Contents

Author Biographies vii

Editors' Introduction: Footprints in the Snow

Kristina Höök, David Benyon and Alan Munro 1

Part I Systems and Theories

1 Social Translucence: Using Minimalist Visualisations of Social Activity to Support Collective Interaction

Thomas Erickson and Wendy A. Kellogg 17

2 Collaborative Filtering: Supporting Social Navigation in Large, Crowded Infospaces

Joseph A. Konstan and John Riedl 43

3 Screen Scenery: Learning from Architecture and People's Practices of Navigation in Electronic Environments

Monika Buscher and John Hughes 83

4 Navigating the Virtual Landscape: Coordinating the Shared Use of Space

Phillip Jeffrey and Gloria Mark 105

5 Experiential Design of Shared Information Spaces

John A. Waterworth, Andreas Lund and David Modjeska 125

6 GeoNotes: A Location-based Information System for Public Spaces

Per Persson, Fredrik Espinoza, Petra Fagerberg, Anna Sandin and Rickard Cöster 151

7 Footsteps from the Garden: Arcadian Knowledge Spaces

Andrew McGrath and Alan Munro 175

8 Social Navigation of Food Recipes: Designing Kalas

Martin Svensson and Kristina Höök 201

9 Results from the Footprints Project

Alan Wexelblat 223

10 WebPlaces: Using Intermediaries to Add People to the Web

Paul P. Maglio, Rob Barrett and Stephen Farrell 249

Part II Theories and Principles

11 Where the Footprints Lead: Tracking Down Other Roles for Social Navigation	
<i>Paul Dourish</i>	273
12 Social Connotations of Space in the Design for Virtual Communities and Social Navigation	
<i>Andreas Dieberger</i>	293

Author Biographies

Rob Barrett

Rob Barrett (barrett@almaden.ibm.com) is a Research Staff Member at the IBM Almaden Research Center. He holds BS degrees in Physics and Electrical Engineering from Washington University in St. Louis and a PhD in Applied Physics from Stanford University. He joined IBM Research in 1991, where he has worked on magnetic data storage, pointing devices and web intermediaries.

David Benyon

David Benyon (d.benyon@dcs.napier.ac.uk) is Professor of Human-Computer Systems at Napier University. He obtained his PhD from the Open University in 1993 on the topic of Intelligent User Interfaces. His main research interests are in human-computer interaction (HCI), particularly in the application of knowledge-based techniques to HCI, and information systems design. David Benyon was actively involved with the EU's long-term research (LTR) intelligent-information-interfaces network of excellence, "i³-NET" and with project PERSONA (with Swedish Institute of Computer Science).
<http://www.dcs.napier.ac.uk/~dbenyon>

Monika Buscher

Monika Buscher (m.buscher@lancaster.ac.uk) is a research fellow at the Department of Sociology at Lancaster University. Her research interests include ethnomethodology, ethnographic studies of work practice, computer-supported cooperative work (CSCW), interdisciplinary theory and practice for systems design, theories of the information society. As a member of interdisciplinary research projects she carries out ethnographic studies of work, primarily in creative professions.
<http://www.comp.lancs.ac.uk/sociology/mbuscher.html>

Matthew Chalmers

Matthew Chalmers (matthew@dcs.gla.ac.uk) is a Reader in Computing Science at the University of Glasgow. Previously he worked at Xerox EuroPARC and UBS Ubilab. He is a principal investigator in Equator, a UK EPSRC Interdisciplinary Research Collaboration. His overall interest is the use of contemporary semiotics and philosophy to inform HCI theory and the design of information systems. One application of this work is City, a project in Equator that combines wearable computers, virtual environments and adaptive hypermedia in one

collaborative system. Other projects focus on information visualisation and recommender systems.

<http://www.dcs.gla.ac.uk/~matthew>

Rickard Cöster

Rickard Cöster (rick@sics.se) is a PhD student in the Machine Learning Group at the Department of Computer and Systems Sciences, Stockholm University. His research interest is in the broad area of information retrieval, information filtering and machine learning. He works part time at the Swedish Institute of Computer Science (SICS), and has developed systems for information retrieval and collaborative filtering that are currently used in a number of research projects at SICS.

<http://www.dsv.su.se/~rick/>

Andreas Dieberger

Andreas Dieberger (andreasd@us.ibm.com) is a Research Staff Member at the IBM Almaden Research Center. He holds a Masters in Computer Science, a PhD in Human Factors from the Vienna University of Technology, and a post-doctoral degree from a joint programme on environmental studies (“Technischer Umweltschutz”) from the Vienna University of Agriculture and the Vienna University of Technology. He joined IBM Research in 2000 and works on supporting collaborative work and on visualisation tools with a focus on design.

Paul Dourish

Paul Dourish (jpd@ics.uci.edu) is an Associate Professor of Information and Computer Science at the University of California, Irvine. He has previously held positions at Xerox PARC, Apple Research Labs and Rank Xerox EuroPARC. His primary research interests are in the areas of computer-supported cooperative work and human-computer interaction. In particular, much of his research concerns the relationship between foundational aspects of software design and analytic perspectives on social action, especially ethnomethodology. This interest has led him to investigate such topics as the relationship between representation and action in workflow, the development of radically adaptive architectures for collaborative systems, and the integration of information with embodiments of activity, such as that implied by social navigation.

<http://www.ics.uci.edu/~jpd>

Thomas Erickson

Thomas Erickson (snowfall@acm.org) is a Research Staff Member in the Social Computing Group at the IBM T.J. Watson Research Center, where he works on designing systems which support network mediated group interaction. An interaction designer and researcher, his approach to systems design is shaped by work in sociology, rhetoric, architecture and urban design. He has contributed to the design of many products, and authored about 40 publications on topics ranging from personal electronic notebooks and information retrieval systems to pattern languages and virtual community.

http://www.pliant.org/personal/Tom_Erickson/index.html

Fredrik Espinoza

Fredrik Espinoza (espinoza@sics.se) is a researcher at the Swedish Institute of Computer Science. After receiving his Master's degree in Computer and Systems Science from Uppsala University, Sweden, he is now pursuing a PhD in the area of open environments for electronic services and cooperation between services. <http://www.sics.se/~espinoza>

Petra Fagerberg

Petra Fagerberg (petra@sics.se) received her Master's degree in Computer Science in 2002 from the Royal Institute of Technology in Stockholm. Her research interests cover social and ubiquitous computing. <http://www.sics.se/humle/>

Stephen Farrell

Stephen Farrell (sfarrell@almaden.ibm.com) holds a BA in History and Philosophy of Science, and an MS in Computer Science from the University of Chicago. He joined IBM Research in 1999 to develop systems that enhance the ability of people to work or collaborate. Some of his projects include personalisation of web experience, support for individual knowledge management and visualisation of collaborative groups.

R.H.R. Harper

Richard Harper (R.Harper@surrey.ac.uk) is Professor of Socio-Digital Systems and Director of DWRC (Digital World Research Centre) at Surrey University. He completed his PhD at the University of Manchester in 1989. He then became a research officer at the University of Lancaster, participating in research into the sociological aspects of air traffic control. Following this, he was senior research fellow on a project into the design of expert systems for the police force. In 1992, he moved to Xerox's European Research Centre in Cambridge. Here, he undertook numerous projects into the ways digital technologies change organisational life, working with BT labs in the UK, the IMF in Washington, DC, and Lloyds-TSB in the UK, amongst others. During this time he was also a visiting scholar at the University of Cambridge and a special lecturer at the University of Nottingham. His latest book is: *The Myth of the Paperless Office* with A.J. Sellen, MIT Press, 2002.

<http://www.surrey.ac.uk/dwrc/harper.html>

John Hughes

Professor John Hughes (j.hughes@lancaster.ac.uk), graduated in 1963 with a degree in Moral and Political Philosophy from the University of Birmingham. He moved to Lancaster University in 1970. In a long, interminable career, John Hughes has published in the fields of political socialisation, political sociology, and research methods. His current interests, however, are in the field of computer-supported cooperative work which involves ethnographic studies of work activities to inform system design, and working with computer scientists at Lancaster.

<http://www.comp.lancs.ac.uk/sociology/jhughes.html>

Kristina Höök

Kristina Höök (kia@sics.se) is the laboratory manager of the HUMLE laboratory at SICS (Swedish Institute of Computer Science). She also holds an associate professor position at Stockholm University. Her work includes work on social navigation, intelligent user interfaces, and affective computing. Most of her work has been directed towards the design and user studies of novel ways of interaction between system and user.

<http://www.sics.se/~kia>

Phillip Jeffrey

Phillip Jeffrey (phillipj@cs-club.org) is currently employed at Bell Mobility, a mobile and wireless communications company in Canada. He has a BA (Honours) in Information Systems and Human Behaviour from the University of Guelph in Canada. Previously, he has been a student researcher at Adastral Park, Ipswich, UK, and the GMD FIT (now Fraunhofer Institute), Sankt Augustin, Germany.

Wendy A. Kellogg

Wendy A. Kellogg (wkkellogg@us.ibm.com) is Manager of Social Computing at IBM's T.J. Watson Research Center. Her current work involves designing and studying computer-mediated communication systems. Kellogg holds a PhD in Cognitive Psychology and is author of numerous papers in the fields of HCI and CSCW. She recently served as Technical Program Co-Chair for ACM's DIS 2000 ("Designing Interactive Systems") conference, and as General Co-Chair for ACM's CSCW 2000 ("Computer-Supported Cooperative Work") conference.

Joseph A. Konstan

Joseph A. Konstan (konstan@cs.umn.edu) is Associate Professor of Computer Science and Engineering at the University of Minnesota. His research addresses a variety of human-computer interaction issues related to filtering, comprehending, organising and automating large and complex data sets. He co-directs the GroupLens Research Group, and is best known for his work in recommender systems, multimedia and visualisation. In 1996 he co-founded Net Perceptions, a company that has since developed collaborative filtering recommender systems into a variety of commercial personalisation tools. He also works with a number of small and mid-sized businesses on issues related to web site design, user interfaces, and human-computer interaction. Dr. Konstan received his PhD from the University of California, Berkeley, in 1993.

<http://www.cs.umn.edu/~konstan>

Andreas Lund

Andreas Lund (alund@informatik.umu.se) is a graduate student and instructor at the Department of Informatics, Umeå University, where he is also a member of the Muse research group (<http://www.informatik.umu.se/~muse>). His general research interests include how computerisation brings about changed conditions for meaningful experiences in individual and social settings. He is

currently working towards the completion of his PhD thesis on the subject of how information visualisation design can be informed by recent theories of embodied meaning.

<http://www.informatik.umu.se/~alund/>.

Teenie Matlock

Teenie Matlock (tmatlock@psych.stanford.edu) is currently a post-doctoral researcher in the Psychology Department at Stanford University. She has a PhD in Cognitive Psychology from University of California, Santa Cruz, and prior to that studied linguistics and cognitive science. She has published in psychology, linguistics and human-computer interaction.

<http://www-psych.stanford.edu/~tmatlock/>

Paul P. Maglio

Paul P. Maglio (pmaglio@almaden.ibm.com) is a Manager and Research Staff Member at the IBM Almaden Research Center. He holds an SB in Computer Science and Engineering from the Massachusetts Institute of Technology and a PhD in Cognitive Science from the University of California, San Diego. He joined IBM Research in 1995, where he studies how people think about and use information spaces, such as the World Wide Web.

Gloria Mark

Gloria Mark (gmark@ics.uci.edu) is an Assistant Professor in Information and Computer Science at the University of California, Irvine. Previously she worked at the GMD in Bonn, Germany. Her main research interests are in computer-supported collaborative work (CSCW), particularly in understanding how collaborative technologies can support virtual collocation. She is currently working on projects with Intel and the Jet Propulsion Laboratory, studying distributed teams and technology use.

<http://www.ics.uci.edu/~gmark>

Andrew McGrath

Andrew McGrath (andrew.mcgrath@hutchison3g.com) is Head of User Interface group in Hutchison 3G, a mobile multimedia company that is one of five companies awarded licences by the UK Government in May 2000 to run third-generation mobile phone services. Prior to Hutchison 3G Andrew worked at BT Labs, Martlesham Heath, UK.

Rod McCall

Rod McCall (rodmc@totalise.co.uk) is currently writing up his thesis on navigation within electronic spaces at Napier University, Edinburgh. His thesis focuses on the development of navigational guidelines for two- and three-dimensional environments. In the past he has been a researcher into user interface design for offshore and maritime crisis management simulations and a member of the PERSONA project. At present he is a staff member at Runtime Revolution, Edinburgh, the authors of the user-friendly Revolution development environment.

David Modjeska

David Modjeska (modjeska@fis.utoronto.ca) is an assistant professor in the Faculty of Information Studies at the University of Toronto. He holds a PhD in Computer Science from the University of Toronto, an MS in Computer Science from Stanford University, and a BA in English from Harvard University. His research interests focus on information visualisation and human-computer interaction (HCI). Before joining FIS, he was an assistant professor in the Department of Computer Science at Chalmers Technical University/Gothenburg University in Sweden, and previously a guest researcher and instructor in the Department of Informatics at Umeå University in Sweden. Prior work experience includes six years as a software engineer in Silicon Valley. His teaching interests focus on information systems.

<http://www.fis.utoronto.ca/faculty/modjeska/index.html>

Alan Munro

Alan Munro (alanm@cis.strath.ac.uk) is a Research Fellow in the Department of Computer and Information Sciences at Strathclyde University in Glasgow. He has a MA and PhD in Psychology from the universities of Glasgow and Strathclyde respectively, and has done post-doctoral work in Oxford University Computing Laboratory, the University of Jyväskylä, Finland, and Napier University in Edinburgh, all in the broad area of support of collaborative activity and design of novel applications. His main interests are ethnographic fieldwork for the design and inspiration of new technologies, ecological psychology and novel interfaces for technologies. His current work is on the EU Disappearing Computer project Gloss where he is working closely with architects looking at the design of social navigational possibilities for different sorts of physical spaces using ubiquitous computing.

<http://www.cs.strath.ac.uk/~alanm/>

Per Persson

Per Persson (perp@sics.se) gained his PhD in Communication Studies from Stockholm University in 2000 with a dissertation on the spectator psychology of visual media. Since 1999, he has conducted research at the Swedish Institute of Computer Science on social computing, social navigation, ubiquitous computing and believable agents.

<http://www.sics.se/~perp>

John Riedl

John Riedl (riedl@cs.umn.edu) is Associate Professor of Computer Science and Engineering at the University of Minnesota. His research encompasses distributed and collaborative systems. His decade of research on recommender systems started in 1992 when he and Paul Resnick started to build the first automated collaborative filtering system. He continues to co-direct the GroupLens Research Group and has been a prolific author and speaker on the topic. In 1996, he co-founded Net Perceptions to commercialise collaborative filtering technology. After several years as the company's chief technical officer, he returned full-time

to research and teaching, though he continues to shape commercial use of the technology as the company's chief scientist. Dr Riedl received his PhD from Purdue University.

<http://www.cs.umn.edu/~riedl>

Anna Sandin

Anna Sandin (sandin@sics.se) received her Master's degree in Computer Science in 2001 from Uppsala University, Sweden. She performs advanced research in electronic services and personal service environments (PSE). She is presently affiliated with Swedish Institute of Computer Science, Kista, Sweden.

<http://www.sics.se/~sandin/>

Robert Spence

Professor Robert Spence (r.spence@ic.ac.uk) is currently at Imperial College in London, where he leads the Human-Computer Interaction Research Team in the Intelligent and Interactive Systems group. He conducts research into information visualisation, agent-based interaction design and the facilitation of Social Interaction through Information Technology. The IIS-HCI team specialises in the efficient and effective navigation of large information spaces using graphical display techniques.

<http://www.ee.ic.ac.uk/research/information/www/Bobs.html>

Martin Svensson

Martin Svensson (martins@sics.se) received his PhLic (2000) at Stockholm University. He has been at the Swedish Institute of Computer Science since 1996 and is currently finalising his PhD on how to design and evaluate systems that support social navigation.

<http://www.sics.se/~martins>

John Waterworth

John Waterworth (jwworth@informatik.umu.se) is Professor of Informatics and leader of the Muse research group at Umeå University in Sweden, and also Senior Researcher at the Interactive Institute Tools for Creativity studio. He has a PhD in Experimental Psychology and is a Chartered Psychologist of the British Psychological Society. John has worked on human-computer interaction for many years, at BT Labs in England (1980-88, on speech-based interaction), in Singapore (1988-94, on multimedia and VR) and in Sweden (from 1994). His research interests centre around the effects of technological mediation on consciousness, creativity and understanding. A current interest is how interactive art can be used as a vehicle for research on the effects of technological mediation on experience.

<http://www.informatik.umu.se/~jwworth/>

Alan Wexelblat

Alan Wexelblat (wex@hovir.com) received his PhD from MIT's Program in Media Arts and Sciences in 1999, where his dissertation work on interaction history was supervised by Dr Pattie Maes. He has worked in social navigation

and related areas such as virtual reality, multimodal interaction and information visualisation since the 1980s. His research interests currently revolve around time, history, memory and artefacts, particularly within a group or community context.

<http://wex.www.media.mit.edu/people/wex/>
