Foreword

In order to help achieve the world's goals of addressing environmental issues, we are tasked with making our Information Technology (IT) systems and business processes more environmentally friendly and harnessing the potential of IT to solve or mitigate pressing environmental problems. Additionally, the IT sector is being scrutinized more closely owing to the effects that IT products and services have on sustainability throughout their lifecycle. To mitigate risks and maximize the advantages and possibilities offered by green IT, a comprehensive and strategy based on solid principles and best practices is required. Business executives, legislators, IT experts, academics, and students, as well as the general public, need realistic advice on how to utilize green IT. However, there are very few books on green IT that are both practical and helpful.

Many IT professionals, business personnel, and individuals who use IT are keen to explore and implement innovative ideas in this field. The combination of the principles of Human–Computer Interaction (HCI) with sustainability design is one such innovation. Previously, the primary goal of incorporating HCI in the design process was to create a user interface that was both efficient and effective in meeting the needs and requirements of prospective users. However, this book is intended to guide designers and users in the creation of IT systems and devices that meet future needs while incorporating HCI principles and sustainability in the design. Therefore, this work offers guidelines regarding the management and participation of users in the development of successful designs for various platforms such as websites, phones, tablets, and wearable devices. The intention of this book is to provide guidelines for the clean, minimalist design of systems that enable users to interact easily with the platform, while minimizing any negative impacts on the environment.

This book is for anyone interested in learning about sustainable design in human–computer interaction, usability, and environmental concerns in order to ensure a more sustainable ecosystem for coming generations. These designs have been evaluated by users in a number of countries comprising both developed and developing nations: Australia, Brazil, China, Germany, India, Norway, Singapore, South Korea, Sweden, the UK, and the USA. The data obtained from the research participants helped the

researchers to determine the most important elements to include in the new sustainable design. Additionally, the writers will continue to include other subjects into the textbook, including social and global problems, social networking, big data, and Internet of Things (IoT).

Finally, this book establishes the relationship between HCI, usability, and sustainable design and presents the most up-to-date knowledge on the aforementioned topics, as the majority of HCI authors are eager to develop frameworks, tools, techniques, and models that comply with sustainable design requirements.

Intelligence (SDAIA)

Acknowledgements

We acknowledge the support of all people that contributed directly or indirectly to this book.

Tomayess Issa owe special gratitude first to God, the Almighty, and her parents: V. Rev. Fr. Boutros Touma Issa; and of course, to the Spirit of Bathqyomo Marine Khoury-Issa (2016+). Her sister Dr. Theodora, her brother Dr. Touma, his wife Siba, and their daughter Talitha; her Sister Tamara, her husband Tony, and their children Tabitha, Antoinette, Jacob, and finally to her bother Theodore, his wife Mary, and their children Cephas and Mary; for their continuous support, and encouragement since without their help, this work would never have been completed. Tomayess would like to acknowledge the support of The School of Management and Marketing at the Faculty of Business and Law of Curtin University, Australia, for their inspiration and encouragement.

Pedro Isaias would like to acknowledge The School of Information Systems and Technology Management (SISTM) from the University of New South Wales, Sydney, for their support. Also, a special acknowledgment to Sara Pifano from ISRLab for her continuous support. Finally, he would like to acknowledge the support of his family. Without their assistance, this work would not have been possible at all.

Contents

1	Introduction	1
1.1	Introduction	1
1.2	Human–Computer Interaction	2
1.3	Usability	4
1.4	Sustainability	5
1.5	Sustainable Design	7
1.6	Methodology	11
1.7	The Initial Sustainable Step in the New Participative Methodology for Sustainable Design	11
1.8	Outline of the Book	13
1.9	Conclusion	17
	References	17
2	Usability and Human–Computer Interaction (HCI)	23
2.1	Introduction	23
2.2	User-Centered System Design	24
2.3	Human–Computer Interaction (HCI)	25
2.3.1	What is HCI?	25
2.3.2	HCI as Process	27
2.3.3	Relationship Between the HCI and Human Dialogue	27
2.3.4	Goals of HCI	28
2.3.5	Purpose of HCI	29
2.3.6	Interaction and Interactivity	30
2.3.7	Factors in HCI Design	32
2.4	What is Usability?	33
2.4.1	Concepts of Usability	34
2.4.2	Usability Criteria	36
2.4.3	Usability Specifications	37
2.5	Conclusion	38
	References	39

3	User Participation in the System Development Process	41
3.1	Introduction	41
3.2	What is Participation?	41
3.2.1	Change Processes	44
3.2.2	Managing User Participation in Development Processes	46
3.2.3	How to Participate?	47
3.2.4	Some Problems with the Participative Approach	50
3.3	How We Know Our Users	51
3.3.1	User Characteristics	51
3.3.2	Knowledge of User Tasks	53
3.3.3	Recruiting Users	54
3.3.4	Techniques for Observing and Listening to Users	55
3.3.5	Internet Marketing and User Responses	58
3.4	Conclusion	59
	References	60
4	Physical, Cognitive, and Affective Engineering	63
4.1	Introduction	63
4.2	Physical Engineering	64
4.3	Cognitive Engineering	66
4.4	Goals, Operators, Methods, and Selection Rules (GOMS)	68
4.5	Norman's Model	69
4.6	Affective Engineering	69
4.7	Conclusion	72
	References	72
5	Color, Prototyping and Navigation, Principles and Guidelines Design, Evaluation and Testing, and Task Analysis	75
5.1	Introduction	75
5.2	Color	76
5.3	Navigation	78
5.4	Prototyping	80
5.5	Guidelines and Principles Design	81
5.6	Evaluation and Testing	83
5.6.1	What is Evaluation?	83
5.6.2	Why Evaluate?	84
5.6.3	When to Evaluate?	84
5.6.4	Methods and Means of Evaluation	85
5.7	Task Analysis	86
5.7.1	Goals, Tasks, and Actions	87
5.7.2	Techniques for Identifying Types and Granularity of Tasks	87
5.8	Conclusion	89
	References	89

6 Models and Methodologies	93
6.1 Introduction	93
6.2 Lifecycle Models	95
6.2.1 The Waterfall Lifecycle Model	95
6.2.2 The Spiral Lifecycle Model	96
6.2.3 Rapid Application Development (RAD)	97
6.2.4 Systems Development Lifecycle	97
6.2.5 The Star Lifecycle Model	99
6.2.6 The Usability Engineering Lifecycle	100
6.2.7 Summary of Lifecycle Models	100
6.3 Information Systems Development Methodologies	101
6.3.1 Structured Systems Analysis and Design Methodology (SSADM)	102
6.3.2 Soft Systems Methodology (SSM)	104
6.3.3 User-Centered Development Methodology	108
6.3.4 ETHICS Methodology	110
6.3.5 Summary of Information Systems Development Methodologies	112
6.4 Methodologies for Developing Websites	114
6.4.1 Human Factors Methodology for Designing Websites	115
6.4.2 Relationship Management Methodology (RMM)	116
6.4.3 The W3DT Design Methodology	119
6.4.4 Information Development Methodology for the Web	121
6.4.5 The Web Site Design Method (WSDM)	123
6.4.6 Summary of Methodologies for Developing Websites.	126
6.5 Marketing Methodologies	129
6.5.1 E-Marketing Plan	129
6.5.2 The Adventures Company Methodology	133
6.5.3 The Market-Vantage (Internet Performance Marketing) Methodology	135
6.5.4 EnSky's Unique Methodology	138
6.5.5 Review of Marketing Methodologies	139
6.5.6 Summary of Marketing Methodologies	139
6.6 Detailed Website Design and Implementation	142
6.6.1 The Object-Oriented Hypermedia Design Model (OOHDM)	142
6.6.2 Implementation Methodology	144
6.7 Summary of Information Systems Development Methodologies, Methodologies for Developing Websites, and Marketing Methodologies	145
6.8 New Participative Methodology for Marketing Websites (NPMMW)	151
6.9 Conclusion	156
