Foreword

Our warmest welcome to the proceedings of ICDAR 2021, the 16th IAPR International Conference on Document Analysis and Recognition, which was held in Switzerland for the first time. Organizing an international conference of significant size during the COVID-19 pandemic, with the goal of welcoming at least some of the participants physically, is similar to navigating a rowboat across the ocean during a storm. Fortunately, we were able to work together with partners who have shown a tremendous amount of flexibility and patience including, in particular, our local partners, namely the Beaulieu convention center in Lausanne, EPFL, and Lausanne Tourisme, and also the international ICDAR advisory board and IAPR-TC 10/11 leadership teams who have supported us not only with excellent advice but also financially, encouraging us to setup a hybrid format for the conference.

We were not a hundred percent sure if we would see each other in Lausanne but we remained confident, together with almost half of the attendees who registered for on-site participation. We relied on the hybridization support of a motivated team from the Lule University of Technology during the pre-conference, and professional support from Imavox during the main conference, to ensure a smooth connection between the physical and the virtual world. Indeed, our welcome is extended especially to all our colleagues who were not able to travel to Switzerland this year. We hope you had an exciting virtual conference week, and look forward to seeing you in person again at another event of the active DAR community.

With ICDAR 2021, we stepped into the shoes of a longstanding conference series, which is the premier international event for scientists and practitioners involved in document analysis and recognition, a field of growing importance in the current age of digital transitions. The conference is endorsed by IAPR-TC 10/11 and celebrates its 30th anniversary this year with the 16th edition. The very first ICDAR conference was held in St. Malo, France in 1991, followed by Tsukuba, Japan (1993), Montreal, Canada (1995), Ulm, Germany (1997), Bangalore, India (1999), Seattle, USA (2001), Edinburgh, UK (2003), Seoul, South Korea (2005), Curitiba, Brazil (2007), Barcelona, Spain (2009), Beijing, China (2011), Washington DC, USA (2013), Nancy, France (2015), Kyoto, Japan (2017), and Sydney, Australia in 2019.

The attentive reader may have remarked that this list of cities includes several venues for the Olympic Games. This year the conference was hosted in Lausanne, which is the headquarters of the International Olympic Committee. Not unlike the athletes who were recently competing in Tokyo, Japan, the researchers profited from a healthy spirit of competition, aimed at advancing our knowledge on how a machine can understand written communication. Indeed, following the tradition from previous years, 13 scientific competitions were held in conjunction with ICDAR 2021 including, for the first time, three so-called “long-term” competitions, addressing wider challenges that may continue over the next few years.

Other highlights of the conference included the keynote talks given by Masaki Nakagawa, recipient of the IAPR/ICDAR Outstanding Achievements Award, and Mickaël Coustaty, recipient of the IAPR/ICDAR Young Investigator Award, as well as our distinguished keynote speakers Prem Natarajan, vice president at Amazon, who gave a talk on “OCR: A Journey through Advances in the Science, Engineering, and Productization of AI/ML”, and Beta Megyesi, professor of computational linguistics at Uppsala University, who elaborated on “Cracking Ciphers with ‘AI-in-the-loop’: Transcription and Decryption in a Cross-Disciplinary Field”.

A total of 340 publications were submitted to the main conference, which was held at the Beaulieu convention center during September 8–10, 2021. Based on the reviews, our Program Committee chairs accepted 40 papers for oral presentation and 142 papers for poster presentation. In addition, nine articles accepted for the ICDAR-IJDAR journal track were presented orally at the conference and a workshop was integrated in a poster session. Furthermore, 12 workshops, 2 tutorials, and the doctoral consortium were held during the pre-conference at EPFL during September 5–7, 2021, focusing on specific aspects of document analysis and recognition, such as graphics recognition, camera-based document analysis, and historical documents.

The conference would not have been possible without hundreds of hours of work done by volunteers in the organizing committee. First of all we would like to express our deepest gratitude to our Program Committee chairs, Joseph Lladós, Dan Lopresti, and Seiichi Uchida, who oversaw a comprehensive reviewing process and designed the intriguing technical program of the main conference. We are also very grateful for all the hours invested by the members of the Program Committee to deliver high-quality peer reviews. Furthermore, we would like to highlight the excellent contribution by our publication chairs, Liangrui Peng, Fouad Slimane, and Oussama Zayene, who negotiated a great online visibility of the conference proceedings with Springer and ensured flawless camera-ready versions of all publications. Many thanks also to our chairs and organizers of the workshops, competitions, tutorials, and the doctoral consortium for setting up such an inspiring environment around the main conference. Finally, we are thankful for the support we have received from the sponsorship chairs, from our valued sponsors, and from our local organization chairs, which together enabled us to put in the extra effort required for a hybrid conference setup.

Our main motivation for organizing ICDAR 2021 was to give practitioners in the DAR community a chance to showcase their research, both at this conference and its satellite events. Thank you to all the authors for submitting and presenting your outstanding work. We sincerely hope that you enjoyed the conference and the exchange with your colleagues, be it on-site or online.

September 2021

Andreas Fischer
Rolf Ingold
Marcus Liwicki

Preface

Our heartiest welcome to the proceedings of the ICDAR 2021 Workshops, which were organized under the 16th International Conference on Document Analysis and Recognition (ICDAR) held in Lausanne, Switzerland during September 5–10, 2021.

We are delighted that this conference was able to include 13 workshops. The workshops were held in Lausanne during September 5–7, 2021. Some were held in a hybrid live/online format and others were held entirely online, with space at the main conference for in-person participants to attend. The workshops received over 100 papers on diverse document analysis topics, and these volumes collect the edited papers from 12 of the workshops.

We sincerely thank the ICDAR general chairs for trusting us with the responsibility for the workshops, and for assisting us with the complicated logistics in order to include remote participants. We also want to thank the workshop organizers for their involvement in this event of primary importance in our field. Finally, we thank the workshop presenters and authors without whom the workshops would not exist.

Organization

Organizing Committee

General Chairs

Andreas Fischer	University of Applied Sciences and Arts Western Switzerland
Rolf Ingold	University of Fribourg, Switzerland
Marcus Liwicki	Luleå University of Technology, Sweden

Program Committee Chairs

Josep Lladós	Computer Vision Center, Spain
Daniel Lopresti	Lehigh University, USA
Seiichi Uchida	Kyushu University, Japan

Workshop Chairs

Elisa H. Barney Smith	Boise State University, USA
Umapada Pal	Indian Statistical Institute, India

Competition Chairs

Harold Mouchère	University of Nantes, France
Foteini Simistira	Luleå University of Technology, Sweden

Tutorial Chairs

Véronique Eglin	Institut National des Sciences Appliquées, France
Alicia Fornés	Computer Vision Center, Spain

Doctoral Consortium Chairs

Jean-Christophe Burie	La Rochelle University, France
Nibal Nayef	MyScript, France

Publication Chairs

Liangrui Peng	Tsinghua University, China
Fouad Slimane	University of Fribourg, Switzerland
Oussama Zayene	University of Applied Sciences and Arts Western Switzerland, Switzerland

Sponsorship Chairs

David Doermann	University at Buffalo, USA
Koichi Kise	Osaka Prefecture University, Japan
Jean-Marc Ogier	University of La Rochelle, France

Local Organization Chairs

Jean Hennebert	University of Applied Sciences and Arts Western Switzerland, Switzerland
Anna Scius-Bertrand	University of Applied Sciences and Arts Western Switzerland, Switzerland
Sabine Süssstrunk	École Polytechnique Fédérale de Lausanne, Switzerland

Industrial Liaison

Aurélie Lemaitre	University of Rennes, France
------------------	------------------------------

Social Media Manager

Linda Studer	University of Fribourg, Switzerland
--------------	-------------------------------------

Workshops Organizers

W01-Graphics Recognition (GREC)

Jean-Christophe Burie	La Rochelle University, France
Richard Zanibbi	Rochester Institute of Technology, USA
Motoi Iwata	Osaka Prefecture University, Japan
Pau Riba	Universitat Autnoma de Barcelona, Spain

W02-Camera-based Document Analysis and Recognition (CBDAR)

Sheraz Ahmed	DFKI, Kaiserslautern, Germany
Muhammad Muzzamil	La Rochelle University, France
Luqman	

W03-Arabic and Derived Script Analysis and Recognition (ASAR)

Adel M. Alimi	University of Sfax, Tunisia
Bidyut Baran Chaudhur	Indian Statistical Institute, Kolkata, India
Fadoua Drira	University of Sfax, Tunisia
Tarek M. Hamdani	University of Monastir, Tunisia
Amir Hussain	Edinburgh Napier University, UK
Imran Razzak	Deakin University, Australia

W04-Computational Document Forensics (IWCDF)

Nicolas Sidère	La Rochelle University, France
Imran Ahmed Siddiqi	Bahria University, Pakistan
Jean-Marc Ogier	La Rochelle University, France
Chawki Djeddi	Larbi Tebessi University, Algeria
Haikal El Abed	Technische Universitaet Braunschweig, Germany
Xunfeng Lin	Deakin University, Australia

W05-Machine Learning (WML)

Umapada Pal	Indian Statistical Institute, Kolkata, India
Yi Yang	University of Technology Sydney, Australia
Xiao-Jun Wu	Jiangnan University, China
Faisal Shafait	National University of Sciences and Technology, Pakistan
Jianwen Jin	South China University of Technology, China
Miguel A. Ferrer	University of Las Palmas de Gran Canaria, Spain

W06-Open Services and Tools for Document Analysis (OST)

Fouad Slimane	University of Fribourg, Switzerland
Oussama Zayene	University of Applied Sciences and Arts Western Switzerland, Switzerland
Lars Vögtlin	University of Fribourg, Switzerland
Paul Märgner	University of Fribourg, Switzerland
Ridha Ejbal	National School of Engineers Gabes, Tunisia

W07-Industrial Applications of Document Analysis and Recognition (WIADAR)

Elisa H. Barney Smith	Boise State University, USA
Vincent Poulain d'Andecy	Yooz, France
Hiroshi Tanaka	Fujitsu, Japan

W08-Computational Paleography (IWCP)

Isabelle Marthot-Santaniello	University of Basel, Switzerland
Hussein Mohammed	University of Hamburg, Germany

W09-Document Images and Language (DIL)

Andreas Dengel	DFKI and University of Kaiserslautern, Germany
Cheng-Lin Liu	Institute of Automation of Chinese Academy of Sciences, China
David Doermann	University of Buffalo, USA
Errui Ding	Baidu Inc., China
Hua Wu	Baidu Inc., China
Jingtuo Liu	Baidu Inc., China

W10-Graph Representation Learning for Scanned Document Analysis (GLESDO)

Rim Hantach	Engie, France
Rafika Boutalbi	Trinov, France, and University of Stuttgart, Germany
Philippe Calvez	Engie, France
Balsam Ajib	Trinov, France
Thibault Defourneau	Trinov, France

Contents – Part II

ICDAR 2021 Workshop on Machine Learning (WML)

Benchmarking of Shallow Learning and Deep Learning Techniques with Transfer Learning for Neurodegenerative Disease Assessment Through Handwriting	7
<i>Vincenzo Dentamaro, Paolo Giglio, Donato Impedovo, and Giuseppe Pirlo</i>	
Robust End-to-End Offline Chinese Handwriting Text Page Spotter with Text Kernel.	21
<i>Zhihao Wang, Yanwei Yu, Yibo Wang, Haixu Long, and Fazheng Wang</i>	
Data Augmentation vs. PyraD-DCNN: A Fast, Light, and Shift Invariant FCNN for Text Recognition	36
<i>Ahmad-Montaser Awal, Timothée Neithoffer, and Nabil Ghanmi</i>	
A Handwritten Text Detection Model Based on Cascade Feature Fusion Network Improved by FCOS	51
<i>Ruiqi Feng, Fujia Zhao, Shanxiong Chen, Shixue Zhang, and Dingwang Wang</i>	
Table Structure Recognition Using CoDec Encoder-Decoder	66
<i>Bhanupriya Pegu, Maneet Singh, Aakash Agarwal, Aniruddha Mitra, and Karamjit Singh</i>	
Advertisement Extraction Using Deep Learning	81
<i>Boraq Madi, Reem Alaasam, Ahmad Droby, and Jihad El-Sana</i>	
Detection and Localisation of Struck-Out-Strokes in Handwritten Manuscripts	98
<i>Arnab Poddar, Akash Chakraborty, Jayanta Mukhopadhyay, and Prabir Kumar Biswas</i>	
Temporal Classification Constraint for Improving Handwritten Mathematical Expression Recognition	113
<i>Cuong Tuan Nguyen, Hung Tuan Nguyen, Kei Morizumi, and Masaki Nakagawa</i>	
Using Robust Regression to Find Font Usage Trends	126
<i>Kaigen Tsuji, Seiichi Uchida, and Brian Kenji Iwana</i>	

Binarization Strategy Using Multiple Convolutional Autoencoder Network for Old Sundanese Manuscript Images	142
<i>Erick Paulus, Jean-Christophe Burie, and Fons J. Verbeek</i>	
A Connected Component-Based Deep Learning Model for Multi-type Struck-Out Component Classification.	158
<i>Palaiahnakote Shivakumara, Tanmay Jain, Nitish Surana, Umapada Pal, Tong Lu, Michael Blumenstein, and Sukalpa Chanda</i>	
Contextualized Knowledge Base Sense Embeddings in Word Sense Disambiguation	174
<i>Mozhgan Saeidi, Evangelos Milios, and Norbert Zeh</i>	
ICDAR 2021 Workshop on Open Services and Tools for Document Analysis (OST)	
Automatic Generation of Semi-structured Documents.	191
<i>Djedjiga Belhadj, Yolande Belaïd, and Abdel Belaïd</i>	
DocVisor: A Multi-purpose Web-Based Interactive Visualizer for Document Image Analytics	206
<i>Khadiravana Belagavi, Pranav Tadimetri, and Ravi Kiran Sarvadevabhatla</i>	
ICDAR 2021 Workshop on Industrial Applications of Document Analysis and Recognition (WIADAR)	
Object Detection Based Handwriting Localization	225
<i>Yuli Wu, Yucheng Hu, and Suting Miao</i>	
Toward an Incremental Classification Process of Document Stream Using a Cascade of Systems	240
<i>Joris Voerman, Ibrahim Souleiman Mahamoud, Aurélie Joseph, Mickael Coustaty, Vincent Poulain d'Andecy, and Jean-Marc Ogier</i>	
Automating Web GUI Compatibility Testing Using X-BROT: Prototyping and Field Trial.	255
<i>Hiroshi Tanaka</i>	
A Deep Learning Digitisation Framework to Mark up Corrosion Circuits in Piping and Instrumentation Diagrams.	268
<i>Luis Toral, Carlos Francisco Moreno-García, Eyad Elyan, and Shahram Memon</i>	

Playful Interactive Environment for Learning to Spell at Elementary School.	277
<i>Sofiane Medjram, Véronique Eglin, Stephane Bres, Adrien Piffaretti, and Jobert Timothée</i>	

ICDAR 2021 Workshop on Computational Paleography (IWCP)

A Computational Approach of Armenian Paleography	295
<i>Chahan Vidal-Gorène and Aliénor Decours-Perez</i>	
Handling Heavily Abbreviated Manuscripts: HTR Engines vs Text Normalisation Approaches	306
<i>Jean-Baptiste Camps, Chahan Vidal-Gorène, and Marguerite Vernet</i>	
Exploiting Insertion Symbols for Marginal Additions in the Recognition Process to Establish Reading Order	317
<i>Daniel Stökl Ben Ezra, Bronson Brown-DeVost, and Pawel Jablonski</i>	
Neural Representation Learning for Scribal Hands of Linear B	325
<i>Nikita Srivatsan, Jason Vega, Christina Skelton, and Taylor Berg-Kirkpatrick</i>	
READ for Solving Manuscript Riddles: A Preliminary Study of the Manuscripts of the 3rd <i>ṣaṭka</i> of the <i>Jayadrathayāmala</i>	339
<i>Olga Serbaeva and Stephen White</i>	

ICDAR 2021 Workshop on Document Images and Language (DIL)

A Span Extraction Approach for Information Extraction on Visually-Rich Documents	353
<i>Tuan-Anh D. Nguyen, Hieu M. Vu, Nguyen Hong Son, and Minh-Tien Nguyen</i>	
Recurrent Neural Network Transducer for Japanese and Chinese Offline Handwritten Text Recognition	364
<i>Trung Tan Ngo, Hung Tuan Nguyen, Nam Tuan Ly, and Masaki Nakagawa</i>	
MTL-FoUn: A Multi-Task Learning Approach to Form Understanding	377
<i>Nishant Prabhu, Hiteshi Jain, and Abhishek Tripathi</i>	
VisualWordGrid: Information Extraction from Scanned Documents Using a Multimodal Approach	389
<i>Mohamed Kerroumi, Othmane Sayem, and Aymen Shabou</i>	

A Transformer-Based Math Language Model for Handwritten Math Expression Recognition	403
<i>Huy Quang Ung, Cuong Tuan Nguyen, Hung Tuan Nguyen, Thanh-Nghia Truong, and Masaki Nakagawa</i>	
Exploring Out-of-Distribution Generalization in Text Classifiers Trained on Tobacco-3482 and RVL-CDIP	416
<i>Stefan Larson, Navtej Singh, Saarthak Maheshwari, Shanti Stewart, and Uma Krishnaswamy</i>	
Labeling Document Images for E-Commerce Products with Tree-Based Segment Re-organizing and Hierarchical Transformer	424
<i>Peng Li, Pingguang Yuan, Yong Li, Yongjun Bao, and Weipeng Yan</i>	
Multi-task Learning for Newspaper Image Segmentation and Baseline Detection Using Attention-Based U-Net Architecture	440
<i>Anukriti Bansal, Prerana Mukherjee, Divyansh Joshi, Devashish Tripathi, and Arun Pratap Singh</i>	
Data-Efficient Information Extraction from Documents with Pre-trained Language Models	455
<i>Clément Sage, Thibault Douzon, Alex Aussem, Véronique Eglin, Haytham Elghazel, Stefan Duffner, Christophe Garcia, and Jérémy Espinas</i>	
ICDAR 2021 Workshop on Graph Representation Learning for Scanned Document Analysis (GLESDO)	
Representing Standard Text Formulations as Directed Graphs	475
<i>Frieda Josi, Christian Wartena, and Ulrich Heid</i>	
Multivalent Graph Matching for Symbol Recognition	488
<i>D. K. Ho, J. Y. Ramel, and N. Monmarché</i>	
Key Information Recognition from Piping and Instrumentation Diagrams: Where We Are?	504
