Preface

This volume contains the proceedings of the 7th International Workshop on Formal Techniques for Safety-Critical Systems (FTSCS 2019), held in Shenzhen, China, on November 9, 2019, as a satellite event of the ICFEM conference.

The aim of this workshop is to bring together researchers and engineers who are interested in the application of formal and semi-formal methods to improve the quality of safety-critical computer systems. FTSCS strives to promote research and development of formal methods and tools for industrial applications, and is particularly interested in industrial applications of formal methods. Specific topics include, but are not limited to:

- Case studies and experience reports on the use of formal methods for analyzing safety-critical systems, including avionics, automotive, medical, and other kinds of safety-critical and QoS-critical systems
- Methods, techniques, and tools to support automated analysis, certification, debugging, etc., of complex safety/QoS-critical systems
- Analysis methods that address the limitations of formal methods in industry (usability, scalability, etc.)
- Formal analysis support for modeling languages used in industry, such as AADL, Ptolemy, SysML, SCADE, Modelica, etc.
- Code generation from validated models

The workshop received 16 regular and 1 tool paper submissions. Based on the reviews and extensive discussions, the Program Committee selected 6 regular papers, 1 tool paper, and 1 work-in-progress paper for presentation at the workshop and inclusion in this volume. Another highlight of the workshop was an invited talk by Sofiène Tahar on “Formal Verification of Cyber-Physical Systems.” We organized the discussion into three sessions. One specifically on avionic and spacecraft domain. The second one on a wider range of application domains including transportation, circuits, and medical applications. The last one included work-in-progress and tool papers.

Many colleagues and friends have contributed to FTSCS 2019. We thank Sofiène Tahar for giving an excellent invited talk and the authors who submitted their work to FTSCS 2019 and who, through their contributions, made this workshop an interesting event. We are particularly grateful that so many well-known researchers agreed to serve on the Program Committee, and that they provided timely, insightful, and detailed reviews. We also thank the editors of *Communications in Computer and Information Science* for agreeing to publish the proceedings of FTSCS 2019 as a volume in their series, and Shengchao Qin and Lijun Zhang for their help with the local arrangements.

Organization

Program Committee

Musab Alturki	King Fahd University of Petroleum and Minerals, Saudi Arabia
Étienne André	Université Paris 13, LIPN, CNRS, UMR, France
Toshiaki Aoki	JAIST, Japan
Cyrille Valentin Artho	KTH Royal Institute of Technology, Sweden
Kyungmin Bae	Pohang University of Science and Technology (POSTECH), South Korea
Osman Hasan	National University of Sciences and Technology, Pakistan
Klaus Havelund	Jet Propulsion Laboratory, USA
Ralf Huuck	UNSW Sydney, LOGILICA, Australia
Alexander Knapp	Universität Augsburg, Germany
Sven Linker	The University of Liverpool, UK
Robi Malik	University of Waikato, New Zealand
Frederic Mallet	Université Cote d’Azur, France
Stefan Mitsch	Carnegie Mellon University, USA
Roberto Nardone	Mediterranean University of Reggio Calabria, Italy
Thomas Noll	RWTH Aachen University, Germany
Lee Pike	Galois, Inc., USA
Zhiping Shi	Beijing Engineering Research Center of High Reliable Embedded System, China
Sofiene Tahar	Concordia University, Canada
Carolyn Talcott	SRI International, USA
Jean-Pierre Talpin	Inria, France
Nils Timm	University of Pretoria, South Africa
Tatsuhiko Tsuchiya	Osaka University, Japan
Tom van Dijk	University of Twente, The Netherlands
Huibiao Zhu	East China Normal University, China
Peter Ölveczky	University of Oslo, Norway

Additional Reviewers

Ahmad, Waqar
Gruner, Stefan
Li, Ximeng
Qasim, Muhammad
Zhang, Qianying

Contents

Invited Paper

Formal Verification of Cyber-Physical Systems Using Theorem Proving	3
<i>Adnan Rashid, Umair Siddique, and Sofiène Tahar</i>	

Avionics and Spacecraft

Formal Development of Multi-Purpose Interactive Application (MPIA) for ARINC 661.	21
<i>Neeraj Kumar Singh, Yamine Aït-Ameur, Dominique Méry, David Navarre, Philippe Palanque, and Marc Pantel</i>	
Verifying Resource Adequacy of Networked IMA Systems at Concept Level.	40
<i>Rodrigo Saar de Moraes and Simin Nadjm-Tehrani</i>	
Automated Ada Code Generation from Synchronous Dataflow Programs on Multicore: Approach and Industrial Study	57
<i>Shenghao Yuan, Zhibin Yang, Jean-Paul Bodeveix, Mamoun Filali, Tiexin Wang, and Yong Zhou</i>	

Applications

POP: A Tuning Assistant for Mixed-Precision Floating-Point Computations.	77
<i>Dorra Ben Khalifa, Matthieu Martel, and Assalé Adjé</i>	
Visualising Railway Safety Verification	95
<i>Filippos Pantekis, Phillip James, Liam O'Reilly, Daniel Archambault, and Faron Moller</i>	
Probabilistic Activity Recognition for Serious Games with Applications in Medicine	106
<i>Elisabetta De Maria, Thibaud L'Yvonnet, Sabine Moisan, and Jean-Paul Rigault</i>	

Tools and Work in Progress

A Framework for Model Checking Against CTLK Using Quantified Boolean Formulas	127
<i>Emily Yu, Martina Seidl, and Armin Biere</i>	

Formal Semantics Extraction from MIPS Instruction Manual 133
Quang Thinh Trac and Mizuhito Ogawa

Author Index 141
