Preface

This volume contains the accepted papers presented orally and as posters at the 2014 International Conference on Social Computing, Behavioral-Cultural Modeling, and Prediction (SBP 2014). This was the seventh year of the SBP conference, and the fourth since it merged with the International Conference on Computational Cultural Dynamics (ICCCD). This year the SBP 2014 conference was co-located with the Behavioral Representation in Modeling and Simulation (BRiMS) conference, which had a separate submission, review, and acceptance process and produces a separate record of its proceedings.

In 2014 the SBP conference continued its traditions. We received a set of 101 submissions (from 17 countries), down from last year's 137 submissions but better than the prior highest number of 88 submissions. SBP continued to be a selective, single-track conference. Twenty-four submissions were accepted as oral presentations, a 24% acceptance rate. We also accepted 31 posters, more than we had previously, for an overall 54% acceptance rate. Three papers were withdrawn and one paper did not meet the length requirements to be published. This resulted in 51 papers included in this volume. Finally, continuing our tradition, a bound copy of these proceedings was distributed to participant attendees at the conference and made available electronically as well as part of Springer's *Lecture Notes in Computer Science* series.

This conference is strongly committed to fostering multidisciplinary research, consistent with recent trends in computational social science and related fields. Authors were asked to indicate from a checklist which topics fitted the papers they were submitting. Many papers covered multiple topics across categories, reflecting the multidisciplinary nature of the submissions and the accepted papers. Consequently, the papers in this volume are presented in alphabetical order by the surname of the first author, instead of placed into preset categories. The topic areas that formed the core of previous SBP conferences were all represented: social and behavioral sciences, health sciences, military science, methodology, and information science.

Across the five topics, the overall number of submissions varied somewhat with the most papers in the category of information sciences (91 submissions, 30%), followed closely by methodology (87 submissions, 28%) and the topic of behavioral, social sciences, and economics (77 submissions, 25%). Health sciences and military science the least represented topics (29 and 24 submissions, respectively, and just less than 10% each). However, the acceptance rate by topic area varied very little across the topics, demonstrating that the quality of the submissions did not vary by topic. Although we cannot compare the quality of this years' submissions with last year, we can say that they were practically uniform across this wide range of topics.

There were a number of events that took place at the conference that are not contained in these proceedings, but they added greatly to the scientific and collegial value of the experience for participants. The first day of the conference included several tutorials on topics ranging from social media to computational models, among others. In the main conference program, each day was marked by a scientific lecture offered by a distinguished keynote speaker. These and other activities are documented on the SBP 2014 conference website, which also contains additional information (<http://sbp-conference.org>).

Conference activities such as SBP only succeed with assistance from many contributors, which involves a year-long and in many cases a multi-year effort on the part of many volunteers whose names are acknowledged in the next section. Following last year's success, the conference was held once again in downtown Washington, DC, at the University of California's DC Center on Rhode Island Avenue, during April 1–4. We are very grateful for their hospitality and many forms of logistical support. The 2014 Conference Committee met frequently during the year preceding the event, making numerous decisions concerning papers, posters, speakers, sessions, and all other components of a complex event such as this. We are grateful to the program co-chairs and reviewers, to each of the special activities chairs (for diverse activities such as sponsorships, registration, publicity, website, tutorials, challenge problems, and others), as well as the Steering Committee of founding members and the Advisory Committee of funding members, all of whose names are gratefully acknowledged in the next section. Finally, a special thanks to Dorothy Kondal, Administrative Assistant at the Center for Social Complexity, George Mason University, for her indispensable help in executing tasks, keeping us on schedule and organized. We thank all for their kind help, dedication, and collegiality. Funding for the SBP 2014 Conference was also made available by the Mason Center for Social Complexity.

Table of Contents

Oral Presentations

Human Development Dynamics: An Agent Based Simulation of Adaptive Heterogeneous Games and Social Systems	3
<i>Mark Abdollahian, Zining Yang, and Patrick deWerk Neal</i>	
Mobility Patterns and User Dynamics in Racially Segregated Geographies of US Cities	11
<i>Nibir Bora, Yu-Han Chang, and Rajiv Maheswaran</i>	
Incorporating Interpretation into Risky Decision-Making: A Computational Model	19
<i>David A. Broniatowski and Valerie F. Reyna</i>	
Labeling Actors in Social Networks Using a Heterogeneous Graph Kernel	27
<i>Ngot Bui and Vasant Honavar</i>	
Sample Size Determination to Detect Cusp Catastrophe in Stochastic Cusp Catastrophe Model: A Monte-Carlo Simulation-Based Approach	35
<i>Ding-Geng(Din) Chen, Xinguang (Jim) Chen, Wan Tang, and Feng Lin</i>	
Who Will Follow a New Topic Tomorrow?	43
<i>Biru Cui and Shanchieh Jay Yang</i>	
Identifying Emergent Thought Leaders	51
<i>Andrew Duchon and Emily S. Patterson</i>	
System-Subsystem Dependency Network for Integrating Multicomponent Data and Application to Health Sciences	59
<i>Edward H. Ip, Shyh-Huei Chen, and Jack Rejeski</i>	
How Individuals Weigh Their Previous Estimates to Make a New Estimate in the Presence or Absence of Social Influence	67
<i>Mohammad S. Jalali</i>	
Two 1% Don't Make a Whole: Comparing Simultaneous Samples from Twitter's Streaming API	75
<i>Kenneth Joseph, Peter M. Landwehr, and Kathleen M. Carley</i>	

Estimating Social Network Structure and Propagation Dynamics for an Infectious Disease	85
<i>Louis Kim, Mark Abramson, Kimon Drakopoulos, Stephan Kolitz, and Asu Ozdaglar</i>	
Predicting Social Ties in Massively Multiplayer Online Games	95
<i>Jina Lee and Kiran Lakkaraju</i>	
Winning by Following the Winners: Mining the Behaviour of Stock Market Experts in Social Media	103
<i>Wenhui Liao, Sameena Shah, and Masoud Makrehchi</i>	
Quantifying Political Legitimacy from Twitter	111
<i>Haibin Liu and Dongwon Lee</i>	
Path Following in Social Web Search	119
<i>Jared Lorince, Debora Donato, and Peter M. Todd</i>	
Multi-objective Optimization for Multi-level Networks	129
<i>Brandon Oselio, Alex Kulesza, and Alfred Hero</i>	
Cover Your Cough! Quantifying the Benefits of a Localized Healthy Behavior Intervention on Flu Epidemics in Washington DC	137
<i>Nidhi Parikh, Mina Youssef, Samarth Swarup, Stephen Eubank, and Youngyun Chungbaek</i>	
Integrating Epidemiological Modeling and Surveillance Data Feeds: A Kalman Filter Based Approach	145
<i>Weicheng Qian, Nathaniel D. Osgood, and Kevin G. Stanley</i>	
Identifying Users with Opposing Opinions in Twitter Debates	153
<i>Ashwin Rajadesingan and Huan Liu</i>	
A New Approach for Item Ranking Based on Review Scores Reflecting Temporal Trust Factor	161
<i>Kazumi Saito, Masahiro Kimura, Kouzou Ohara, and Hiroshi Motoda</i>	
Segmenting Large-Scale Cyber Attacks for Online Behavior Model Generation	169
<i>Steven Strapp and Shanchieh Jay Yang</i>	
Emergent Consequences: Unexpected Behaviors in a Simple Model to Support Innovation Adoption, Planning, and Evaluation	179
<i>H. Van Dyke Parunak and Jonathan A. Morell</i>	
Deriving Population Assessment through Opinion Polls, Text Analytics, and Agent-Based Modeling	187
<i>Ian Yohai, Bruce Skarin, Robert McCormack, and Jasmine Hsu</i>	

mFingerprint: Privacy-Preserving User Modeling with Multimodal Mobile Device Footprints	195
<i>Haipeng Zhang, Zhixian Yan, Jun Yang, Emmanuel Munguia Tapia, and David J. Crandall</i>	

Poster Presentations

Using Trust Model for Detecting Malicious Activities in Twitter	207
<i>Mohini Agarwal and Bin Zhou</i>	
Predicting Guild Membership in Massively Multiplayer Online Games	215
<i>Hamidreza Alvari, Kiran Lakkaraju, Gita Sukthankar, and Jon Whetzel</i>	
Emoticon and Text Production in First and Second Languages in Informal Text Communication	223
<i>Cecilia R. Aragon, Nan-Chen Chen, Judith F. Kroll, and Laurie Beth Feldman</i>	
The Needs of Metaphor	229
<i>David B. Bracewell</i>	
Behavior in the Time of Cholera: Evidence from the 2008-2009 Cholera Outbreak in Zimbabwe	237
<i>Anne Carpenter</i>	
Mutual Information Technique in Assessing Crosstalk through a Random-Pairing Bootstrap Method	245
<i>Xinguang (Jim) Chen and Ding-Geng Chen</i>	
New Methods of Mapping: The Application of Social Network Analysis to the Study of the Illegal Trade in Antiquities	253
<i>Michelle D'Ippolito</i>	
A New Paradigm for the Study of Corruption in Different Cultures	261
<i>Ya'akov (Kobi) Gal, Avi Rosenfeld, Sarit Kraus, Michele Gelfand, Bo An, and Jun Lin</i>	
A Study of Mobile Information Exploration with Multi-touch Interactions	269
<i>Shuguang Han, I-Han Hsiao, and Denis Parra</i>	
Dyadic Attribution: A Theoretical Model for Interpreting Online Words and Actions	277
<i>Shuyuan Mary Ho, Shashanka Surya Timmarajus, Mike Burmester, and Xiuwen Liu</i>	

Modeling Impact of Social Stratification on the Basis of Time Allocation Heuristics in Society	285
<i>Michał Kakol, Radosław Nielek, and Adam Wierzbicki</i>	
The Social Aspect of Voting for Useful Reviews	293
<i>Asher Levi and Osnat Mokryn</i>	
Simulating International Energy Security	301
<i>David Masad</i>	
Team PsychoSocial Assessment via Discourse Analysis: Power and Comfort/Routine	309
<i>Christopher Miller, Jeffrey Rye, Peggy Wu, Sonja Schmer-Galunder, and Tammy Ott</i>	
Social TV and the Social Soundtrack: Significance of Second Screen Interaction during Television Viewing	317
<i>Partha Mukherjee and Bernard J. Jansen</i>	
Social Network Structures of Primary Health Care Teams Associated with Health Outcomes in Alcohol Drinkers with Diabetes	325
<i>Marlon P. Mundt and Larissa I. Zakletskaia</i>	
Emerging Dynamics in Crowdfunding Campaigns	333
<i>Huaming Rao, Anbang Xu, Xiao Yang, and Wai-Tat Fu</i>	
Incorporating Social Theories in Computational Behavioral Models	341
<i>Eunice E. Santos, Eugene Santos Jr., John Korah, Riya George, Qi Gu, Jacob Jurmain, Keumjoo Kim, Deqing Li, Jacob Russell, Suresh Subramanian, Jeremy E. Thompson, and Fei Yu</i>	
Contexts of Diffusion: Adoption of Research Synthesis in Social Work and Women's Studies	351
<i>Laura Sheble and Annie T. Chen</i>	
Temporal Dynamics of Scale-Free Networks	359
<i>Erez Shmueli, Yaniv Altshuler, and Alex "Sandy" Pentland</i>	
Big Data-Driven Marketing: How Machine Learning Outperforms Marketers' Gut-Feeling	367
<i>Pål Sundsøy, Johannes Bjelland, Asif M. Iqbal, Alex "Sandy" Pentland, and Yves-Alexandre de Montjoye</i>	
"Frogs in a pot": An Agent-Based Model of Well-Being versus Prosperity	375
<i>Chris Thron</i>	
Frabjous: A Declarative Domain-Specific Language for Agent-Based Modelling	385
<i>Ivan Vendrov, Christopher Dutchyn, and Nathaniel D. Osgood</i>	

Social Maintenance and Psychological Support Using Virtual Worlds ...	393
<i>Peggy Wu, Jacquelyn Morie, J. Benton, Kip Haynes, Eric Chance, Tammy Ott, and Sonja Schmer-Galunder</i>	
Civil Unrest Prediction: A Tumblr-Based Exploration	403
<i>Jiejun Xu, Tsai-Ching Lu, Ryan Compton, and David Allen</i>	
Studying the Evolution of Online Collective Action: Saudi Arabian Women's 'Oct26Driving' Twitter Campaign	413
<i>Serpil Yuce, Nitin Agarwal, Rolf T. Wigand, Merlyna Lim, and Rebecca S. Robinson</i>	
A Comparative Study of Smoking Cessation Programs on Web Forum and Facebook	421
<i>Mi Zhang, Christopher C. Yang, and Katherine Chuang</i>	
Author Index	431
