Preface

Welcome to the 22nd annual International Conference on Computational Science (ICCS 2022 - <https://www.iccs-meeting.org/iccs2022/>), held during 21–23 June, 2022, at Brunel University London, UK. After more than two years of a pandemic that has changed so much of our world and daily lives, this edition marks our return to a – partially – in-person event. Those who were not yet able to join us in London had the option to participate online, as all conference sessions were streamed.

Although the challenges of such a hybrid format are manifold, we have tried our best to keep the ICCS community as dynamic, creative, and productive as always. We are proud to present the proceedings you are reading as a result of that.

Standing on the River Thames in southeast England, at the head of a 50-mile (80 km) estuary down to the North Sea, London is the capital and largest city of England and the UK. With a rich history spanning back to Roman times, modern London is one of the world's global cities, having a prominent role in areas ranging from arts and entertainment to commerce, finance, and education. London is the biggest urban economy in Europe and one of the major financial centres in the world. It also features Europe's largest concentration of higher education institutions.

ICCS 2022 was jointly organized by Brunel University London, the University of Amsterdam, NTU Singapore, and the University of Tennessee.

Brunel University London is a public research university located in the Uxbridge area of London. It was founded in 1966 and named after the Victorian engineer Isambard Kingdom Brunel, who managed to design and build a 214m long suspension bridge in Bristol back in 1831. Brunel is well-known for its excellent Engineering and Computer Science Departments, and its campus houses a dedicated conference centre (the Hamilton Centre) which was used to host ICCS. It is also one of the few universities to host a full-length athletics track, which has been used both for practice purposes by athletes such as Usain Bolt for the 2012 Olympics and for graduation ceremonies.

The International Conference on Computational Science is an annual conference that brings together researchers and scientists from mathematics and computer science as basic computing disciplines, as well as researchers from various application areas who are pioneering computational methods in sciences such as physics, chemistry, life sciences, engineering, arts, and humanitarian fields, to discuss problems and solutions in the area, identify new issues, and shape future directions for research.

Since its inception in 2001, ICCS has attracted increasing numbers of attendees and higher-quality papers, and this year – in spite of the ongoing pandemic—was not an exception, with over 300 registered participants. The proceedings series has become a primary intellectual resource for computational science researchers, defining and advancing the state of the art in this field.

The theme for 2022, “The Computational Planet,” highlights the role of computational science in tackling the current challenges of the all-important quest for sustainable development. This conference aimed to be a unique event focusing on recent developments in scalable scientific algorithms, advanced software tools, computational

grids, advanced numerical methods, and novel application areas. These innovative novel models, algorithms, and tools drive new science through efficient application in physical systems, computational and systems biology, environmental systems, finance, and other areas.

ICCS is well-known for its excellent lineup of keynote speakers. The keynotes for 2022 were as follows:

- Robert Axtell, George Mason University, USA
- Peter Coveney, University College London, UK
- Thomas Engels, Technische Universität Berlin, Germany
- Neil Ferguson, Imperial College London, UK
- Giulia Galli, University of Chicago, USA
- Rebecca Wade, Heidelberg Institute for Theoretical Studies, Germany

This year we had 474 submissions (169 submissions to the main track and 305 to the thematic tracks). In the main track, 55 full papers were accepted (32%), and in the thematic tracks, 120 full papers (39%). A higher acceptance rate in the thematic tracks is explained by the nature of these, where track organizers personally invite many experts in a particular field to participate in their sessions.

ICCS relies strongly on our thematic track organizers' vital contributions to attract high-quality papers in many subject areas. We would like to thank all committee members from the main and thematic tracks for their contribution to ensure a high standard for the accepted papers. We would also like to thank Springer, Elsevier, and Intellegibilis for their support. Finally, we appreciate all the local organizing committee members for their hard work to prepare for this conference.

We are proud to note that ICCS is an A-rank conference in the CORE classification.

We wish you good health in these troubled times and look forward to meeting you at the next conference, whether virtually or in-person.

June 2022

Organization

General Chair

Valeria Krzhizhanovskaya	University of Amsterdam, The Netherlands
--------------------------	--

Main Track Chair

Clélia de Mulatier	University of Amsterdam, The Netherlands
--------------------	--

Thematic Tracks Chair

Maciej Paszynski	AGH University of Science and Technology, Poland
------------------	---

Scientific Chairs

Peter M. A. Sloot	University of Amsterdam, The Netherlands Complexity Institute NTU, Singapore
Jack Dongarra	University of Tennessee, USA

Local Organizing Committee

Chair

Derek Groen	Brunel University London, UK
-------------	------------------------------

Members

Simon Taylor	Brunel University London, UK
Anastasia Anagnostou	Brunel University London, UK
Diana Suleimenova	Brunel University London, UK
Xiaohui Liu	Brunel University London, UK
Zidong Wang	Brunel University London, UK
Steven Sam	Brunel University London, UK
Alireza Jahani	Brunel University London, UK
Yani Xue	Brunel University London, UK
Nadine Aburumman	Brunel University London, UK
Katie Mintram	Brunel University London, UK
Arindam Saha	Brunel University London, UK
Nura Abubakar	Brunel University London, UK

Thematic Tracks and Organizers

Advances in High-Performance Computational Earth Sciences: Applications and Frameworks – IHPCES

Takashi Shimokawabe	University of Tokyo, Japan
Kohei Fujita	University of Tokyo, Japan
Dominik Bartuschat	Friedrich-Alexander-Universität Erlangen-Nürnberg, Germany

Artificial Intelligence and High-Performance Computing for Advanced Simulations – AIHPC4AS

Maciej Paszynski	AGH University of Science and Technology, Poland
------------------	---

Biomedical and Bioinformatics Challenges for Computer Science – BBC

Mario Cannataro	Università Magna Graecia di Catanzaro, Italy
Giuseppe Agapito	Università Magna Graecia di Catanzaro, Italy
Mauro Castelli	Universidade Nova de Lisboa, Portugal
Riccardo Dondi	University of Bergamo, Italy
Rodrigo Weber dos Santos	Universidade Federal de Juiz de Fora, Brazil
Italo Zoppis	Università degli Studi di Milano-Bicocca, Italy

Computational Collective Intelligence – CCI

Marcin Maleszka	Wroclaw University of Science and Technology, Poland
Ngoc Thanh Nguyen	Wroclaw University of Science and Technology, Poland
Dosam Hwang	Yeungnam University, South Korea

Computational Health – CompHealth

Sergey Kovalchuk	ITMO University, Russia
Stefan Thurner	Medical University of Vienna, Austria
Georgiy Bobashev	RTI International, USA
Jude Hemanth	Karunya University, India
Anastasia Angelopoulou	University of Westminster, UK

Computational Optimization, Modelling, and Simulation – COMS

Xin-She Yang	Middlesex University London, UK
Leifur Leifsson	Purdue University, USA
Slawomir Koziel	Reykjavik University, Iceland

Computer Graphics, Image Processing, and Artificial Intelligence – CGIPAI

Andres Iglesias

Universidad de Cantabria, Spain

Machine Learning and Data Assimilation for Dynamical Systems – MLDADS

Rossella Arcucci

Imperial College London, UK

Multiscale Modelling and Simulation – MMS

Derek Groen

Contents – Part II

ICCS 2022 Main Track Short Papers

Neuroevolutionary Feature Representations for Causal Inference	3
<i>Michael C. Burkhart and Gabriel Ruiz</i>	
Compiling Linear Algebra Expressions into Efficient Code	11
<i>Julien Klaus, Mark Blacher, Joachim Giesen, Paul Gerhardt Rump, and Konstantin Wiedom</i>	
Interval Modification of the Fast PIES in Solving 2D Potential BVPs with Uncertainly Defined Polygonal Boundary Shape	18
<i>Andrzej Kuźelewski, Eugeniusz Zieniuk, and Marta Czupryna</i>	
Validation and Optimisation of Player Motion Models in Football	26
<i>Moritz Renkin, Jonas Bischofberger, Erich Schikuta, and Arnold Baca</i>	
Auto-scaling of Scientific Workflows in Kubernetes	33
<i>Bartosz Baliś, Andrzej Broński, and Mateusz Szarek</i>	
Transfer Learning Based Natural Scene Classification for Scene Understanding by Intelligent Machines	41
<i>Ranjini Surendran, J. Anitha, A. Angelopoulou, E. Kapetanios, T. Chausalet, and D. Jude Hemanth</i>	
Devulgarization of Polish Texts Using Pre-trained Language Models	49
<i>Cezary Klamra, Grzegorz Wojdyga, Sebastian Żurowski, Paulina Rosalska, Matylda Kozłowska, and Maciej Ogrodniczuk</i>	
Data-Driven Discovery of Time Fractional Differential Equations	56
<i>Abhishek Kumar Singh, Mani Mehra, and Anatoly A. Alikhanov</i>	
Wide Ensembles of Neural Networks in Music Genre Classification	64
<i>Daniel Kostrzewa, Wojciech Mazur, and Robert Brzeski</i>	
MultiEmo: Language-Agnostic Sentiment Analysis	72
<i>Piotr Miłkowski, Marcin Gruza, Przemysław Kazienko, Joanna Szołomicka, Stanisław Woźniak, and Jan Kocoi</i>	

Particle Swarm Optimization Configures the Route Minimization Algorithm	80
<i>Tomasz Jastrzab, Michal Myller, Lukasz Tulczyjew, Miroslaw Blocho, Wojciech Ryczko, Michal Kawulok, and Jakub Nalepa</i>	
Practical Aspects of Zero-Shot Learning	88
<i>Elie Saad, Marcin Paprzycki, and Maria Ganzha</i>	
A Hypothetical Agent-Based Model Inspired by the Abstraction of Solitary Behavior in Tigers and Its Employment as a Chain Code for Compression	96
<i>Khaldoon Dhou and Christopher Cruzen</i>	
Analyzing the Usefulness of Public Web Camera Video Sequences for Calibrating and Validating Pedestrian Dynamics Models	103
<i>Dariusz Pałka, Robert Lubaś, and Jarosław Wąs</i>	
A Highly Customizable Information Visualization Framework	110
<i>Luís Spínola, Daniel Castro Silva, and Luís Paulo Reis</i>	
Incremental Dynamic Analysis and Fragility Assessment of Buildings with Different Structural Arrangements Experiencing Earthquake-Induced Structural Pounding	117
<i>Mahmoud Miari and Robert Jankowski</i>	
PIES with Trimmed Surfaces for Solving Elastoplastic Boundary Problems	125
<i>Agnieszka Bołtuć and Eugeniusz Zieniuk</i>	
Linear Computational Cost Implicit Variational Splitting Solver with Non-regular Material Data for Parabolic Problems	132
<i>Paweł Maczuga, Maciej Paszyński, and Victor Calo</i>	
A Hadamard Matrix-Based Algorithm to Evaluate the Strength of Binary Sequences	139
<i>Amparo Fúster-Sabater, Verónica Requena, and Sara D. Cardell</i>	
Private and Public Opinions in a Model Based on the Total Dissonance Function: A Simulation Study	146
<i>Michał Jarema and Katarzyna Sznajd-Weron</i>	
Analysis of Public Transport (in)accessibility and Land-Use Pattern in Different Areas in Singapore	154
<i>Hoai Nguyen Huynh</i>	
Pseudo-Newton Method with Fractional Order Derivatives	162
<i>Krzysztof Gdawiec, Agnieszka Lisowska, and Wiesław Kotarski</i>	

An Energy Aware Clustering Scheme for 5G-Enabled Edge Computing Based IoMT Framework	169
<i>Jitendra Kumar Samriya, Mohit Kumar, Maria Ganzha, Marcin Paprzycki, Marek Bolanowski, and Andrzej Paszkiewicz</i>	
A Framework for Network Self-evolving Based on Distributed Swarm Intelligence	177
<i>Changbo Tian, Yongzheng Zhang, and Tao Yin</i>	
Investigating an Optimal Computational Strategy to Retrofit Buildings with Implementing Viscous Dampers	184
<i>Farzin Kazemi, Neda Asgarkhani, Ahmed Manguri, and Robert Jankowski</i>	
ARIMA Feature-Based Approach to Time Series Classification	192
<i>Agnieszka Jastrzebska, Wladyslaw Homenda, and Witold Pedrycz</i>	
A Note on Adjoint Linear Algebra	200
<i>Uwe Naumann</i>	
Approximate Function Classification	207
<i>Martin Lukac, Krzysztof Podlaski, and Michitaka Kameyama</i>	
Acceleration of Optimized Coarse-Grid Operators by Spatial Redistribution for Multigrid Reduction in Time	214
<i>Ryo Yoda, Matthias Bolten, Kengo Nakajima, and Akihiro Fujii</i>	
Networks Clustering-Based Approach for Search of Reservoirs-Analogues	222
<i>Andrey Bezborodov and Irina Deeva</i>	
KP01 Solved by an n-Dimensional Sampling and Clustering Heuristic	229
<i>Maria Harita, Alvaro Wong, Dolores Rexachs, and Emilio Luque</i>	
A Deep Neural Network as a TABU Support in Solving LABS Problem	237
<i>Dominik Żurek, Marcin Pietroń, Kamil Piętak, and Marek Kisiel-Dorohinicki</i>	
Classification and Generation of Derivational Morpho-semantic Relations for Polish Language	244
<i>Wiktoria Walentynowicz, Maciej Piasecki, and Mateusz Gniewkowski</i>	
On the Explanation of AI-Based Student Success Prediction	252
<i>Farzana Afrin, Margaret Hamilton, and Charles Thevathyan</i>	

The Importance of Scaling for an Agent Based Model: An Illustrative Case Study with COVID-19 in Zimbabwe	259
<i>Sarah Wise, Sveta Milusheva, and Sophie Ayling</i>	
Phase-Field Modelling of Brittle Fracture Using Time-Series Forecasting	266
<i>Minh Ngoc Dinh, Chien Trung Vo, Cuong Tan Nguyen, and Ngoc Minh La</i>	
Advances in High-Performance Computational Earth Sciences: Applications and Frameworks	
Calculation of Cross-correlation Function Accelerated by Tensor Cores with TensorFloat-32 Precision on Ampere GPU	277
<i>Yuma Kikuchi, Kohei Fujita, Tsuyoshi Ichimura, Muneo Hori, and Lalith Maddegadara</i>	
Developing an ELM Ecosystem Dynamics Model on GPU with OpenACC	291
<i>Peter Schwartz, Dali Wang, Fengming Yuan, and Peter Thornton</i>	
Artificial Intelligence and High-Performance Computing for Advanced Simulations	
Optimization-Free Inverse Design of High-Dimensional Nanoparticle Electrocatalysts Using Multi-target Machine Learning	307
<i>Sichao Li, Jonathan Y. C. Ting, and Amanda S. Barnard</i>	
CNNs with Compact Activation Function	319
<i>Jindong Wang, Jinchao Xu, and Jianqing Zhu</i>	
Deep Neural Networks and Smooth Approximation of PDEs	328
<i>Kamil Doległo, Maciej Paszyński, and Leszek Demkowicz</i>	
Isogeometric Analysis of Bound States of a Quantum Three-Body Problem in 1D	333
<i>Quanling Deng</i>	
1D Painless Multi-level Automatic Goal-Oriented h and p Adaptive Strategies Using a Pseudo-Dual Operator	347
<i>Felipe Vinicio Caro, Vincent Darrigrand, Julen Alvarez-Aramberri, Elisabete Alberdi Celaya, and David Pardo</i>	
Transfer Learning Approach to Prediction of Rate of Penetration in Drilling ...	358
<i>Felix James Pacis, Sergey Alyaev, Adrian Ambrus, and Tomasz Wiktorski</i>	

Physics Informed RNN-DCT Networks for Time-Dependent Partial Differential Equations	372
<i>Benjamin Wu, Oliver Hennigh, Jan Kautz, Sanjay Choudhry, and Wonmin Byeon</i>	
Recursive Singular Value Decomposition Compression of Refined Isogeometric Analysis Matrices as a Tool to Speedup Iterative Solvers Performance	380
<i>Mateusz Dobija and Anna Paszynska</i>	
Neural-Network Based Adaptation of Variation Operators' Parameters for Metaheuristics	394
<i>Tymoteusz Dobrzański, Aleksandra Urbańczyk, Tomasz Pelech-Pilichowski, Marek Kisiel-Dorohinicki, and Aleksander Byrski</i>	
Performance of Computing Hash-Codes with Chaotically-Trained Artificial Neural Networks	408
<i>Jacek Tchórzewski and Aleksander Byrski</i>	
Application of the Hierarchic Memetic Strategy HMS in Neuroevolution	422
<i>Mateusz Sokół and Maciej Smółka</i>	
Biomedical and Bioinformatics Challenges for Computer Science	
CXR-FL: Deep Learning-Based Chest X-ray Image Analysis Using Federated Learning	433
<i>Filip Ślęzyk, Przemysław Jabłecki, Aneta Lisowska, Maciej Malawski, and Szymon Płotka</i>	
POTHER: Patch-Voted Deep Learning-Based Chest X-ray Bias Analysis for COVID-19 Detection	441
<i>Tomasz Szczepański, Arkadiusz Sitek, Tomasz Trzciniński, and Szymon Płotka</i>	
Modeling Contrast Perfusion and Adsorption Phenomena in the Human Left Ventricle	455
<i>Evandro Dias Gaio, Bernardo Martins Rocha, and Rodrigo Weber dos Santos</i>	
Dense Temporal Subgraphs in Protein-Protein Interaction Networks	469
<i>Riccardo Dondi, Mohammad Mehdi Hosseinzadeh, and Italo Zoppis</i>	

Accelerating Edge Metagenomic Analysis with Serverless-Based Cloud Offloading	481
<i>Piotr Grzesik and Dariusz Mrozek</i>	
Continuous-to-Continuous Data Model vs. Discrete-to-Discrete Data Model for the Statistical Iterative Reconstruction Method	493
<i>Robert Cierniak</i>	
Musculoskeletal Model of Human Lower Limbs in Gait Simulation	507
<i>Adrianna Bielak, Radosław Bednarski, and Adam Wojciechowski</i>	
Tissue Damage Control Algorithm for Hyperthermia Based Cancer Treatments	514
<i>Gustavo Resende Fatigate, Rafael Felipe Coelho Neves, Marcelo Lobosco, and Ruy Freitas Reis</i>	
Resting-State EEG Classification for PNES Diagnosis	526
<i>Chiara Zucco, Barbara Calabrese, Rossana Mancuso, Miriam Sturniolo, Antonio Gambardella, and Mario Cannataro</i>	
Machine Learning Approaches in Inflammatory Bowel Disease	539
<i>Ileana Scarpino, Rosarina Vallelunga, Francesco Luzzza, and Mario Cannataro</i>	
A Machine Learning Framework for Fetal Arrhythmia Detection via Single ECG Electrode	546
<i>Dawlat Al-Saadany, Omneya Attallah, Khaled Elzaafarany, and A. A. A. Nasser</i>	
Computational Collective Intelligence	
Consensus Algorithm for Bi-clustering Analysis	557
<i>Paweł Foszner, Wojciech Labaj, Andrzej Polanski, and Michał Staniszewski</i>	
Collective of Base Classifiers for Mining Imbalanced Data	571
<i>Joanna Jedrzejowicz and Piotr Jedrzejowicz</i>	
Impact of Clustering on a Synthetic Instance Generation in Imbalanced Data Streams Classification	586
<i>Ireneusz Czarnowski and Denis Mayr Lima Martins</i>	
Enhancing Decision Combination in Classifier Committee via Positional Voting	598
<i>Jacek Trelinski and Bogdan Kwolek</i>	

Competition and Cooperation Mechanisms for Collective Behavior in Large Multi-agent Systems	610
<i>Franciszek Seredyński, Tomasz Kulpa, and Rolf Hoffmann</i>	
Divergence of an Observed User Profile and a Simulated Real State of User Due to Social Communication	624
<i>Marcin Maleszka</i>	
Temporal-Attribute Inference Using Dynamic Bayesian Networks	638
<i>Lihi Idan</i>	
Fuzzy Logic Framework for Ontology Instance Alignment	653
<i>Bogumiła Hnatkowska, Adrianna Kozierkiewicz, and Marcin Pietranik</i>	
Neuro-Symbolic Models for Sentiment Analysis	667
<i>Jan Kocoń, Joanna Baran, Marcin Gruza, Arkadiusz Janz, Michał Kajstura, Przemysław Kazienko, Wojciech Korczyński, Piotr Miłkowski, Maciej Piasecki, and Joanna Szolomicka</i>	
A Unified Sense Inventory for Word Sense Disambiguation in Polish	682
<i>Arkadiusz Janz, Agnieszka Dziob, Marcin Oleksy, and Joanna Baran</i>	
Sentence-level Sentiment Analysis Using GCN on Contextualized Word Representations	690
<i>Huyen Trang Phan, Ngoc Thanh Nguyen, Zygmunt Mazur, and Dosam Hwang</i>	
Machine Learning for Bus Travel Prediction	703
<i>Łukasz Pałys, Maria Ganzha, and Marcin Paprzycki</i>	
Prediction of Ether Prices Using DeepAR and Probabilistic Forecasting	711
<i>Andras Ferenczi and Costin Bădică</i>	
Purchasing Decisions on Alternative Fuel Vehicles Within an Agent-Based Model	719
<i>Arkadiusz Jędrzejewski, Katarzyna Sznajd-Weron, Jakub Pawłowski, and Anna Kowalska-Pyzalska</i>	
Author Index	727
