The Smart Innovation, Systems and Technologies book series encompasses the topics of knowledge, intelligence, innovation and sustainability. The aim of the series is to make available a platform for the publication of books on all aspects of single and multi-disciplinary research on these themes in order to make the latest results available in a readily-accessible form. Volumes on interdisciplinary research combining two or more of these areas is particularly sought.

The series covers systems and paradigms that employ knowledge and intelligence in a broad sense. Its scope is systems having embedded knowledge and intelligence, which may be applied to the solution of world problems in industry, the environment and the community. It also focusses on the knowledge-transfer methodologies and innovation strategies employed to make this happen effectively. The combination of intelligent systems tools and a broad range of applications introduces a need for a synergy of disciplines from science, technology, business and the humanities. The series will include conference proceedings, edited collections, monographs, handbooks, reference books, and other relevant types of book in areas of science and technology where smart systems and technologies can offer innovative solutions.

High quality content is an essential feature for all book proposals accepted for the series. It is expected that editors of all accepted volumes will ensure that contributions are subjected to an appropriate level of reviewing process and adhere to KES quality principles.

# Contents

<b>Designing a Neural Network from Scratch for Big Data Powered by Multi-node GPUs</b> .....	1
Alcides Fonseca and Bruno Cabral	
<b>Deep Learning for Scene Understanding</b> .....	21
Uzair Nadeem, Syed Afaq Ali Shah, Ferdous Sohel, Roberto Togneri and Mohammed Bennamoun	
<b>An Application of Deep Learning in Character Recognition: An Overview</b> .....	53
Sana Saeed, Saeeda Naz and Muhammad Imran Razzak	
<b>Deep Learning for Driverless Vehicles</b> .....	83
Cameron Hodges, Senjian An, Hossein Rahmani and Mohammed Bennamoun	
<b>Deep Learning for Document Representation</b> .....	101
Mehran Kamkarhaghighi, Eren Gultepe and Masoud Makrehchi	
<b>Applications of Deep Learning in Medical Imaging</b> .....	111
Sanjit Maitra, Ratul Ghosh and Kuntal Ghosh	
<b>Deep Learning for Marine Species Recognition</b> .....	129
Lian Xu, Mohammed Bennamoun, Senjian An, Ferdous Sohel and Farid Boussaid	
<b>Deep Molecular Representation in Cheminformatics</b> .....	147
Peng Jiang, Serkan Saydam, Hamed Lamei Ramandi, Alan Crosky and Mojtaba Maghrebi	
<b>A Brief Survey and an Application of Semantic Image Segmentation for Autonomous Driving</b> .....	161
Çağrı Kaymak and Ayşegül Uçar	

<b>Phase Identification and Workflow Modeling in Laparoscopy Surgeries Using Temporal Connectionism of Deep Visual Residual Abstractions . . . . .</b>	<b>201</b>
Kaustuv Mishra, Rachana Sathish and Debdoot Sheet	
<b>Deep Learning Applications to Cytopathology: A Study on the Detection of Malaria and on the Classification of Leukaemia Cell-Lines . . . . .</b>	<b>219</b>
G. Gopakumar and Gorthi R. K. Sai Subrahmanyam	
<b>Application of Deep Neural Networks for Disease Diagnosis Through Medical Data Sets . . . . .</b>	<b>259</b>
Alper Baştürk, Hasan Badem, Abdullah Caliskan and Mehmet Emin Yüksel	
<b>Why Dose Layer-by-Layer Pre-training Improve Deep Neural Networks Learning? . . . . .</b>	<b>293</b>
Seyyede Zohreh Seyyedsalehi and Seyyed Ali Seyyedsalehi	
<b>Springer: Deep Learning in eHealth . . . . .</b>	<b>319</b>
Peter Wlodarczak	
<b>Deep Learning for Brain Computer Interfaces . . . . .</b>	<b>333</b>
Ankita Bose, Sanjiban Sekhar Roy, Valentina Emilia Balas and Pijush Samui	
<b>Reducing Hierarchical Deep Learning Networks as Game Playing Artefact Using Regret Matching . . . . .</b>	<b>345</b>
Arindam Chaudhuri and Soumya K. Ghosh	
<b>Deep Learning in Gene Expression Modeling . . . . .</b>	<b>363</b>
Dinesh Kumar and Dharmendra Sharma
