

Studies in Systems, Decision and Control

Volume 310

Series Editor

Janusz Kacprzyk, Systems Research Institute, Polish Academy of Sciences,
Warsaw, Poland

The series “Studies in Systems, Decision and Control” (SSDC) covers both new developments and advances, as well as the state of the art, in the various areas of broadly perceived systems, decision making and control—quickly, up to date and with a high quality. The intent is to cover the theory, applications, and perspectives on the state of the art and future developments relevant to systems, decision making, control, complex processes and related areas, as embedded in the fields of engineering, computer science, physics, economics, social and life sciences, as well as the paradigms and methodologies behind them. The series contains monographs, textbooks, lecture notes and edited volumes in systems, decision making and control spanning the areas of Cyber-Physical Systems, Autonomous Systems, Sensor Networks, Control Systems, Energy Systems, Automotive Systems, Biological Systems, Vehicular Networking and Connected Vehicles, Aerospace Systems, Automation, Manufacturing, Smart Grids, Nonlinear Systems, Power Systems, Robotics, Social Systems, Economic Systems and other. Of particular value to both the contributors and the readership are the short publication timeframe and the world-wide distribution and exposure which enable both a wide and rapid dissemination of research output.

** Indexing: The books of this series are submitted to ISI, SCOPUS, DBLP, Ulrichs, MathSciNet, Current Mathematical Publications, Mathematical Reviews, Zentralblatt Math: MetaPress and Springerlink.

Acknowledgements

There are numerous individuals without whose constructive comments, useful suggestions and wealth of ideas this monograph could not have been completed. Special thanks go to Prof. Tianyou Chai at Northeastern University, Prof. Wei Lin at Case Western Reserve University, Dr. Jun Liu at the University of Sheffield, Prof. Frank Lewis at the Texas University at Arlington, Prof. Zhentao Hu at Henan University, Prof. Shengzhi Zhao at Liaoning University, and Associate Professor Yan Liu at Northeastern University. Thanks also go to our students, Jinghan Li, Shuang An, for their commentary. The authors are especially grateful to their families for their encouragement and never-ending support when it was most required. Finally, we would like to thank the editors at Springer for their professional and efficient handling of this project.

The writing of this book was supported in part by National Natural Science Foundation of China (61825301, 61673198, 62073157), Provincial Natural Science Foundation of Liaoning Province (20180550473), Scientific Research Fund of Educational Department of Liaoning Province (LZD201901) and Liaoning Revitalization Talents Program (XLYC1807012).

Contents

1	Introduction	1
1.1	Switched Systems	1
1.2	Finite-Time Stabilization	4
1.3	H_∞ Control	7
1.4	Switched Observers Design	9
1.5	Basic Definitions and Lemmas	9
1.6	Organization of the Book	12
	References	14
2	Global Finite-Time Stabilization of Switched Nonlinear Systems in Lower-Triangular Form	21
2.1	Introduction	21
2.2	Problem Formulation	23
2.3	Main Result	24
2.4	Simulation Studies	29
2.5	Conclusions	33
	References	33
3	Global Finite-Time Stabilization of Switched Nonlinear Systems with the Powers of Positive Odd Rational Numbers	35
3.1	Introduction	35
3.2	Preliminaries and System Description	37
3.3	Global Finite-Time Stabilization	39
3.4	Special Cases	45
3.5	Extension to Non-smooth Case	49
3.6	Illustrative Examples	51
3.7	Concluding Remarks	55
3.8	Proof of Propositions	56
3.8.1	Proof of Proposition 3.5	56
3.8.2	Proof of Proposition 3.6	57

3.8.3	Proof of Proposition 3.7	58
3.8.4	Proof of Proposition 3.8	60
	References	65
4	Global Finite-Time Stabilization of Switched Nonlinear Systems in Non-triangular Form	67
4.1	Introduction	67
4.2	Preliminaries and System Description	68
4.3	Main Result	69
4.4	An Illustrative Example	76
4.5	Concluding Remarks	79
	References	79
5	Adaptive Finite-Time Stabilization of Uncertain Nonlinear Systems via Logic-Based Switchings	81
5.1	Introduction	81
5.2	System Description	82
5.3	Adaptive Stabilizer Design	83
5.3.1	Controller Design	83
5.3.2	Switching Mechanism	88
5.4	Main Results	89
5.5	An Illustrative Example	91
5.6	Concluding Remarks	94
	References	94
6	Dwell-Time-Based Standard H_∞ Control of Switched Systems Without Requiring Internal Stability of Subsystems	97
6.1	Introduction	97
6.2	Problem Statement	99
6.3	H_∞ Control for Unforced Switched Linear Systems	100
6.4	State Feedback H_∞ Control	107
6.5	H_∞ Control for Unforced Switched Linear Systems with Time-Varying Delay	109
6.5.1	Delay-Dependent Dwell Time	110
6.5.2	Delay-Independent Dwell Time	116
6.6	Illustrative Examples	119
6.6.1	Stabilization of Unforced Switched Linear Systems	119
6.6.2	H_∞ Control of Unforced Switched Linear Systems with All Unstable Subsystems	119
6.6.3	H_∞ Control of Forced Switched Linear Systems	121
6.6.4	H_∞ Performance of Unforced Switched Linear Systems with Stable Subsystems	122
6.6.5	H_∞ Control for Unforced Switched Linear Systems with Time-Varying Delay	122

6.7	Concluding Remarks	125
	References	126
7	Observers Design for Unknown Inputs Switched Linear Systems Without Requiring Strong Detectability of Subsystems	129
7.1	Introduction	129
7.2	Problem Formulation	130
7.3	Main Results	133
7.4	Application to Stabilization of Switched Singular Linear Systems	141
7.4.1	System Description	141
7.4.2	Case A: All Subsystems Are Unstable	143
7.4.3	Case B: All Subsystems Are Stable	147
7.5	Illustrative Examples	148
7.5.1	Example 1	148
7.5.2	Example 2	151
7.5.3	Example 3	155
7.6	Conclusion	156
	References	156
8	Conclusions	159
