Towards Mathematical Philosophy

TRENDS IN LOGIC

Studia Logica Library

VOLUME 28

Managing Editor
Ryszard Wójcicki, *Institute of Philosophy and Sociology, Polish Academy of Sciences, Warsaw, Poland*

Editors
Vincent F. Hendricks, *Department of Philosophy and Science Studies, Roskilde University, Denmark*
Daniele Mundici, *Department of Mathematics "Ulisse Dini", University of Florence, Italy*
Ewa Orłowska, *National Institute of Telecommunications, Warsaw, Poland*
Krister Segerberg, *Department of Philosophy, Uppsala University, Sweden*
Heinrich Wansing, *Institute of Philosophy, Dresden University of Technology, Germany*

SCOPE OF THE SERIES

Trends in Logic is a bookseries covering essentially the same area as the journal *Studia Logica* – that is, contemporary formal logic and its applications and relations to other disciplines. These include artificial intelligence, informatics, cognitive science, philosophy of science, and the philosophy of language. However, this list is not exhaustive, moreover, the range of applications, comparisons and sources of inspiration is open and evolves over time.

Contents

1 From Logic to Mathematical Philosophy, David Makinson, Jacek Malinowski and Heinrich Wansing 1
Introduction 1
Modal Logic 3
Non-Classical and Many-Valued Logics 4
Belief Management 6

2 Commutativity of Quantifiers in Varying-Domain Kripke Models, Robert Goldblatt and Ian Hodkinson 9
Introduction and Overview 9
1 Model Structures 12
2 Premodels and Models 14
3 Soundness and $\mathcal{M}$-Equivalence 17
4 Validating CQ 20
5 A Countermodel to CQ 23
6 Completeness and the Barcan Formulas 28
References 30

3 The Method of Tree-Hypersequents for Modal Propositional Logic, Francesca Poggiolesi 31
1 Introduction 31
2 The Calculi CSK* 34
3 Admissibility of the Structural Rules 37
4 The Adequateness of the Calculi 43
5 Cut-Elimination Theorem for CSK* 45
6 Conclusions and Further Work 49
References 50

4 All Splitting Logics in the Lattice NExt(KTB), Tomasz Kowalski and Yutaka Miyazaki 53
1 Introduction 53
2 Preliminaries 54
3 Splitting 56
4 Connected KTB-Frames 59
5 Few Splittings Theorem 61
6 Some Questions and Conjectures 65
References 66

5 A Temporal Logic of Normative Systems, Thomas Ågotnes, Wiebe van der Hoek, Juan A. Rodríguez-Aguilar, Carles Sierra and Michael Wooldridge 69
1 Introduction 69
2 Normative Temporal Logic 70
3 Symbolic Representations 80
4 Model Checking 86
5 Case Study: Traffic Control 93
6 Discussion 100
References 104

6 Reasoning with Justifications, Melvin Fitting 107
1 Introduction 107
2 Hintikka's Logics of Knowledge 107
3 Awareness Logic 110
4 Explicit Justifications 110
5 Internalization 113
6 Information Hiding and Recovery 114
7 Original Intent 115
8 Realizations As First-Class Objects 116
9 Generalizations 120
10 The Goal 121
References 122

7 Monotone Relations, Fixed Points and Recursive Definitions, Janusz Czelakowski 125
1 Partially Ordered Sets 127
2 Monotone Relations 134
3 Arithmetic Recursion and Fixed-Points 146
4 The Downward Löwenheim-Skolem-Tarski Theorem . . . 161
References 163

8 Processing Information from a Set of Sources, Arnon Avron, Jonathan Ben-Naim and Beata Konikowska 165
1 Introduction 165
2 The Framework 166
3 Existential Strategy for Standard Structures 173
4 The Universal Strategy 179
5 Proof Systems for the Existential Strategy 179
6 Future Research 184

References 185

9 The Classical Model Existence Theorem in Subclassical Predicate Logics I, Jui-Lin Lee 187
1 Introduction 187
2 Classical Model Existence Theorem in Propositional Logics 189
3 A Herbrand-Henkin Style Proof of the Classical Model Existence Theorem for Prenex Normal Form Sentences . 191
4 Prenex Normal Form Theorem Holds in Logics Weaker than First Order Logic 195
5 Concluding Remarks 197
References 198

10 Weak Implicational Logics Related to the Lambek Calculus—Gentzen versus Hilbert Formalisms, Wojciech Zielonka 201
1 Introduction 201
2 Preliminaries 203
3 The Associative Case 205
4 The Non-Associative Case 207
5 Hilbert-Style Formalism 209
References 211

11 Faithful and Invariant Conditional Probability in Łukasiewicz Logic, Daniele Mundici 213
Introduction: Conditionals and de Finetti Coherence Criterion 213
1 The i-Dimensional Volume of a Formula 215
2 Conditionals in Łukasiewicz Propositional Logic Ł_∞ . . . 220
3 A Faithful Invariant Conditional for Ł_∞ 222
4 Proof: Construction of a Faithful Conditional $\mathcal{P}$ 224
5 Conclusion of the Proof: $\mathcal{P}$ is Invariant 227
References 231

12 A Fuzzy Logic Approach to Non-Scalar Hedges, Stephan van der Waart van Gulik 233
1 Introduction 233
2 Lakoff's Proposal 234
3 Some New Machinery 237

4 The Generic Fuzzy Logic for Non-Scalar Hedges $\mathbf{FL_h}$ . . 240
5 Conclusion 247
References 247

13 The Procedures for Belief Revision, Piotr Łukowski 249
1 Introduction 250
2 Nonmonotonicity on Classical Base 256
3 Nonmonotonicity on Intuitionistic Base 263
4 Generalization 266
References 267

14 Shifting Priorities: Simple Representations for Twenty-Seven Iterated Theory Change Operators, Hans Rott 269
1 Introduction 269
2 Representing Doxastic States: Prioritized Belief Bases, Entrenchment, Systems of Spheres 270
3 Variants of Expansion 275
4 Radical revision 276
5 Conservative Revision 277
6 Moderate Revision 278
7 Restrained Revision 279
8 Variants of Contraction 280
9 Refinement: Neither Revision nor Contraction 281
10 Two-Dimensional Operators: Revision by Comparison . 282
11 Two-Dimensional Operators: Cantwell's Lowering 283
12 Gentle Raising and Lowering 285
13 Two-Dimensional Operators: Raising and Lowering by Strict Comparisons 285
14 Two-Dimensional Operators: Bounded Revision 286
15 Conclusion 288
References 290

15 The Coherence of Theories—Dependencies and Weights, Jason Jingshi Li, Rex Bing Hung Kwok and Norman Y. Foo . 297
1 Introduction 297
2 Internalist Coherence 299
3 Application to Game Theory 311
4 Summary and Discussion 317
References 317

16 On Meta-Knowledge and Truth, Urszula Wybraniec-Skardowska 319
Introduction 319
1 Ideas 320
2 Main Assumptions of the Theory of Syntax and Semantics 322
3 Three Notions of Truthfulness 334
4 Final Remarks 339
References 340
