Preface

The 9th International Conference on Electronic Government and the Information Systems Perspective (EGOVIS 2020), took place online in the time zone of Bratislava, Slovakia, during September 14–17, 2020. The conference belongs to the 31st DEXA conference series.

EGOVIS focuses on information systems and ICT aspects of e-government. Information systems are a core enabler for e-government/governance in all its dimensions: e-administration, e-democracy, e-participation, and e-voting. EGOVIS aims to bring together experts from academia, public administrations, and industry to discuss e-government and e-democracy from different perspectives and disciplines, i.e., technology, policy and/or governance, and public administration.

The Program Committee accepted 16 papers from recent research fields such as artificial intelligence, machine learning, e-identity, e-participation, open government and e-government architectures for e-government, intelligent systems, and semantic technologies for services in the public sector. Beyond theoretical contributions, papers cover e-government practical applications and experiences.

These proceedings are organized into five sections according to the conference sessions.

Chairs of the Program Committee wish to thank all the reviewers for their valuable work; the reviews raised several research questions discussed at the conference. We would like to thank Ismail Khalil for the administrative support and stimulating us in proper scheduling.

We wish pleasant and beneficial learning experiences for the readers and hope that discussion continued after the conference between the researchers, contributing to building a global community in the field of e-government.

Contents

Knowledge Representation and Modeling in e-Government

Hybrid Refining Approach of PrOnto Ontology	3
<i>Monica Palmirani, Giorgia Bincoletto, Valentina Leone, Salvatore Sapienza, and Francesco Sovrano</i>	
Ranking E-government Ontologies on the Semantic Web	18
<i>Jean Vincent Fonou-Dombeu</i>	
Framework for Data Analysis in the Context of the Smart Villages	31
<i>Jorge Martinez-Gil, Mario Pichler, Muhamed Turkanović, Tina Beranič, Mitja Gradišnik, Gianluca Lentini, Alessandro Lué, Alberto Colorni Vitale, Guillaume Doukhan, and Claire Belet</i>	

e-Government Theoretical Background

A Conceptual Proposal for Responsible Innovation	49
<i>Thais Assis de Souza, Rodrigo Marçal Gandia, Bruna Habib Cavazza, André Grutzmann, and Isabelle Nicolai</i>	
Towards a Process Based Approach to Address Investment Inefficiencies in Digitalization	64
<i>Domonkos Gaspar and Katalin Ternai</i>	
Event-Centric Microservices for E-states	78
<i>Dimitrios Tourgaidis and Alexandros Karakasidis</i>	

E-Government Cases - Data and Knowledge Management

Data Acquisition for Integrated Coastal Zone Management and Planning in a Climate Change Perspective	91
<i>Lone S. Hendriksen, Henning Sten Hansen, and Lars Stenseng</i>	
Enabling Collaboration Among Cultural Heritage Experts and Maritime Spatial Planners	106
<i>Lise Schröder, Marina Georgati, and Henning Sten Hansen</i>	
Exploring Usability and Acceptance Factors of m-Government Systems for Elderly	121
<i>Tamás Molnár and Andrea Kő</i>	

Towards Evidence-Based, Data-Driven Thinking in Higher Education 135
Ágnes Meleg and Réka Vas

Identity Management and Legal Issues

Authentication of Electronic Legal Statements by a Trust Service Provider
Using Two-Factor Dynamic Handwritten Signature Verification 147
Péter József Kiss and Gábor Klimkó

Analyzing eID Public Acceptance and User Preferences for Current
Authentication Options in Estonia 159
Valentina Tsap, Silvia Lips, and Dirk Draheim

Political Parties and Internet Voting System Adoption in Ghana 174
Samuel Agbesi

Artificial Intelligence and Machine Learning in e-Government Context

A Process Model for Generating and Evaluating Ideas: The Use of Machine
Learning and Visual Analytics to Support Idea Mining 189
Workneh Y. Ayele and Gustaf Juell-Skielse

Machine Learning or Expert Systems that Is the Question, Which Is to Be
Used by a Public Administration. 204
Iván Futó

Modelling GDPR-Compliant Explanations for Trustworthy AI 219
Francesco Sovrano, Fabio Vitali, and Monica Palmirani
