## **Editor-in-Chief**

Sandro Gaycken, Digital Society Institute, European School of Management and Technology (ESMT), Stuttgart, Baden-Württemberg, Germany

## **Series Editors**

Sylvia Kierkegaard, International Association of IT Lawyers, Highfield, Southampton, UK

John Mallery, Computer Science and Artificial Intelligence, Massachusetts Institute of Technology, Cambridge, MA, USA

Steven J. Murdoch, University College London, London, UK

Kenneth Geers, Taras Shevchenko University, Kyiv, Kiev's'ka, Ukraine

Michael Kasper, Department of Cyber-Physical Systems Security, Fraunhofer Institute SIT, Darmstadt, Hessen, Germany

Cybersecurity is a difficult and complex field. The technical, political and legal questions surrounding it are complicated, often stretching a spectrum of diverse technologies, varying legal bodies, different political ideas and responsibilities. Cybersecurity is intrinsically interdisciplinary, and most activities in one field immediately affect the others. Technologies and techniques, strategies and tactics, motives and ideologies, rules and laws, institutions and industries, power and money – all of these topics have a role to play in cybersecurity, and all of these are tightly interwoven.

The *SpringerBriefs in Cybersecurity* series is comprised of two types of briefs: topic- and country-specific briefs. Topic-specific briefs strive to provide a comprehensive coverage of the whole range of topics surrounding cybersecurity, combining whenever possible legal, ethical, social, political and technical issues. Authors with diverse backgrounds explain their motivation, their mindset, and their approach to the topic, to illuminate its theoretical foundations, the practical nuts and bolts and its past, present and future. Country-specific briefs cover national perceptions and strategies, with officials and national authorities explaining the background, the leading thoughts and interests behind the official statements, to foster a more informed international dialogue.
