Preface

Welcome to the proceedings of the twentieth China National Conference on Computational Linguistics. The conference and symposium were hosted and co-organized by Inner Mongolia University, China.

CCL is an annual conference (bi-annual before 2013) that started in 1991. It is the flagship conference of the Chinese Information Processing Society of China (CIPS), which is the largest NLP scholar and expert community in China. CCL is a premier nationwide forum for disseminating new scholarly and technological work in computational linguistics, with a major emphasis on computer processing of the languages in China such as Mandarin, Tibetan, Mongolian, and Uyghur.

The Program Committee selected 108 papers (77 Chinese papers and 31 English papers) out of 303 submissions for publication. The acceptance rate was 35.64%. The 31 English papers cover the following topics:

- Machine Translation and Multilingual Information Processing (2)
- Minority Language Information Processing (2)
- Social Computing and Sentiment Analysis (2)
- Text Generation and Summarization (3)
- Information Retrieval, Dialogue, and Question Answering (6)
- Linguistics and Cognitive Science (1)
- Language Resource and Evaluation (3)
- Knowledge Graph and Information Extraction (6)
- NLP Applications (6)

The final program for CCL 2021 was the result of intense work by many dedicated colleagues. We want to thank, first of all, the authors who submitted their papers, contributing to the creation of the high-quality program. We are deeply indebted to all the Program Committee members for providing high-quality and insightful reviews under a tight schedule, and we are extremely grateful to the sponsors of the conference. Finally, we extend a special word of thanks to all the colleagues of the Organizing Committee and secretariat for their hard work in organizing the conference, and to Springer for their assistance in publishing the proceedings in due time.

We thank the Program and Organizing Committees for helping to make the conference successful, and we hope all the participants enjoyed the first online CCL conference.
