Preface

This volume contains papers presented at E-Vote-ID 2018, the Third International Joint Conference on Electronic Voting, held during October 2–5, 2018, in Bregenz, Austria. It resulted from the merging of EVOTE and Vote-ID.

In total, more than 800 experts from over 35 countries have attended the conference series over the last 14 years. This shows that the conference continues to be one of the major events in the field of electronic voting, providing ample room for interdisciplinary and open discussion of all issues relating to electronic voting.

Also, this year, the conference consisted of:

- Security, Usability and Technical Issues Track
- Administrative, Legal, Political and Social Issues Track
- Election and Practical Experiences Track
- PhD Colloquium on the day before the conference

This year's edition, E-VOTE-ID 2018, received 45 submissions, being, each of them, reviewed by 3 to 4 program committee members, using a double blind-review process. As a result, 13 papers were accepted for this volume, representing 29% of the submitted proposals. The selected papers cover a wide range of topics connected with electronic voting, including experiences and revisions of the real uses of E-voting systems and corresponding processes in elections.

Special thanks go to the members of the international program committee for their hard work in reviewing, discussing, and shepherding papers. They ensured the high quality of these proceedings with their knowledge and experience. We would also like to thank the German Informatics Society (Gesellschaft für Informatik) with its ECOM working group for their partnership over many years.
