Preface

This volume contains papers that were selected for presentation at the First European Symposium on Principles of Data Mining and Knowledge Discovery from Databases – PKDD’97, held in Trondheim, Norway, June 24–27, 1997. The Norwegian University of Science and Technology (NTNU) hosted the symposium. The Department of Computer and Information Science, the Norwegian Research Council (NFR), and the Norwegian Artificial Intelligence Society (NAIS) sponsored the symposium.

PKDD’97 was the first symposium in an intended series of meetings of the data mining and knowledge discovery from databases (KDD) community in Europe. The goal of the PKDD series is to provide a European-based forum for interaction among all theoreticians and practitioners interested in data mining and knowledge discovery. Fostering an interdisciplinary collaboration is one desired outcome, but the main long-term focus is on theoretical principles for the emerging discipline of KDD, especially those new principles that go beyond each of the contributing areas.

The Programming Committee decided to select the following major areas for PKDD’97:

- Data and knowledge representation for data mining
- Statistics and probability in data mining
- Logic-based perspective on data mining
- Man-machine interaction in data mining
- Artificial intelligence contributions to KDD
- High performance computing for data mining
- From machine learning to KDD
- From automated scientific discovery to KDD
- Quality assessment of data mining results
- Applications of data mining and knowledge discovery

The contributed papers were selected from 50 full draft papers by the following program committee:

Andrzej Skowron (U. Warsaw, Poland), Arno Siebes (CWI, The Netherlands), Attilio Giordana (U. Torino, Italy), Bob Henery (U. Strathclyde, UK), David Hand (Open U. UK), Derek Sleeman (U. Aberdeen, UK), Erik Sandewall (Linköping U., Sweden), Gregory Piatetsky-Shapiro (GTE Lab. USA), Heikki Mannila (U. Helsinki, Finland), Jan Komorowski (NTNU, Norway), Jan Zytkow (Wichita State, USA), Lorenza Saitta (U. Torino, Italy), Marjorie Moulet (LRI, U. Paris XI, France), Mikhail Kiselev (Nat. Research Center of Surgery, Russia), Pieter Adriaans (Syllogic, The Netherlands), Raul Valdes-Perez (CMU, USA), Rudiger Wirth (Daimler-Benz, Germany), Shusaku Tsumoto (Tokyo Medical &

Dental U. Japan), Stefan Wrobel (GTE, Germany), Steve Muggleton (Oxford U. UK), Wei-Min Shen (U. South. Calif. USA), Willi Kloesgen (GMD, Germany), Wojtek Ziarko (U. Regina, Canada), Yves Kodratoff (U. Paris VI, France), Zbigniew Ras (UNC Charlotte, USA), Zdzislaw Pawlak (Warsaw Technical U. Poland).

The papers were divided into three categories: 14 plenary papers, 13 parallel session papers, and 11 poster papers that included spot-light presentations in the plenary sessions. In addition, four tutorials were selected: Rough Sets for Data Mining and Knowledge Discovery, Techniques and Applications of KDD, High Performance Data Mining, and Data Mining in the Telecommunications Industry.

The Knowledge Systems Group of the Department of Computer and Information Science of the Norwegian University of Science and Technology together with Jan Zytkow, Wichita State University, organized the symposium. The Congress Department of NTNU provided the secretariat for the symposium.

We wish to express our thanks to the sponsors of the symposium and to all who submitted papers for presentation and publication in the proceedings. Special thanks are due to Alfred Hofmann of Springer-Verlag for his help and support.

Finally, we would like to thank Staal Vinterbo whose quiet work "behind the scenes" largely contributed to the success of this meeting.

May 1997

J. Komorowski and Jan Zytkow

Table of Contents

Invited Talk

- B. A. Foss
Knowledge Discovery - A Control Theory Perspective 1

Plenary Session 1

- W. Kowalczyk, F. Slisser
Modeling Customer Retention with Rough Data Models 4
- C. L. Carter, H. J. Hamilton, N. Cercone
Share Based Measures for Itemsets 14
- R. J. Hilderman, H. J. Hamilton, R. J. Kowalchuk, N. Cercone
Parallel Knowledge Discovery Using Domain Generalization Graphs . 25
- J. Stefanowski, K. Słowiński
Rough Set Theory and Rule Induction Techniques for Discovery of Attribute Dependencies in Medical Information Systems 36
- J. Rauch
Logical Calculi for Knowledge Discovery in Databases 47

Parallel Session 2a

- S. Tsumoto
Extraction of Experts' Decision Process from Clinical Databases Using Rough Set Model 58
- M. Bull, G. Kundt, L. Gierl
Discovering of Health Risks and Case-Based Forecasting of Epidemics in a Health Surveillance System 68
- S. Wrobel
An Algorithm for Multi-relational Discovery of Subgroups 78

Parallel Session 2b

- G. Das, D. Gunopulos, H. Mannila
Finding Similar Time Series 88
- D. Merkl
Exploration of Document Collections with Self-Organizing Maps: A Novel Approach to Similarity Representation 101
- R. Feldman, W. Klösgen, Y. Ben-Yehuda, G. Kedar, V. Reznikov
Pattern Based Browsing in Document Collections 112

Parallel Session 3a

- D. Rasmussen, R. R. Yager
Induction of Fuzzy Characteristic Rules 123

M. V. Kiselev, S. M. Ananyan, S. B. Arseniev <i>Regression-Based Classification Methods and Their Comparison with Decision Tree Algorithms</i>	134
J. Stepaniuk <i>Attribute Discovery and Rough Sets</i>	145
M. Kryszkiewicz <i>Generation of Rules from Incomplete Information Systems</i>	156

Parallel Session 3b

G. Ruhe <i>Knowledge Discovery from Software Engineering Data: Rough Set Analysis and Its Interaction with Goal-Oriented Measurement</i>	167
T. Elomaa, J. Rousu <i>Efficient Multisplitting on Numerical Data</i>	178
P. D. Scott, A. P. M. Coxon, M. H. Hobbs, R. J. Williams <i>SNOOT: An Intelligent Assistant for Exploratory Data Analysis</i>	189

Plenary Session 4

R. Simutis <i>Exploratory Analysis of Biochemical Processes Using Hybrid Modeling Methods</i>	200
H. André-Jönsson, D. Z. Badal <i>Using Signature Files for Querying Time-Series Data</i>	211
A. Amir, R. Feldman, R. Kashi <i>A New and Versatile Method for Association Generation</i>	221
J. C. Bioch, O. van der Meer, R. Potharst <i>Bivariate Decision Trees</i>	232
R. Wirth, C. Shearer, U. Grimmer, T. Reinartz, J. Schlösßer, C. Breitner, R. Engels, G. Lindner <i>Towards Process-Oriented Tool Support for KDD</i>	243

Plenary Session 5

K. Schädler, F. Wysotski <i>A Connectionist Approach to Structural Similarity Determination as a Basis of Clustering, Classification and Feature Detection</i>	254
S. H. Nguyen, A. Skowron <i>Searching for Relational Patterns in Data</i>	265
F. Gebhardt <i>Finding Spatial Clusters</i>	277
E. Boudaillier, G. Hébrail <i>Interactive Interpretation of Hierarchical Clustering</i>	288

Poster Session 6

A. A. Freitas	
<i>The Principle of Transformation between Efficiency and Effectiveness: Towards a Fair Evaluation of the Cost-Effectiveness of KDD Techniques</i>	299
P. Berka	
<i>Recognizing Reliability of Discovered Knowledge</i>	307
