

# **Studies in Computational Intelligence**

Volume 969

## **Series Editor**

Janusz Kacprzyk, Polish Academy of Sciences, Warsaw, Poland

The series “Studies in Computational Intelligence” (SCI) publishes new developments and advances in the various areas of computational intelligence—quickly and with a high quality. The intent is to cover the theory, applications, and design methods of computational intelligence, as embedded in the fields of engineering, computer science, physics and life sciences, as well as the methodologies behind them. The series contains monographs, lecture notes and edited volumes in computational intelligence spanning the areas of neural networks, connectionist systems, genetic algorithms, evolutionary computation, artificial intelligence, cellular automata, self-organizing systems, soft computing, fuzzy systems, and hybrid intelligent systems. Of particular value to both the contributors and the readership are the short publication timeframe and the world-wide distribution, which enable both wide and rapid dissemination of research output.

Indexed by SCOPUS, DBLP, WTI Frankfurt eG, zbMATH, SCImago.

All books published in the series are submitted for consideration in Web of Science.

# Acknowledgments

The development of *Writing Futures* was never a solitary experience. We were lucky enough to be surrounded (virtually and physically) by colleagues, students, family, and friends who constantly inspired us over the seasons it took to create it.

We are grateful for the work of Sharon Caldwell, whose expertise, creativity, and steadfast attention to detail helped us build our archived collection and integrate it with book chapters in truly skillful ways. We owe our gracious thanks to Molly M. Kessler, Lee-Ann Kastman Breuch, and Laura Gurak, who each selflessly helped in very important ways. We thank James Harbeck, with his insightful and fastidious copyedit. Our Springer editors and production team, Thomas Ditzinger, Gowrishankar Ayyasamy, and Sylvia Schneider, were immensely helpful while we wrote and prepared the manuscript. We thank our blind reviewers for their time, energy, and direction on the book. Developer Seth Kaufman from Whirl-i-Gig Inc. made some cliffhanger deadlines for much-needed changes to the Fabric database in light of the book's design.

We are honored for the collaboration of the Intertext authors, Heidi A. McKee and James E. Porter, Jennifer Keating and Illah Nourbakhsh, and Scott Sundvall, who probed and provoked the book's themes in myriad novel ways. It is stronger with their voices.

We extend our thanks to our academic collaborators and friends, whose wisdom, camaraderie, and scholarship exhilarated us, including Jason Tham, Daniel Hocutt, Andrew Iliadis, Tom Everrett, Peter Turk, Tanner Mirrlees, Jayden Cooper, and Jack Adam Narine. We acknowledge the important role of our students: Ann Hill Duin's graduate class at the University of Minnesota, scholars Mikayla Davis, Sean Golden, Brian Le Lay, Shane Rose, and Rira Zamani, willing to share opinions, raise debates, and question the future landscape of writing studies through their distinct scholarly lenses. The students of Isabel Pedersen's computer science graduate course at Ontario Tech University, *Global AI Ethics* brought their own insights to bear on many debated topics surrounding the emergence of AI during the writing of the book. Another group that influenced our thinking and writing was the *Building Digital Literacy* team, including graduate students Katlynn Davis, Saveena (Chakrika) Veeramoothoo, and Danielle Stambler; scholars and professors Jason Tham, Daniel Hocutt, Jessica Campbell, Stephen Fonash, Laura Gonzales, John Misak, and Nupoor

Ranade, who integrated *Fabric of Digital Life* in coursework over three phases of an eighteen-month study. These engaging scholars from diverse backgrounds (composition, rhetoric, technical communication, education) met regularly, shared instructional materials, and wrote research papers together. We are glad to have collaborated in this ongoing dialog over the concept of digital literacy.

We thank all the futurists who inspire us daily, and we both marvel and shudder at the speed with which their predictions become reality in collaborative, algorithmic, and autonomous writing futures.

We thank our families for allowing us the time and space to muse over writing futures and to aspire to create a framework for preparing for writing futures in advance of major technological transformations. We thank each other for a truly remarkable collaborative experience.

Last, we acknowledge that this research was undertaken, in part, thanks to funding from the Canada Research Chairs program and from the US Council for Programs in Technical and Scientific Communication.

# Contents

<b>1</b>	<b><i>Writing Futures Framework</i></b>	<b>1</b>
1.1	Introduction	1
1.2	Integration with <u>Fabric of Digital Life</u>	2
1.3	Tracing the Future of Writing	5
1.4	Past Studies, Future Speculation	10
1.5	The <i>Writing Futures</i> Framework	13
1.6	Overview of Chapters	15
	References	20
	Intertext—The Future of Writing and Rhetoric: Pitch by Pitch by Scott Sundvall, The University of Memphis	23
<b>2</b>	<b>Collaborative Writing Futures</b>	<b>27</b>
2.1	How Will Writers Collaborate?	27
2.1.1	Foundational Scholarship on Collaboration	29
2.1.2	Socio-technological Construction of Knowledge	30
2.1.3	Collaborative Workspaces	35
2.2	What Digital Literacies Will Writers Need to Enable Constructive, Collaborative Work with Nonhuman Agents?	37
2.3	What Civic Challenges Demand Collaborative, Constructive Social Action Through and with Nonhuman Agents?	41
	References	43
	Intertext—Writing Machines and Rhetoric by Heidi McKee and James Porter, Miami University	47
<b>3</b>	<b>Algorithmic Writing Futures</b>	<b>53</b>
3.1	How Will Algorithms and AI Inform Writing?	53
3.1.1	Understanding Algorithms	54
3.1.2	Platform Studies	57
3.1.3	Demographics	59
3.1.4	Algorithmic AI	60
3.2	What AI Literacies Should We Cultivate for Algorithmic Writing Futures?	62

3.2.1	Learning Analytics and Learning Management Systems .....	64
3.3	How Might AI Help to Recognize, Ameliorate, and Address Global Civic Challenges? .....	71
3.3.1	Writing for Ethically Aligned Design, Moving from Principles to Practice .....	73
	References .....	76
	Intertext—Recoding Relationships by Jennifer Keating, University of Pittsburgh, and Illah Reza Nourbakhsh, Carnegie Mellon University .....	81
<b>4</b>	<b>Autonomous Writing Futures .....</b>	<b>85</b>
4.1	How Will Writers Work with Autonomous Agents? .....	85
4.1.1	The Rise of Virtual Assistants .....	86
4.1.2	AI Writing .....	91
4.1.3	Creative AI .....	96
4.2	How Will Literacy Practices Change with Use of Autonomous Agents? .....	98
4.3	What Affordances of Autonomous Agents Lend Themselves to More Ethical, Personal, Professional, Global, and Pedagogical Deployments? .....	100
4.3.1	Fairness and Non-discrimination .....	101
4.3.2	AI Explainability and Transparency .....	102
	References .....	103
<b>5</b>	<b>Writing Futures: Investigations .....</b>	<b>109</b>
5.1	Imagining the Future .....	109
5.1.1	Trust and Technological Leadership .....	112
5.2	Methods/Methodologies/Approaches for Investigating and Planning for Writing Futures .....	116
5.3	Academic, Industry, and Civic Investigations .....	123
5.3.1	Academic Realm .....	124
5.3.2	Industry Realm .....	127
5.3.3	Civic Realm .....	130
5.4	Imagining Writing Futures .....	134
	References .....	136
<b>Appendix A: Course Syllabus for a Graduate-Level Course, Writing Futures—Collaborative, Algorithmic, Autonomous .....</b>		<b>141</b>
<b>Appendix B: Complete List of General Keywords in Writing Futures Collection with Counts .....</b>		<b>155</b>

## About the Authors

**Dr. Ann Hill Duin** is Professor of Writing Studies and Graduate-Professional Distinguished Teaching Professor at the University of Minnesota where her research and teaching focus on the impact of emerging technologies on digital literacy, analytics, collaboration, and writing futures. She is a founding member of the Emerging Technologies Research Collaboratory at the University of Minnesota. She served 15 years in higher education administrative roles including Vice Provost and Associate Vice President for Information Technology. Her recent scholarship appears in *Computers and Composition*, *Communication Design Quarterly*, *IEEE Transactions on Professional Communication*, *Technical Communication Quarterly*, *Planning in Higher Education*, *Rhetoric and Professional Communication* and *Globalization*, *International Journal of Sociotechnology Knowledge Development*, and *Connexions: International Professional Communication*. Her international collaboration includes research cluster leadership in the Digital Life Institute at Ontario Tech University and ongoing mentorship of global virtual teams as part of Trans-Atlantic Pacific Partnership initiatives.

**Dr. Isabel Pedersen** is Professor of Communication Studies and Canada Research Chair in Digital Life, Media, and Culture at Ontario Tech University in the Faculty of Social Science and Humanities. She is the Founder and Director of the Digital Life Institute, which hosts international research partnerships. Her research concentrates on how societal transformation to very personal, embodied technology is affecting life, meaning-making, ethics, policy, politics, culture, and the arts. She teaches in the graduate program in Computer Science. She is also an Associate of the Joint Graduate Program in Communication and Culture at Ryerson University and York University. She is Co-editor of *Embodied Computing: Wearables, Implantables, Embeddables, Ingestibles* (Pedersen and Iliadis 2020, MIT Press). She is published in academic journals including the *Journal of Information, Communication and Ethics in Society*, *International Journal of Cultural Studies*, and the *Journal on Computing and Cultural Heritage*.
