Preface

CaPTion 2022, the 1st International Workshop on Cancer Prevention through early detecTion, was organized as a satellite event of the 25th International Conference on Medical Image Computing and Computer Assisted Intervention (MICCAI 2022) in Singapore. The main idea of founding CaPTion was to create a new research interface where medical image analysis, machine learning, and clinical researchers could interact and address the challenges related to early cancer detection using computational methods.

Early cancer diagnosis and its treatment for the long-term survival of cancer patients have been a battle for decades. In 2020, 19.3 million cancer cases and almost 10 million deaths were reported, with lung (18%), colorectal (9.4%), liver (8.3%), stomach (7.7%), and female breast cancer (6.9%) being the leading causes of mortality. While computational methods in medical imaging have enabled the detection and assessment of cancerous tumors and assist in their treatment, early detection of cancer precursors opens an opportunity for early treatment and prevention. The workshop provided an opportunity to present research work in medical imaging around the central theme of early cancer detection. It strived to address the challenges that must be overcome to translate computational methods to clinical practice through well-designed, generalizable, interpretable, and clinically transferable methods. Through this new workshop, we aimed to identify a new ecosystem that would enable comprehensive method validation and reliability of methods, setting up a new gold standard for sample size and elaborating evaluation strategies to identify failure modes of methods when applied to real-world clinical environments.

The CaPTion 2022 proceedings contain 16 high-quality papers of 8 to 11 pages pre-selected through a rigorous peer review process (with an average of three reviews per paper). All submissions were peer-reviewed through a double-blind process by at least two members of the scientific review committee, comprising 21 experts in the field of medical imaging, especially within early cancer detection. The accepted manuscripts cover various medical image analysis methods and applications. In addition to the papers presented in this LNCS volume, the workshop hosted three keynote presentations from world-renowned experts: Fergus Gleeson (University of Oxford), Kristy K. Brock (University of Texas MD Anderson Cancer Center), and Michael Byrne (Vancouver General Hospital/University of British Columbia).

We wish to thank all the CaPTion 2022 authors for their participation and the members of the scientific review committee for their feedback and commitment to the workshop. We are very grateful to our sponsors: the NIHR Biomedical Research Centre, UK, and Satisfai Health Inc, Canada, for their valuable support.

The proceedings of the CaPTion workshop are published as a separate LNCS volume in conjunction with MICCAI 2022.

Yifan Zhang	Vanderbilt University, USA

Contents

Classification

3D-Morphomics, Morphological Features on CT Scans for Lung Nodule Malignancy Diagnosis	3
<i>Elias Munoz, Pierre Baudot, Van-Khoa Le, Charles Voyton, Benjamin Renoust, Danny Francis, Vladimir Groza, Jean-Christophe Brisset, Ezequiel Geremia, Antoine Iannessi, Yan Liu, and Benoit Huet</i>	
Self-supervised Approach for a Fully Assistive Esophageal Surveillance: Quality, Anatomy and Neoplasia Guidance	14
<i>Ziang Xu, Sharib Ali, Numan Celik, Adam Bailey, Barbara Braden, and Jens Rittscher</i>	
Multi-scale Deformable Transformer for the Classification of Gastric Glands: The IMGL Dataset	24
<i>Panagiotis Barmpoutis, Jing Yuan, William Waddingham, Christopher Ross, Kayhanian Hamzeh, Tania Stathaki, Daniel C. Alexander, and Marnix Jansen</i>	
Parallel Classification of Cells in Thinprep Cytology Test Image for Cervical Cancer Screening	34
<i>Maosong Cao, Xin Zhang, Xiangshan Fan, Lichi Zhang, and Qian Wang</i>	
Detection and Diagnosis	
Lightweight Transformer Backbone for Medical Object Detection	47
<i>Yifan Zhang, Haoyu Dong, Nicholas Konz, Hanxue Gu, and Maciej A. Mazurowski</i>	
Contrastive and Attention-Based Multiple Instance Learning for the Prediction of Sentinel Lymph Node Status from Histopathologies of Primary Melanoma Tumours	57
<i>Carlos Hernandez Perez, Marc Combalia Escudero, Susana Puig, Josep Malvehy, and Veronica Vilaplana Besler</i>	
Knowledge Distillation with a Class-Aware Loss for Endoscopic Disease Detection	67
<i>Pedro E. Chavarrias-Solano, Mansoor A. Teevno, Gilberto Ochoa-Ruiz, and Sharib Ali</i>	

IF ³ : An Interpretable Feature Fusion Framework for Lesion Risk Assessment Based on Auto-constructed Fuzzy Cognitive Maps	77
<i>Georgia Sovatzidi, Michael D. Vasilakakis, and Dimitris K. Iakovidis</i>	

Lesion Characterization

A CAD System for Real-Time Characterization of Neoplasia in Barrett's Esophagus NBI Videos	89
<i>Carolus H. J. Kusters, Tim G. W. Boers, Jelmer B. Jukema, Martijn R. Jong, Kiki N. Fockens, Albert J. de Groof, Jacques J. Bergman, Fons van der Sommen, and Peter H. N. de With</i>	

Efficient Out-of-Distribution Detection of Melanoma with Wavelet-Based Normalizing Flows	99
<i>M. M. Amaan Valiuddin, Christiaan G. A. Viviers, Ruud J. G. van Sloun, Peter H. N. de With, and Fons van der Sommen</i>	

Robust Colorectal Polyp Characterization Using a Hybrid Bayesian Neural Network	108
<i>Nikoo Dehghani, Thom Scheeve, Quirine E. W. van der Zander, Ayla Thijssen, Ramon-Michel Schreuder, Ad A. M. Masclee, Erik J. Schoon, Fons van der Sommen, and Peter H. N. de With</i>	

Active Data Enrichment by Learning What to Annotate in Digital Pathology ...	118
<i>George Batchkala, Tapabrata Chakraborti, Mark McCole, Fergus Gleeson, and Jens Rittscher</i>	

Segmentation, Registration, and Image-Guided Intervention

Comparing Training Strategies Using Multi-Assessor Segmentation Labels for Barrett's Neoplasia Detection	131
<i>Tim G. W. Boers, Carolus H. J. Kusters, Kiki N. Fockens, Jelmer B. Jukema, Martijn R. Jong, Jeroen de Groof, Jacques J. Bergman, Fons van der Sommen, and Peter H. N. de With</i>	

Improved Pancreatic Tumor Detection by Utilizing Clinically-Relevant Secondary Features	139
<i>Christiaan G. A. Viviers, Mark Ramaekers, Peter H. N. de With, Dimitrios Mavroeidis, Joost Nederend, Misha Luyer, and Fons van der Sommen</i>	

Strategising Template-Guided Needle Placement for MR-targeted Prostate Biopsy	149
<i>Iani JMB Gayo, Shaheer U. Saeed, Dean C. Barratt, Matthew J. Clarkson, and Yipeng Hu</i>	

Semantic-Aware Registration with Weakly-Supervised Learning	159
<i>Zhan Jin, Peng Xue, Yuyao Zhang, Xiaohuan Cao, and Dinggang Shen</i>	
Author Index	169
