Foreword

Human-Computer Interaction (HCI) is acquiring an ever-increasing scientific and industrial importance, and having more impact on people's everyday life, as an ever-growing number of human activities are progressively moving from the physical to the digital world. This process, which has been ongoing for some time now, has been dramatically accelerated by the COVID-19 pandemic. The HCI International (HCII) conference series, held yearly, aims to respond to the compelling need to advance the exchange of knowledge and research and development efforts on the human aspects of design and use of computing systems.

The 23rd International Conference on Human-Computer Interaction, HCI International 2021 (HCII 2021), was planned to be held at the Washington Hilton Hotel, Washington DC, USA, during July 24–29, 2021. Due to the COVID-19 pandemic and with everyone's health and safety in mind, HCII 2021 was organized and run as a virtual conference. It incorporated the 21 thematic areas and affiliated conferences listed on the following page.

A total of 5222 individuals from academia, research institutes, industry, and governmental agencies from 81 countries submitted contributions, and 1276 papers and 241 posters were included in the proceedings to appear just before the start of the conference. The contributions thoroughly cover the entire field of HCI, addressing major advances in knowledge and effective use of computers in a variety of application areas. These papers provide academics, researchers, engineers, scientists, practitioners, and students with state-of-the-art information on the most recent advances in HCI. The volumes constituting the set of proceedings to appear before the start of the conference are listed in the following pages.

The HCI International (HCII) conference also offers the option of 'Late Breaking Work' which applies both for papers and posters, and the corresponding volume(s) of the proceedings will appear after the conference. Full papers will be included in the 'HCII 2021 - Late Breaking Papers' volumes of the proceedings to be published in the Springer LNCS series, while 'Poster Extended Abstracts' will be included as short research papers in the 'HCII 2021 - Late Breaking Posters' volumes to be published in the Springer CCIS series.

I would also like to thank the Program Board Chairs and the members of the Program Boards of all thematic areas and affiliated conferences for their contribution towards the highest scientific quality and overall success of the HCI International 2021 conference.

This conference would not have been possible without the continuous and unwavering support and advice of Gavriel Salvendy, founder, General Chair Emeritus, and Scientific Advisor. For his outstanding efforts, I would like to express my appreciation to Abbas Moallem, Communications Chair and Editor of HCI International News.

HCI International 2022

The 24th International Conference on Human-Computer Interaction, HCI International 2022, will be held jointly with the affiliated conferences at the Gothia Towers Hotel and Swedish Exhibition & Congress Centre, Gothenburg, Sweden, June 26 – July 1, 2022. It will cover a broad spectrum of themes related to Human-Computer Interaction, including theoretical issues, methods, tools, processes, and case studies in HCI design, as well as novel interaction techniques, interfaces, and applications. The proceedings will be published by Springer. More information will be available on the conference website: <http://2022.hci.international/>:

Interacting and Learning

Learning Interactions: Robotics Supporting the Classroom	3
<i>Giovana Barros, Beatriz Motta, Vitor Teixeira, Alexandre Gravatá, Sérgio Silva Júnior, Leandro de Sá, Marília Amaral, and Leonelo Almeida</i>	
Technological Intervention Through the Virtual Assistant Alexa in the Development of Linguistic Skills of a New Language.	11
<i>Omar Córdor-Herrera, Janio Jadán-Guerrero, Pamela Acosta Rodas, and Carlos Ramos-Galarza</i>	
Implementation of Virtual Learning Objects in the Development of Mathematical Skills: A Qualitative Analysis from the Student Experience	17
<i>Omar Córdor-Herrera, Carlos Ramos-Galarza, and Pamela Acosta-Rodas</i>	
A Chatbot that Uses a Multi-agent Organization to Support Collaborative Learning.	31
<i>Mateus da Silveira Colissi, Renata Vieira, Viviana Mascardi, and Rafael H. Bordini</i>	
Reciprocity in Reviewing on Fanfiction.Net	39
<i>Niamh Froelich, Arthur Liu, Ruoxi Shang, Zile Xiao, Travis Neils, Jenna Frens, and Cecilia Aragon</i>	
STEM Excellence and Equity in K-12 Settings: Use of Augmented Reality- Based Educational Experiences to Promote Academic Achievement and Learner Success	45
<i>Patrick Guilbaud, Eric Bubar, and Elizabeth Langran</i>	
Technological Pedagogical and Content Knowledge (TPACK): Higher Education Teachers' Perspectives on the Use of TPACK in Online Academic Writing Classes	51
<i>Doaa Hamam and Ajrina Hysaj</i>	
The New Teacher Assistant: A Review of Chatbots' Use in Higher Education	59
<i>Doaa Hamam</i>	

Collaborative Spatial Problem-Solving Strategies Presented by First Graders by Interacting with Tangible User Interface	64
<i>Jorge Hernán Aristizábal Zapata and Julián Esteban Gutiérrez Posada</i>	
A Study on the Promotion Strategy of the Taichung Learning City Project as the Development Process of the Culture Identity of a City	72
<i>Chi-Sen Hung and Yun-Chi Lee</i>	
The Influence of Different Drawing Tools on the Learning Motivation and Color Cognition of the Fourth Grade Students at the Elementary School	80
<i>I-Chen Lee and Pei-Jung Cheng</i>	
Sharing is Learning: Using Topic Modelling to Understand Online Comments Shared by Learners	91
<i>Kok Khian Lim and Chei Sian Lee</i>	
Intuitive Visualization of Complex Diagnostic Datasets to Improve Teachers' Individual Support of Learners Based on Data Driven Decision Making.	102
