Preface

The 8th International Workshop on Ophthalmic Medical Image Analysis (OMIA 2021) was held on September 27th, 2021, in conjunction with the 24th International Conference on Medical Image Computing and Computer Assisted Intervention (MICCAI 2021). Due to the breakout of COVID-19, this year was once again a fully virtual conference.

Age-related macular degeneration, diabetic retinopathy, and glaucoma are the main causes of blindness in both developed and developing countries. The cost of blindness to society and individuals is huge, and many cases can be avoided by early intervention. Early and reliable diagnosis strategies and effective treatments are therefore a world priority. At the same time, there is mounting research on the retinal vasculature and neuro-retinal architecture as a source of biomarkers for several high-prevalence conditions like dementia, cardiovascular disease, and of course complications of diabetes. Automatic and semi-automatic software tools for retinal image analysis are being used widely in retinal biomarkers research, and increasingly percolating into clinical practice. Significant challenges remain in terms of reliability and validation, number and type of conditions considered, multi-modal analysis (e.g., fundus, optical coherence tomography, scanning laser ophthalmoscopy), novel imaging technologies, and the effective transfer of advanced computer vision and machine learning technologies, to mention a few. The workshop addressed all these aspects and more, in the ideal interdisciplinary context of MICCAI.

This workshop aimed to bring together scientists, clinicians, and students from multiple disciplines in the growing ophthalmic image analysis community, such as electronic engineering, computer science, mathematics, and medicine, to discuss the latest advancements in the field. A total of 31 full-length papers were submitted to the workshop in response to the call for papers. All submissions were double-blind peer-reviewed by at least three members of the Program Committee. Paper selection was based on methodological innovation, technical merit, results, validation, and application potential. Finally, 20 papers were accepted to the workshop and chosen to be included in this Springer LNCS volume.

We are grateful to the Program Committee for reviewing the submitted papers and giving constructive comments and critiques, to the authors for submitting high-quality papers, to the presenters for excellent presentations, and to all the OMIA 2021 attendees from all around the world.

Contents

Adjacent Scale Fusion and Corneal Position Embedding for Corneal Ulcer Segmentation	1
Zhonghua Wang, Junyan Lyu, Wenhao Luo, and Xiaoying Tang	1
Longitudinal Detection of Diabetic Retinopathy Early Severity Grade Changes Using Deep Learning	11
Intra-operative OCT (iOCT) Image Quality Enhancement: A Super-Resolution Approach Using High Quality iOCT 3D Scans Charalampos Komninos, Theodoros Pissas, Blanca Flores, Edward Bloch, Tom Vercauteren, Sébastien Ourselin, Lyndon Da Cruz, and Christos Bergeles	21
Diabetic Retinopathy Detection Based on Weakly Supervised Object Localization and Knowledge Driven Attribute Mining Xinliang Wang, Yunchao Gu, Junjun Pan, and Liyun Jia	32
FARGO: A Joint Framework for FAZ and RV Segmentation from OCTA Images Linkai Peng, Li Lin, Pujin Cheng, Zhonghua Wang, and Xiaoying Tang	42
CDLRS: Collaborative Deep Learning Model with Joint Regression and Segmentation for Automatic Fovea Localization Ziyang Chen, Yongsheng Pan, and Yong Xia	52
U-Net with Hierarchical Bottleneck Attention for Landmark Detection in Fundus Images of the Degenerated Retina	62
Radial U-Net: Improving DMEK Graft Detachment Segmentation in Radial AS-OCT Scans Bram M. van der Velden, Mitko Veta, Josien. P. W. Pluim, Mark Alberti, and Friso G. Heslinga	72
Guided Adversarial Adaptation Network for Retinal and Choroidal Layer Segmentation Jingyu Zhao, Jiong Zhang, Bin Deng, Yalin Zheng, Jiang Liu, Ran Song, and Yitian Zhao	82

Juvenile Refractive Power Prediction Based on Corneal Curvature and Axial Length via a Domain Knowledge Embedding Network Yang Zhang, Risa Higashita, Yanwu Xu, Daisuke Santo, Yan Hu, Guodong Long, and Jiang Liu	92
Peripapillary Atrophy Segmentation with Boundary Guidance Mengxuan Li, He Zhao, Jie Xu, and Huiqi Li	101
Are Cardiovascular Risk Scores from Genome and Retinal Image Complementary? A Deep Learning Investigation in a Diabetic Cohort Mohammad Ghouse Syed, Alexander Doney, Gittu George, Ify Mordi, and Emanuele Trucco	109
Dual-Branch Attention Network and Atrous Spatial Pyramid Pooling for Diabetic Retinopathy Classification Using Ultra-Widefield Images Zhihui Tian, Haijun Lei, Hai Xie, Xianlu Zeng, Xinyu Zhao, Miaohong Chen, Guoming Zhang, and Baiying Lei	119
Self-adaptive Transfer Learning for Multicenter Glaucoma Classification in Fundus Retina Images Yiming Bao, Jun Wang, Tong Li, Linyan Wang, Jianwei Xu, Juan Ye, and Dahong Qian	129
Multi-modality Images Analysis: A Baseline for Glaucoma Grading via Deep Learning	139
Impact of Data Augmentation on Retinal OCT Image Segmentation for Diabetic Macular Edema Analysis Daniel Bar-David, Laura Bar-David, Shiri Soudry, and Anath Fischer	148
Representation and Reconstruction of Image-Based Structural Patterns of Glaucomatous Defects Using only Two Latent Variables from a Variational Autoencoder	159
Stacking Ensemble Learning in Deep Domain Adaptation for Ophthalmic Image Classification Yeganeh Madadi, Vahid Seydi, Jian Sun, Edward Chaum, and Siamak Yousefi	168
Attention Guided Slit Lamp Image Quality Assessment Mingchao Li, Yerui Chen, Kun Huang, Wen Fang, and Qiang Chen	179

Robust Retinal Vessel Segmentation from a Data Augmentation Perspective Xu Sun, Huihui Fang, Yehui Yang, Dongwei Zhu, Lei Wang, Junwei Liu, and Yanwu Xu	
Correction to: Impact of Data Augmentation on Retinal OCT Image Segmentation for Diabetic Macular Edema Analysis Daniel Bar-David, Laura Bar-David, Shiri Soudry, and Anath Fischer	C 1
