# Preface

This volume of the Springer CCIS series (CCIS 1551) contains the revised accepted papers of SACAIR 2021, the 2nd Southern African Conference for Artificial Intelligence Research<sup>1</sup>.

## Message from the Conference Chairs

Dear authors and readers,

It is with great pleasure that we write this foreword to the proceedings of the second Southern African Conference for Artificial Intelligence Research (SACAIR 2021) held online during December 6–10, 2021<sup>2</sup>. The program included an unconference for students on December 6 (a student-driven event for students to interact with each other as well as with sponsors and other possible employers), a day of tutorials on December 7, and the main conference during December 8–10, 2021.

SACAIR 2021 is the second full international conference focussed on Artificial Intelligence hosted by the Centre for AI Research (CAIR), South Africa. The inaugural CAIR conference, the Forum for AI Research (FAIR 2019) was held in Cape Town, South Africa, in December 2019, and SACAIR 2020 was held in February 2021 after being postponed due to the COVID-19 pandemic.

The Centre for AI Research (CAIR)<sup>3</sup> is a South African distributed research network that was established in 2011 with the aim of building world class Artificial Intelligence research capacity in South Africa. CAIR conducts foundational, directed, and applied research into various aspects of AI through its nine research groups based at six universities (the University of Pretoria, the University of KwaZulu-Natal, the University of Cape Town, Stellenbosch University, the University of the Western Cape, and North-West University). Research groups at CAIR include an Adaptive and Cognitive Systems Lab situated at the University of Cape Town, an AI and Cybersecurity research group at the University of the Western Cape, an AI for Development and Innovation group at the University of Pretoria, two Machine Learning groups focused on deep learning at North-West University and the University of Kwa-Zulu Natal, a Knowledge Abstraction and Representation group at Stellenbosch University, an Ethics of AI research group at the University of Pretoria, a Knowledge Representation and Reasoning group at the University of Cape Town, and a Mathematical and Computational Statistics group focused on applied data science at the University of Pretoria.

The theme for SACAIR 2021 was AI for Science, Technology and Society. AI technologies in their current data-driven form have the potential to transform

---

<sup>2</sup> The original plan was to have a hybrid event in Ballito, South Africa, but due to the emergence of the Omicron COVID-19 variant end of November 2021, and the rapid rise in infections, the event was online only.

<sup>3</sup> <https://www.cair.org.za/>.

our world for the better. However, humans are faced with serious challenges in the context of AI advances in all areas of their lives, as wide apart as employment and labour on the one hand and social companionship on the other. In the context of machine learning applications, these challenges lead to concerns around fairness, structural bias and amplification of existing social stereotypes, privacy, transparency, accountability and responsibility, and trade-offs among all these concerns, especially within the context of security, robustness, and accuracy of AI systems. Furthermore, AI technologies can perform tasks that previously only humans could perform, such as calculating the best treatment for certain illnesses and caring for older persons. In some cases this is a good thing, but in some it challenges human agency and experience, and even political stability, in profound ways. Human notions of morality, of responsibility, and of ethical decision-making are challenged in ways humanity has never before encountered. In addition, children grow up in novel contexts affected by technological manipulation of social narratives and we do not yet know what the impact of this will be. In turn, media and information literacy has become an essential skill, which is just as important as technical skills. Finally, there are also cultural concerns such as the loss of nuances of human languages and expression in the context of NLP, concerns around the ownership of art, and others.

The choice of conference theme was intended to ensure multi-disciplinary contributions that focus both on the technical aspects and the social impact and consequences of AI technologies. In addition, there was a healthy balance between contributions from logic-based AI and those from data-driven AI, as the focus on knowledge representation and reasoning remains an important ingredient of studying and extending human intelligence. In line with the above, it was decided that the conference topics would cover several broad areas of Artificial Intelligence namely Machine Learning, Knowledge Representation and Reasoning, Quantum Artificial Intelligence, Deep Learning, Computer Vision and Image Processing, Philosophy and Ethics of AI, AI in and for Information Systems, and AI in the Humanities and Society. Our keynote speakers were Knut Hinkelmann of FHNW Switzerland, Francesco Petruccione of UKZN, South Africa, and Vincent C. Müller of TU/e, the Netherlands.

We expect this multi- and interdisciplinary conference to grow into the premier AI conference in Southern Africa as it brings together nationally and internationally established and emerging researchers from across various disciplines including Computer Science, Mathematics, Statistics, Informatics, Philosophy, and Law. The conference is also focused on cultivating and establishing a network of talented students working in AI from across Africa.

We sincerely thank the technical program chairs for the hard work on the volume and the editorial duties performed. A thank you to the topic chairs, the local and international panel of reviewers, our keynotes, and the authors and participants for their contributions. Last but not least, our gratitude to the members of the organizing committee, student organizers, and our sponsors without whom this conference would not have been realised.

December 2021

Anban Pillay  
Aurona Gerber

## **Message from the Technical Program Chairs**

Dear readers,

This volume of the SACAIR proceedings contains the revised accepted papers of SACAIR 2021. We are thankful that our second annual Southern African Conference for Artificial Intelligence Research elicited the support it did during this challenging year with all the uncertainties due to the COVID-19 pandemic.

We received just over 100 abstracts, and after submission and a first round of evaluation, 71 papers were sent out for review to our SACAIR Programme Committee. The SACAIR submissions were solicited according to relevant SACAIR topics. The Program Committee comprised 88 members, 28 of whom were from outside Southern Africa. Each paper was reviewed by at least three members of the Program Committee in a rigorous, double-blind process whereby the following criteria were taken into consideration: Relevance to SACAIR, Significance, Technical Quality, Scholarship, and Presentation (which included quality and clarity of writing). For this SACAIR proceedings volume, 22 full research papers were selected for publication in Springer's CCIS series (which translates to an acceptance rate of 31%). The accepted full research papers per topic are as follows: Deep Learning (5), AI in and for Information Systems (3), Knowledge Representation and Reasoning (2), Machine Learning (6), Philosophy and Ethics of AI (3), AI in the Humanities and Society (1), and Computer Vision and Image Processing (2).

Thank you to all the authors and Program Committee members, and congratulations to the authors whose work was accepted for publication in this proceedings. We wish our readers a fruitful reading experience with these proceedings!

December 2021

# Organization

## Local Organizing Committee

Anban Pillay (Co-chair)	University of KwaZulu-Natal, South Africa
Aurona Gerber (Co-chair)	University of Pretoria, South Africa
Edgar Jembere (Technical Program Chair)	University of KwaZulu-Natal, South Africa
Serestina Viriri (Technical Program Chair)	University of KwaZulu-Natal, South Africa
Francesco Petruccione	University of KwaZulu-Natal, South Africa
Sibonelo Dlamini	University of KwaZulu-Natal, South Africa
Yüvika Singh	University of KwaZulu-Natal, South Africa
Emile Engelbrecht	Stellenbosch University, South Africa
Renee le Roux	Mongoose Communications & Design, South Africa

## Program Committee Chairs

### Philosophy and Ethics of AI

Emma Ruttkamp-Bloem	University of Pretoria, South Africa
Vincent Müller	Technical University of Eindhoven, The Netherlands

### AI in and for Information Systems

Sunet Eybers	University of Pretoria, South Africa
Knut Hinkelmann	FHNW University of Applied Sciences and Arts Northwestern Switzerland, Switzerland

### AI in Humanities and Society

Bethel Mutanga	Mangosuthu Univerisity of Technology, South Africa
Dino Carpentras	University of Limerick, Ireland

### Machine Learning

Alta de Waal	University of Pretoria, South Africa
Maria Schulz	Xanadu, South Africa

## Knowledge Representation and Reasoning

Thomas Meyer	University of Cape Town, South Africa
Ivan Varzinczak	Université d'Artois, France

## Quantum Artificial Intelligence

Daniel Kyungdeock Park	Sungkyunkwan University Seoul, South Korea
Ilya Sinayski	University of KwaZulu-Natal, South Africa

## Deep Learning

Deshendran Moodley	University of Cape Town, South Africa
Marelle Davel	North-West University, South Africa

## Computer Vision and Image Processing

Mandla Gwetu	University of KwaZulu-Natal, South Africa
Jules-Raymond Tapamo	University of KwaZulu-Natal, South Africa

## Program Committee

Amira Abbas	University of KwaZulu-Natal, South Africa
Ritesh Ajoodha	University of the Witwatersrand, South Africa
Kehinde Aruleba	Walter Sisulu University, South Africa
Bubacarr Bah	African Institute for Mathematical Sciences (AIMS), South Africa
Etienne Barnard	North-West University, South Africa
Sihem Belabbes	LIASD, Université Paris, France
Sonia Berman	University of Cape Town, South Africa
Jacques Beukes	North-West University, South Africa
Willie Brink	Stellenbosch University, South Africa
Arina Britz	Stellenbosch University, South Africa
Jan Buys	University of Cape Town, South Africa
Joan Byamugisha	IBM Research Africa, South Africa
Dino Carpentras	University of Limerick, Ireland
Giovanni Casini	ISTI-CNR, Italy
Colin Chibaya	Sol Plaatje University, South Africa
Olawande Daramola	Cape Peninsula University of Technology, South Africa
Jérémie Dauphin	University of Luxembourg, Luxembourg
Marelle Davel	North-West University, South Africa
Tanya de Villiers Botha	Stellenbosch University, South Africa
Alta de Waal	University of Pretoria, South Africa
Febe de Wet	Stellenbosch University, South Africa

Tiny Du Toit	North-West University, South Africa
Sunet Eybers	University of Pretoria, South Africa
Inger Fabris-Rotelli	University of Pretoria, South Africa
Sebastian Feld Delft	Delft University of Technology, The Netherlands
Eduardo Fermé	Universidade da Madeira, Portugal
Fred Freitas	Universidade Federal de Pernambuco, Brazil
Anne Gerdes	University of Denmark, Denmark
Mandlenkosi Gwetu	University of KwaZulu-Natal, South Africa
Shohreh Haddadan	University of Luxembourg, Luxembourg
Bertram Haskins	Nelson Mandela University, South Africa
Marie Hattingh	University of Pretoria, South Africa
Knut Hinkelmann	FHNW University of Applied Sciences and Arts Northwestern Switzerland, Switzerland
Omowunmi Isafiade	University of the Western Cape, South Africa
Nobert Jere	Walter Sisulu University, South Africa
Herman Kamper	Stellenbosch University, South Africa
Richard Klein	University of the Witwatersrand, South Africa
Hari Kishan Kondaveeti	VIT-AP University, India
Eduan Kotzé	University of the Free State, South Africa
Jaco Kruger	St Augustine College of South Africa, South Africa
Louise Leenen	University of the Western Cape, South Africa
Guido Löhr	TU Eindhoven, The Netherlands
Patricia Lutu	University of Pretoria, South Africa
Truong-Thanh Ma	CRIL CNRS and University of Artois, France
Zola Mahlaza	University of Cape Town, South Africa
Patrick Marais	University of Cape Town, South Africa
Vukosi Marivate	University of Pretoria, South Africa
Réka Markovich	University of Luxembourg, Luxembourg
Muthoni Masinde	Central University of Technology, South Africa
Jocelyn Mazarura	University of Pretoria, South Africa
Felix McGregor	Saigen, South Africa
Thomas Meyer	University of Cape Town and CAIR, South Africa
Thipe Modipa	University of Limpopo, South Africa
Deshendran Moodley	University of Cape Town, South Africa
Coenraad Mouton	North-West University, South Africa
Vincent C. Müller	Technical University of Eindhoven, The Netherlands/University of Leeds, UK
Murimo Bethel Mutanga	Mangosuthu University of Technology, South Africa
Peeter Mürsepp	Tallinn University, Estonia
Fred Nicolls	University of Cape Town, South Africa

Geoff Nitschke	University of Cape Town, South Africa
Thambo Nyathi	University of Pretoria, South Africa
Ítalo Oliveira	Free University of Bozen-Bolzano, Italy
Daniel Kyungdeock Park	Sungkyunkwan University, South Korea
Laurent Perrussel	IRIT - Université de Toulouse, France
Iliana M. Petrova	Inria, France
Laurette Pretorius	University of South Africa, South Africa
Catherine S. Price	University of KwaZulu-Natal, South Africa
Gavin Rens	Katholieke Universiteit Leuven, Belgium
Helen Robertson	University of the Witwatersrand, South Africa
Cleyton Rodrigues	Universidade Federal de Pernambuco, Brazil
Irene Russo	Istituto di Linguistica Computazionale - CNR, Italy
Emma Rutkamp-Bloem	University of Pretoria, South Africa
Maria Schuld	University of KwaZulu-Natal, South Africa
Giuseppe Sergioli	University of Cagliari, Italy
Jonathan Shock	University of Cape Town, South Africa
Ilya Sinayskiy	NITheP and University of KwaZulu-Natal, South Africa
Riana Steyn	University of Pretoria, South Africa
Umberto Straccia	ISTI-CNR, Italy
Ryan Sweke	University of KwaZulu-Natal, South Africa
Jules-Raymond Tapamo	University of KwaZulu-Natal, South Africa
Tian Theunissen	North-West University, South Africa
Anitta Thomas	UNISA, South Africa
Wiebke Toussaint	Delft University of Technology, The Netherlands
Hossana Twinomurinzi	University of Johannesburg, South Africa
Dustin Van Der Haar	University of Johannesburg, South Africa
Terence Van Zyl	University of Johannesburg, South Africa
Ivan Varzinczak	University of Artois and CNRS, France
Peter-Paul Verbeek	University of Twente, The Netherlands
Philippe Verreault-Julien	Eindhoven University of Technology, The Netherlands
Christopher Wareham	University of the Witwatersrand, South Africa
Bruce Watson	Stellenbosch University, South Africa
Zhihao Wu	UCLA, USA

## SACAIR Sponsors

The sponsors of SACAIR 2021, The Journal of Artificial Intelligence, the Centre for AI Research (CAIR), the National Institute for Theoretical and Computational Sciences (NITheCS), and the Discipline of Computer Science in the School of Mathematics, Statistics and Computer Science at the University of KwaZulu-Natal are herewith gratefully acknowledged.

# Contents

## AI in the Humanities and Society

John Searle’s Chinese Room, and Its Predecessor, a Short Story “The Game” by Anatoly Dneprov .....	3
<i>Konstantin V. Azarov</i>	

## AI in and for Information Systems

The Detection of Conversation Patterns in South African Political Tweets Through Social Network Analysis .....	15
<i>Aurona Gerber</i>	
The Application of Artificial Intelligence (AI) and Internet of Things (IoT) in Agriculture: A Systematic Literature Review .....	32
<i>C. L. de Abreu and J. P. van Deventer</i>	
A Data Analytics Organisation’s Perspective on Trust and AI Adoption .....	47
<i>Danie Smit, Sunet Eybers, and Jarod Smith</i>	

## Computer Vision and Image Processing

Improving Pose Estimation Through Contextual Activity Fusion .....	63
<i>David Poulton and Richard Klein</i>	
Improving the Performance of Image Captioning Models Trained on Small Datasets .....	77
<i>Mikkel du Plessis and Willie Brink</i>	

## Deep Learning

Exploring Graph Neural Networks for Stock Market Prediction on the JSE .....	95
<i>Kialan Pillay and Deshendran Moodley</i>	
Multi-style Training for South African Call Centre Audio .....	111
<i>Walter Heymans, Marelle H. Davel, and Charl van Heerden</i>	
Canonical and Surface Morphological Segmentation for Nguni Languages .....	125
<i>Tumi Moeng, Sheldon Reay, Aaron Daniels, and Jan Buys</i>	

Exploring Layerwise Decision Making in DNNs .....	140
<i>Coenraad Mouton and Marelle H. Davel</i>	

Automatic Baggage Threat Detection Using Deep Attention Networks .....	156
<i>Yashay Rampershad, Serestina Viriri, and Mandlenkosi Gwetu</i>	

## Knowledge Representation and Reasoning

A Rational Entailment for Expressive Description Logics via Description Logic Programs .....	177
<i>Giovanni Casini and Umberto Straccia</i>	

Explanation for KLM-Style Defeasible Reasoning .....	192
<i>Lloyd Everett, Emily Morris, and Thomas Meyer</i>	

## Machine Learning

Revisiting the Use of Noise in Evolutionary Robotics .....	211
<i>Mathys C. du Plessis, Antin P. Phillips, and Christiaan J. Pretorius</i>	

Avoiding Unexpected Obstacles During Robotic Navigation Using Rapidly-Exploring Random Trees and a Neural Network Simulator .....	227
<i>Bouwer Botha and Mathys C. du Plessis</i>	

Low Rank Matrix Approximation for Imputing Missing Categorical Data .....	242
<i>Joseph Muthui Wacira, Dinna Ranirina, and Bubacarr Bah</i>	

Implementing Quantum-Kernel-Based Classifiers in the NISQ Era .....	257
<i>Shivani Mahashakti Pillay, Ilya Sinayskiy, Edgar Jembere, and Francesco Petruccione</i>	

A Temporal Approach to Facial Emotion Expression Recognition .....	274
<i>Christine Asaju and Hima Vadapalli</i>	

Full Rotation Hyper-ellipsoid Multivariate Adaptive Bandwidth Kernel Density Estimator .....	287
<i>Terence L. van Zyl</i>	

## Philosophy and Ethics of AI

Is AI a Problem for Forward Looking Moral Responsibility? The Problem Followed by a Solution .....	307
<i>Fabio Tollon</i>	

Re-imagining Current AI Ethics Policy Debates: A View from the Ethics of Technology .....	319
<i>Emma Rutkamp-Bloem</i>	
A Habermasian Approach to Fair Processes in AI Algorithms .....	335
