

Studies in Computational Intelligence

Volume 996

Series Editor

Janusz Kacprzyk, Polish Academy of Sciences, Warsaw, Poland

The series “Studies in Computational Intelligence” (SCI) publishes new developments and advances in the various areas of computational intelligence—quickly and with a high quality. The intent is to cover the theory, applications, and design methods of computational intelligence, as embedded in the fields of engineering, computer science, physics and life sciences, as well as the methodologies behind them. The series contains monographs, lecture notes and edited volumes in computational intelligence spanning the areas of neural networks, connectionist systems, genetic algorithms, evolutionary computation, artificial intelligence, cellular automata, self-organizing systems, soft computing, fuzzy systems, and hybrid intelligent systems. Of particular value to both the contributors and the readership are the short publication timeframe and the world-wide distribution, which enable both wide and rapid dissemination of research output.

Indexed by SCOPUS, DBLP, WTI Frankfurt eG, zbMATH, SCImago.

All books published in the series are submitted for consideration in Web of Science.

Contents

1	Introduction	1
1.1	General Remarks	1
1.2	Book Composition	3
2	Face Movement	7
2.1	Introduction	7
2.2	Perception of Emotional Expressions	7
2.3	Neurophysiological Bases of Emotional Expression	
	Recognition	8
2.3.1	Fear	8
2.3.2	Anger and Sadness	9
2.3.3	Disgust	10
2.3.4	Happiness	10
2.3.5	Surprise	10
2.3.6	Summary	11
2.4	Face Movement During Emotional Expression	11
2.5	Facial Expressions in Human–Computer Interaction	12
2.5.1	Video-Based Facial Expression Recognition	12
2.5.2	Applications of Computer-Based Face Movement	
	Recognition	14
2.5.3	Surface Electromyography for Movement	
	Detection	14
2.5.4	Facial Muscle Activity as Signals in HCI	16
2.5.5	Facial Muscle Activity as Emotion Signals	17
	References	17
3	Eye Movement	23
3.1	Movement of the Eyes	23
3.2	What is Eye Tracking?	25
3.3	Use of Eye Movement Research in Human-Computer	
	Interaction	25
3.3.1	Usability Testing	26

3.3.2	Accessibility	26
3.3.3	Psychological Research	26
3.3.4	Gaze-based Interaction	26
3.3.5	Market Research	26
3.3.6	Authentication	27
3.4	Eye Movements and Cognitive Processing	27
3.4.1	Fixations	28
3.4.2	Saccades	28
3.4.3	Changes in the Size of Pupils	28
3.4.4	Gaze Aversion	29
3.4.5	Microsaccades	29
3.5	Cognitive Processing and Digital Reading	30
3.6	Eye Tracking for Human-Computer Interaction	31
3.6.1	Using Eye Movements to Control Interaction	31
3.6.2	A potential Solution to the Midas Touch Problem	32
3.6.3	Error Correction in Head-Mounted Eye Trackers	32
	References	34
4	Hand Movements Using Keyboard and Mouse	39
4.1	Introduction	39
4.2	Keyboard	39
4.2.1	Keyboard Usage Dynamics and Identification	40
4.2.2	Keyboard Usage Dynamics and Emotions	41
4.2.3	The Keyboard for Note Taking	41
4.3	Mouse	44
4.3.1	Mouse Movement and Identification	44
4.3.2	Mouse Movement and Emotions	45
4.3.3	Mouse Movements in Psychological Research	46
4.3.4	Mouse Movement in Survey Research	47
	References	48
5	Leg and Foot Movement	53
5.1	Introduction	53
5.2	Anatomy of the Foot	53
5.3	Foot and Leg Movement from a Psychological Perspective	54
5.4	Leg and Foot Interaction	56
5.4.1	Leg and Foot Interfaces	57
5.5	Conclusions	60
	References	60
6	Whole-Body Movement	63
6.1	Introduction	63
6.2	Recognition of Body Movements	63
6.2.1	Body Movements and Affective Computing	64
6.2.2	Automatic Recognition of Body Movements	65

- 6.2.3 Automatic Recognition Using Motion Capture Systems 65
 - 6.2.4 Automatic Recognition Using Video Data 67
 - 6.3 Practical Application of Body Movement Recognition 68
 - 6.3.1 Interpretation of Sign Language 68
 - 6.3.2 Person Identification 69
 - 6.4 Body Movement as Input for Interactions 69
 - 6.4.1 Remote Operation of Non-humanoid Robots 69
 - 6.4.2 Body-Machine Interfaces 70
 - 6.4.3 Control of Drones Using Body-Machine Interfaces 70
 - 6.4.4 Virtual Mouse 71
 - 6.5 New Paradigms of Body-Movement-Based Interaction 72
 - 6.5.1 Body Menu 72
 - 6.6 Conclusions 72
 - References 72
- 7 Movement in Virtual Reality 75**
 - 7.1 Introduction 75
 - 7.2 Psychological Research in Virtual Reality 76
 - 7.2.1 Emotions are Observable in Movement 77
 - 7.2.2 Machine Learning Can Be Used as a Tool to Analyze Human Motion Data 77
 - 7.2.3 Differences Between Men’s and Women’s Behavior in IVR 78
 - 7.2.4 Personality Traits and Behavior in Immersive Virtual Reality 78
 - 7.2.5 Measuring Brain Activity During Movement in IVR 79
 - 7.2.6 Measuring Visual Attention and Spatial Behavior in Virtual Reality 79
 - 7.2.7 Virtual Reality as a Tool for the Treatment of Disorders 80
 - 7.3 Learning Movements in Virtual Reality 82
 - 7.4 Risks of Virtual Reality 83
 - 7.4.1 Factors that Influence Cybersickness 84
 - References 84
- 8 Movement in the Environment 89**
 - 8.1 Introduction 89
 - 8.2 Recognition of User Movement on a Small-Scale 90
 - 8.2.1 Multi-layer Localization Monitoring in Industrial Setting 90
 - 8.2.2 Recognition of Movement and User Safety 91
 - 8.2.3 Recognition of User Movement and Ecology 91
 - 8.2.4 Shared Mobility and Ecology 92

8.2.5	Other Uses of Human Movement Detection Algorithms	92
8.3	Recognition of User Movement Patterns from the Perspective of Urban Mobility	92
8.3.1	Localization Based on GPS Data	93
8.3.2	Predicting User Movement	93
8.3.3	Combining GPS and External Data	93
8.4	Navigation and Human Behavior	94
8.5	Spatial Crowdsourcing	95
8.5.1	Psychological Factors Influencing Spatial Crowdsourcing	95
8.5.2	Other Crowdsourcing Paradigms Involving Movement	96
8.6	Location Monitoring and Privacy	97
8.6.1	User Perspective on Location Privacy	97
8.6.2	Privacy and Shared Mobility	98
8.6.3	Privacy and Spatial Crowdsourcing	99
8.7	Conclusions	100
	References	100
9	Perception of Movement	103
9.1	Introduction	103
9.1.1	What is Perception?	103
9.2	Perception of Movement	104
9.2.1	Biological Movement Perception	104
9.2.2	The Neural Basis of Perception of Biological Movement	105
9.2.3	Perception of Implied Motion	107
9.2.4	The Mirror Mechanism in Action Perception	108
9.3	Perception of Movement in Human–Computer Interactions	109
9.3.1	Using Movement to Influence Interaction Flow	109
9.3.2	Emotion and the Perception of Affective Qualities of Interface	110
9.3.3	Modelling Attitudes with Perceived Motion	110
9.3.4	Perceived System Performance and User Interface Animations	111
9.3.5	Motion and Intelligibility of Computer Systems	111
9.3.6	Effectiveness of Animation in Research Results Dissemination	112
9.3.7	Perception of Motion of Avatars	112
	References	113
10	Movement, Cognition and Learning	117
10.1	Introduction	117
10.2	Influence of Movement on Cognitive Function	118

10.3	Brain Mechanisms Underlying the Connection Between Physical Activity and Cognition	120
10.4	Using Computers to Promote Physical Activity	121
10.4.1	Physical Activity in Active Video Games	122
10.4.2	Engaging Whole Body Movement	122
10.4.3	Hardware Solutions for Exergames	123
10.4.4	Virtual Reality and Physical Activity Promotion	123
10.4.5	Psychological Effects for VR Exercise	124
10.5	Virtual Reality in Training and Rehabilitation	125
10.5.1	Movement in Virtual Reality in Education	125
10.5.2	Movement in Virtual Reality in Rehabilitation	125
	References	126
11	Future Directions	131
11.1	Introduction	131
11.2	Brain-Computer Interfaces	131
11.2.1	Opportunities for Aging Populations	132
11.2.2	Opportunities for Users Without Special Needs	133
11.3	Voice Interfaces	133
11.3.1	Voice Interfaces and Children	133
11.3.2	Language Communication and Voice Assistants	134
11.3.3	The Anthropomorphization of Voice Assistants	135
11.3.4	Voice Assistants and Ethics	136
11.4	Behavior Research in Psychology	137
11.4.1	Dissociative Disorders	138
11.4.2	Approach-Avoidance Behaviors	138
11.4.3	Negativity Bias	138
11.4.4	Research on Morality	139
11.4.5	Cyber-Sickness	139
11.5	Conclusions	140
