Foreword

Human-computer interaction (HCI) is acquiring an ever-increasing scientific and industrial importance, as well as having more impact on people's everyday life, as an ever-growing number of human activities are progressively moving from the physical to the digital world. This process, which has been ongoing for some time now, has been dramatically accelerated by the COVID-19 pandemic. The HCI International (HCII) conference series, held yearly, aims to respond to the compelling need to advance the exchange of knowledge and research and development efforts on the human aspects of design and use of computing systems.

The 24th International Conference on Human-Computer Interaction, HCI International 2022 (HCII 2022), was planned to be held at the Gothia Towers Hotel and Swedish Exhibition & Congress Centre, Göteborg, Sweden, during June 26 to July 1, 2022. Due to the COVID-19 pandemic and with everyone's health and safety in mind, HCII 2022 was organized and run as a virtual conference. It incorporated the 21 thematic areas and affiliated conferences listed on the following page.

A total of 5583 individuals from academia, research institutes, industry, and governmental agencies from 88 countries submitted contributions, and 1276 papers and 275 posters were included in the proceedings to appear just before the start of the conference. The contributions thoroughly cover the entire field of human-computer interaction, addressing major advances in knowledge and effective use of computers in a variety of application areas. These papers provide academics, researchers, engineers, scientists, practitioners, and students with state-of-the-art information on the most recent advances in HCI. The volumes constituting the set of proceedings to appear before the start of the conference are listed in the following pages.

The HCI International (HCII) conference also offers the option of 'Late Breaking Work' which applies both for papers and posters, and the corresponding volume(s) of the proceedings will appear after the conference. Full papers will be included in the 'HCII 2022 - Late Breaking Papers' volumes of the proceedings to be published in the Springer LNCS series, while 'Poster Extended Abstracts' will be included as short research papers in the 'HCII 2022 - Late Breaking Posters' volumes to be published in the Springer CCIS series.

I would like to thank the Program Board Chairs and the members of the Program Boards of all thematic areas and affiliated conferences for their contribution and support towards the highest scientific quality and overall success of the HCI International 2022 conference; they have helped in so many ways, including session organization, paper reviewing (single-blind review process, with a minimum of two reviews per submission) and, more generally, acting as goodwill ambassadors for the HCII conference.

This conference would not have been possible without the continuous and unwavering support and advice of Gavriel Salvendy, founder, General Chair Emeritus, and Scientific Advisor. For his outstanding efforts, I would like to express my appreciation to Abbas Moallem, Communications Chair and Editor of HCI International News.

June 2022

HCI International 2022 Thematic Areas and Affiliated Conferences

Thematic Areas

- HCI: Human-Computer Interaction
- HIMI: Human Interface and the Management of Information

Affiliated Conferences

- EPCE: 19th International Conference on Engineering Psychology and Cognitive Ergonomics
- AC: 16th International Conference on Augmented Cognition
- UAHCI: 16th International Conference on Universal Access in Human-Computer Interaction
- CCD: 14th International Conference on Cross-Cultural Design
- SCSM: 14th International Conference on Social Computing and Social Media
- VAMR: 14th International Conference on Virtual, Augmented and Mixed Reality
- DHM: 13th International Conference on Digital Human Modeling and Applications in Health, Safety, Ergonomics and Risk Management
- DUXU: 11th International Conference on Design, User Experience and Usability
- C&C: 10th International Conference on Culture and Computing
- DAPI: 10th International Conference on Distributed, Ambient and Pervasive Interactions
- HCIBGO: 9th International Conference on HCI in Business, Government and Organizations
- LCT: 9th International Conference on Learning and Collaboration Technologies
- ITAP: 8th International Conference on Human Aspects of IT for the Aged Population
- AIS: 4th International Conference on Adaptive Instructional Systems
- HCI-CPT: 4th International Conference on HCI for Cybersecurity, Privacy and Trust
- HCI-Games: 4th International Conference on HCI in Games
- MobiTAS: 4th International Conference on HCI in Mobility, Transport and Automotive Systems
- AI-HCI: 3rd International Conference on Artificial Intelligence in HCI
- MOBILE: 3rd International Conference on Design, Operation and Evaluation of Mobile Communications

Preface

The 16th International Conference on Universal Access in Human-Computer Interaction (UAHCI 2022), an affiliated conference of the HCI International (HCII) conference, provided an established international forum for the exchange and dissemination of scientific information on theoretical, methodological, and empirical research that addresses all issues related to the attainment of universal access in the development of interactive software. It comprehensively addressed accessibility and quality of interaction in the user interface development life-cycle from a multidisciplinary perspective, taking into account dimensions of diversity, such as functional limitations, age, culture, background knowledge, etc., in the target user population, as well various dimensions of diversity which affect the context of use and the technological platform and arise from the emergence of mobile, wearable, ubiquitous, and intelligent devices and technologies.

UAHCI 2022 aimed to help, promote, and encourage research by providing a forum for interaction and exchanges among researchers, academics, and practitioners in the field. The conference welcomed papers on the design, development, evaluation, use, and impact of user interfaces, as well as standardization, policy, and other non-technological issues that facilitate and promote universal access.

Universal access is not a new topic in the field of human-computer interaction and information technology. Yet, in the new interaction environment shaped by current technological advancements, it becomes of prominent importance to ensure that individuals have access to interactive products and services that span a wide variety of everyday life domains and are used in fundamental human activities. The papers accepted to this year's UAHCI conference present research, methods, and practices addressing universal access issues related to user experience and interaction, and approaches targeted to provide appropriate interaction means to individuals with specific disabilities, but also issues related to extended reality – a prominent technological medium presenting novel accessibility challenges, as well as advancements in learning and education, a domain which was considerably challenged in the context of the ongoing pandemic.

Two volumes of the HCII 2022 proceedings are dedicated to this year's edition of the UAHCI conference, entitled *Universal Access in Human-Computer Interaction: Novel Design Approaches and Technologies (Part I)* and *Universal Access in Human-Computer Interaction: User and Context Diversity (Part II)*. The first focuses on topics related to novel approaches to accessibility, user experience, and technology acceptance in universal access, and multimodal and psychophysiological interaction, while the second focuses on topics related to universal access to learning and education, extended reality in universal access, design for cognitive and learning disabilities, and design for visual disabilities.

Papers of these volumes are included for publication after a minimum of two single-blind reviews from the members of the UAHCI Program Board or, in some cases, from members of the Program Boards of other affiliated conferences. We would like to thank all of them for their invaluable contribution, support and efforts.

HCI International 2023

The 25th International Conference on Human-Computer Interaction, HCI International 2023, will be held jointly with the affiliated conferences at the AC Bella Sky Hotel and Bella Center, Copenhagen, Denmark, 23–28 July 2023. It will cover a broad spectrum of themes related to human-computer interaction, including theoretical issues, methods, tools, processes, and case studies in HCI design, as well as novel interaction techniques, interfaces, and applications. The proceedings will be published by Springer. More information will be available on the conference website: <http://2023.hci.international/>.
