Preface

This volume contains papers presented at E-Vote-ID 2019, the 4th International Joint Conference on Electronic Voting, held during October 1–4, 2019, in Bregenz, Austria. It resulted from the merging of EVOTE and Vote-ID and counting up to 15 years since the first E-Vote conference in Austria. Since the first conference in 2004, over 1,000 experts have attended the venue, including scholars, practitioners, authorities, electoral managers, vendors, and PhD Students. The conference collected the most relevant debates on the development of Electronic Voting, from aspects relating to security and usability through to practical experiences and applications of voting systems, also including legal, social, or political aspects, amongst others; turning out to be an important global referent in relation to this issue.

Also, this year, the conference consisted of:

- Security, Usability, and Technical Issues Track
- Administrative, Legal, Political, and Social Issues Track
- Election and Practical Experiences Track
- PhD Colloquium, Poster, and Demo Session on the day before the conference

E-VOTE-ID 2019 received 45 submissions, being, each of them, reviewed by 3 to 5 Program Committee members, using a double-blind review process. As a result, 13 papers were accepted for this volume, representing 29% of the submitted proposals. The selected papers cover a wide range of topics connected with electronic voting, including experiences and revisions of the real uses of E-voting systems and corresponding processes in elections.

We would also like to thank the German Informatics Society (Gesellschaft für Informatik) with its ECOM working group for their partnership over many years. Further we would like to thank the Swiss Federal Chancellery for their kind support. Special thanks go to the members of the international Program Committee for their hard work in reviewing, discussing, and shepherding papers. They ensured the high quality of these proceedings with their knowledge and experience.
