Preface

The Foundation for Research and Technology - Hellas (FORTH) is proud to host the 8th Conference on Advanced Information Systems Engineering (CAiSE). Initially a Nordic conference, CAiSE quickly evolved into a truly European one. After staying in the North for seven years (Sweden, Norway, United Kingdom, France, The Netherlands, Finland) CAiSE now moves to the southeastern border of Europe, in the capital of the Greek island of Crete, Heraklion.

CAiSE*96 continues the tradition of previous conferences in the series in bringing together people from academia and industry in a lively meeting. The major theme of this year's CAiSE is "Software Engineering Challenges in Modern Information Systems". An indicative list of such information systems includes open client/server-based, interoperable, global IS in the Internet, and re-architected legacy systems. The call for papers also included the traditional CAiSE topics and was given a wide international distribution.

One hundred papers were received from 29 countries and were reviewed by an international programme committee consisting of 45 well reputed researchers in the information systems engineering community. There were 3 reviews for each paper and 30 papers of high academic quality were selected to be presented and discussed at the conference. The papers assembled in this volume represent authors from 16 countries and cover a wide spectrum of topics in the major theme of the conference. The main CAiSE scientific programme is completed by two invited speeches and two panels on important and interesting topics.

Before the main conference, continuing the very successful practice of the recent CAiSE conferences, three workshops were organized on the topics: Requirements Engineering in a Changing World, Next Generation CASE Tools, and Evaluation of Modeling Tools in Systems Analysis and Design, as well as the 3rd Doctoral Consortium on Advanced Information Systems Engineering.

CAiSE*96 and these proceedings would not have been possible without the contribution of many individuals and institutions. We take the opportunity to thank the authors, the programme committee members, the additional referees, the local organizers, the participants, the publisher, and the sponsors.

Table of Contents

CASE Environments

MetaEdit+: A Fully Configurable Multi-User and Multi-Tool CASE and CAME Environment	1
<i>S. Kelly, K. Lyytinen, M. Rossi</i>	
MENTOR: A Computer Aided Requirements Engineering Environment	22
<i>S. Si-Said, C. Rolland, G. Grosz</i>	
A Logic-Based Framework for Reasoning Support in Software Evolution	44
<i>V.C. Vescoukis, N. Papaspyrou, E. Skordalakis</i>	

Temporal and Active Database Technologies

TALE: A Temporal Active Language and Execution Model	60
<i>A. Gal, O. Etzion, A. Segev</i>	
DEGAS: Capturing Dynamics in Objects	82
<i>J. van den Akker, A. Siebes</i>	
From Rules to Rule Patterns	99
<i>G. Kappel, S. Rausch-Schott, W. Retschitzegger, M. Sakkinen</i>	

Experience Reports

Tool-Based Re-Engineering of a Legacy MIS: An Experience Report	116
<i>T. Kudrass, M. Lehmbach, A. Buchmann</i>	
Developing an Information System Using TROLL: An Application Field Study	136
<i>M. Krone, M. Kowsari, P. Hartel, G. Denker, H.-D. Ehrich</i>	
Active Relationships for Controlling the Propagation of Information and Activities in Databases	160
<i>F. Kemper, W. Wilkes, G. Schlageter</i>	

Interoperability in Information Systems

Multi-Data Models Translations in Interoperable Information Systems	176
<i>C. Nicolle, D. Benslimane, K. Yetongnon</i>	
Interoperable Transactions in Business Models: A Structured Approach	193
<i>H. Weigand, E. Verharen, F. Dignum</i>	
On Information Modeling to Support Interoperable Spatial Databases	210
<i>N. Tryfona and J. Sharma</i>	

Formal Methods in System Development

Guidelines for Formalizing Fusion Object-Oriented Analysis Models	222
<i>B.W. Bates, J.-M. Bruel, R.B. France, M.M. Larrondo-Petrie</i>	
Techniques for Process Analysis and Unification	234
<i>S. Castano, V. De Antonellis</i>	
Handling Conceptual Model Validation by Planning	255
<i>D. Costal, E. Teniente, T. Urpí, C. Farré</i>	

Novel Architectures and Information Bases

Database Design Recovery	272
<i>J.-L. Hainaut, J. Henrard, J.-M. Hick, D. Roland, V. Englebert</i>	
The World-Wide Web as a Platform for Supporting Interactive Concurrent Engineering	301
<i>M. Hanneghan, M. Merabti, G. Colquhoun</i>	
Context-Driven Information Base Update	319
<i>P. Constantopoulos, Y. Tzitzikas</i>	

Workflow Management and Distributed Information Systems

Managing Overlapping Transactional Workflows	345
<i>J. Puustjärvi, H. Tirri, J. Veijalainen</i>	
Shared Data Management Mechanism for Distributed Software Development Based on a Reflective Object-Oriented Model	362
<i>M. Hori, Y. Shinoda, K. Ochimizu</i>	
Agent-Based Tool Integration for Distributed Information Systems	383
<i>M.C. Norrie, M. Wunderli</i>	

Information Modeling and Methodologies

When Parents Need Not Have Children: Cognitive Biases in Information Modeling	402
<i>K. Siau, Y. Wand, I. Benbasat</i>	
The Role of Benchmarking in Information System Development	421
<i>M. Daneva</i>	
User-Enhanceability for Organizational Information Systems through Visual Programming	432
