. The referees for both workshops provided a significant basis for the program committees' decisions. Erwin Keusch, as the Local Arrangements Chairman, Ingo Müller, and further members of the Algorithmic Learning Theory Group at HTWK Leipzig did an important job behind the scenes. Last but not least, Springer-Verlag provided excellent support in preparing this volume.

The workshops were supported by the German Computer Science Society (GI) and ALT'94 was held in cooperation with the Japanese Society for Artificial Intelligence (JSAI). Substantial support for AII'94 has been provided by the Volkswagen Foundation.

P. Flach	S. Muggleton	E. Takimoto
M. Haraguchi	Y. Mukouchi	N. Tanida
K. Hirata	A. Nakamura	E. Ukkonen
E. Hirowatari	K. Niijima	M. Velauthapillai
H. Imai	K. Ningsanond	J. Viksna
B. Indurkha	M. Numao	O. Watanabe
H. Ishizaka	P. Orponen	R. Wiehagen
S. Jain	C.D. Page	A. Yamamoto
E. Kinber	L. Pitt	T. Yokomori
J. Kivinen	C. Rouveirol	Y. Yoshida
S. Kobayashi	Y. Sakai	T. Zeugmann

TABLE OF CONTENTS

ANALOGICAL AND INDUCTIVE INFERENCE

INVITED TALKS

J. Barzdins	1
<i>Towards Efficient Inductive Synthesis from Input/Output Examples</i>	
W. Bibel and M. Thielscher	2
<i>Deductive Plan Generation</i>	
N. Dershowitz	6
<i>From Specifications to Programs: Induction in the Service of Synthesis</i>	
T. Zeugmann	8
<i>Average Case Analysis of Pattern Language Learning Algorithms</i>	

SELECTED PAPERS

A. Ambainis and J. Smotrovs	10
<i>Enumerable Classes of Total Recursive Functions: Complexity of Inductive Inference</i>	
K. Apsītis	26
<i>Derived Sets and Inductive Inference</i>	
O. Arnold and K.P. Jantke	40
<i>Therapy Plan Generation as Program Synthesis</i>	
S. Bai	56
<i>A Calculus for Logical Clustering</i>	
G. Baliga and J. Case	64
<i>Learning with Higher Order Additional Information</i>	
A. Brāzma and K. Čerāns	76
<i>Efficient Learning of Regular Expressions from Good Examples</i>	
R. Freivalds, O. Botuscharov and R. Wiehagen	91
<i>Identifying Nearly Minimal Gödel Numbers from Additional Information</i>	
R. Freivalds, D. Gobleja, M. Karpinski and C.H. Smith	100
<i>Co-Learnability and FIN-Identifiability of Enumerable Classes of Total Recursive Functions</i>	

C. Globig and S. Lange	106
<i>On Case-Based Representability and Learnability of Languages</i>	
K. Hirata	121
<i>Rule-Generating Abduction for Recursive Prolog</i>	
T. Iwatani, S. Tano, A. Inoue and W. Okamoto	137
<i>Fuzzy Analogy Based Reasoning and Classification of Fuzzy Analogies</i>	
Y. Koga, E. Hirowatari and S. Arikawa	149
<i>Explanation-Based Reuse of Prolog Programs</i>	
C.R. Mofizur and M. Numao	161
<i>Constructive Induction for Recursive Programs</i>	
H.-C. Tu and C.H. Smith	176
<i>Training Digraphs</i>	

ALGORITHMIC LEARNING THEORY

INVITED TALKS

N. Abe	187
<i>Towards Realistic Theories of Learning</i>	
M.M. Richter	210
<i>A Unified Approach to Inductive Logic and Case-Based Reasoning</i>	
C.H. Smith	211
<i>Three Decades of Team Learning</i>	

SELECTED PAPERS

P. Auer and N. Cesa-Bianchi	229
<i>On-line Learning with Malicious Noise and the Closure Algorithm</i>	
S. Ben-David and E. Dichterman	248
<i>Learnability with Restricted Focus of Attention Guarantees Noise-Tolerance</i>	
A. Brăzma	260
<i>Efficient Algorithm for Learning Simple Regular Expressions from Noisy Examples</i>	

Z. Chen	272
<i>A Note on Learning DNF Formulas Using Equivalence and Incomplete Membership Queries</i>	
C. Ferretti and G. Mauri	282
<i>Identifying Regular Languages over Partially-Commutative Monoids</i>	
W.I. Gasarch, M.G. Pleszkoch and M. Velauthapillai	290
<i>Classification Using Information</i>	
A. Ishino and A. Yamamoto	301
<i>Learning from Examples with Typed Equational Programming</i>	
H. Ishizaka, H. Arimura and T. Shinohara	317
<i>Finding Tree Patterns Consistent with Positive and Negative Examples Using Queries</i>	
S. Jain	333
<i>Program Synthesis in the Presence of Infinite Number of Inaccuracies</i>	
S. Jain and A. Sharma	349
<i>On Monotonic Strategies for Learning r.e. Languages</i>	
S. Kapur	365
<i>Language Learning under Various Types of Constraint Combinations</i>	
S. Kimura, A. Togashi and N. Shiratori	379
<i>Synthesis Algorithm for Recursive Processes by μ-Calculus</i>	
E. Kinber	395
<i>Monotonicity versus Efficiency for Learning Languages from Texts</i>	
S. Kobayashi and T. Yokomori	407
<i>Learning Concatenations of Locally Testable Languages from Positive Data</i>	
S. Lange, J. Nessel and R. Wiehagen	423
<i>Language Learning from Good Examples</i>	
S. Lange and P. Watson	438
<i>Machine Discovery in the Presence of Incomplete or Ambiguous Data</i>	
S. Lange and T. Zeugmann	453
<i>Set-Driven and Rearrangement-Independent Learning of Recursive Languages</i>	
S. Matsumoto and A. Shinohara	469
<i>Refutably Probably Approximately Correct Learning</i>	

Y. Mukouchi	484
<i>Inductive Inference of an Approximate Concept from Positive Data</i>	
A. Nakamura, N. Abe and J. Takeuchi	500
<i>Efficient Distribution-Free Population Learning of Simple Concepts</i>	
Y. Okubo and M. Haraguchi	516
<i>Constructing Predicate Mappings for Goal-Dependent Abstraction</i>	
Y. Sakakibara, K.P. Jantke and S. Lange	532
<i>Learning Languages by Collecting Cases and Tuning Parameters</i>	
E. Takimoto, I. Tajika and A. Maruoka	547
<i>Mutual Information Gaining Algorithm and Its Relation to PAC-Learning Algorithm</i>	
N. Tanida and T. Yokomori	560
<i>Inductive Inference of Monogenic Pure Context-Free Languages</i>	
Index of Authors	575
