To my family, Carla, Gabriela and Sofia. To my parents, André and Silvia whom I thank for their constant encouragement. I am specially thankful to my wife, Carla, for her love and friendship.

Preface

This book is the reprint of my thesis defended in 2010 at PUC-Rio. The content is mostly identical and contains only few adjustments and complements to the original thesis.

For instance, I took advance of some experiences gathered from the Semantic Web community during the 10th Semantic Web Conference at Bonn. A presentation during that event reminded me that I should write about how our systems can be used in the problem called “justification” by the Semantic Web community. I also add some brief comments about the extension of our deduction systems to deal with intuitionistic version of \mathcal{ALC} . This research was started right after I got my PhD and it is now referenced in the conclusion.

I specially thank Edward Hermann Haeusler, my advisor and friend, who never refuses to give me some advice and share his ideas. I also thank Leonardo Magalhes de Araujo Monteiro for his careful revision of the English language.

Contents

1	Introduction	1
1.1	Description Logics	1
1.2	Motivation	2
1.3	What This Book is About	4
1.4	How This Book is Organized	4
	References	5
2	Background	9
2.1	A Basic Description Logic	9
2.2	Individuals	11
2.3	Description Logics Family	12
2.4	Reasoning in DLs	13
2.5	Inference Algorithms	13
2.6	\mathcal{ALC} Axiomatization	14
	References	15
3	The Sequent Calculus for \mathcal{ALC}	17
3.1	A Sequent Calculus for \mathcal{ALC}	17
3.2	$SC_{\mathcal{ALC}}$ Soundness	20
3.3	The Completeness of $SC_{\mathcal{ALC}}$	24
3.4	The Cut-Elimination Theorem	25
	References	36
4	Comparing $SC_{\mathcal{ALC}}$ With Other \mathcal{ALC} Deduction Systems	37
4.1	Introduction	37
4.2	Comparing $S\mathcal{ALC}$ With the Structural Subsumption Algorithm	38
4.3	Obtaining Counter-Models From Unsuccessful Proof Trees	38
	Reference	49

5	A Natural Deduction for ACC	51
5.1	Introduction	51
5.2	The ND_{ACC} System	52
5.3	ND_{ACC} Soundness	53
5.4	ND_{ACC} Completeness	56
5.5	Normalization Theorem for ND_{ACC}	57
	References	63
6	Towards a Proof Theory for $ALCQI$	65
6.1	Introduction	65
6.2	$ALCQI$ Introduction	65
6.3	The Sequent Calculus for $ALCQI$	66
6.4	SC_{ALCQI} Soundness	69
6.5	On SC_{ALCQI} Completeness	72
6.6	A Natural Deduction for $ALCQI$	73
6.7	ND_{ALCQI} Soundness	73
	References	75
7	Proofs and Explanations	77
7.1	Introduction	77
7.2	An Example of Explanations From Proofs in SC_{ACC}	82
7.3	Explaining UML in ND_{ALCQI}	83
	References	85
8	A Prototype Theorem Prover	87
8.1	Overview of the Maude System	87
8.2	A Prototype Theorem Prover	89
8.2.1	The Logical Language	89
8.2.2	The Sequent Calculus	91
8.3	The SC_{ACC} System	93
8.3.1	The SC^{\square}_{ACC} System Implementation	94
8.3.2	The Interface	96
8.3.3	Defining Proof Strategies	99
	References	102
9	Conclusion	103
9.1	Contributions	103
9.2	Future Work	105
	References	105
