Preface

This book contains the written contributions to the 6th International Symposium on Biomedical Simulation (ISBMS), which was held in Strasbourg, France, during October 16–17, 2014. The 27 articles cover the key scientific areas of this constantly evolving field: soft tissue and fluid modeling, physics-based registration, surgical planning, validation, augmented reality, training systems, and strategies for real-time computation.

Biomedical modeling and simulation are at the center-stage of worldwide efforts to understand and develop computational models of the human body, or at least its principal organs. Large-scale initiatives such as the Physiome Project, Virtual Physiological Human and Blue Brain Project aim to develop advanced computational models that can facilitate the understanding of the behavior of cells, organs, and systems, with the ultimate goal of delivering personalized medicine. At the same time, progress in modeling, numerical techniques, and haptics has enabled more complex and interactive simulations leading to more efficient and safer training of medical personnel. Recently, we are beginning to see the role that real-time computational models can play in the context of computer-assisted interventions, thus bridging the gap between the virtual and real worlds. It is in this context that ISBMS seeks to act as an international forum for researchers where they can share their latest work, discuss future trends, and forge new collaborations.

We received 45 submissions from 11 countries. Each was evaluated by at least three members of the Program Committee. Based on these reviews, 16 manuscripts were selected for long oral presentations and 11 for short talks. The meeting was single track and, in addition to contributed papers, included two keynote presentations, a discussion panel, and live demonstrations of recent research results. The geographical breakdown of the different institutions presenting their research was: Australia, Czech Republic, France, Germany, New Zealand, Romania, South Korea, Spain, Switzerland, UK, and USA. The quality and breadth of the contributions indicates that the symposium continues to be an important forum for our rapidly growing field, bringing together several related disciplines.

We are very grateful to the Program Committee members for volunteering their time to review and discuss the submitted articles and doing so in a timely and professional manner. We are also thankful to the Steering Committee for their encouragement and support in continuing the tradition of a high-quality, focused meeting. We extend our thanks to IHU-Strasbourg, IRCAD, and Inria for providing support in the organization of the meeting. Special thanks go to the local Organizing Committee for their hard work in making the 2014 edition of ISBMS a successful event. Last but not least, we would like to thank all

authors for presenting their work at the symposium. It was a pleasure hosting IS-BMS 2014 and we hope that all participants enjoyed the intense and stimulating discussions, as well as the opportunity to establish or renew fruitful interactions.

October 2014

Organization

The 2014 edition of ISBMS was organized by the SHACRA team from Inria, the SiMMS group from Imperial College London, and IHU-Strasbourg. It was hosted at IRCAD in Strasbourg, a center of excellence in surgical training.

ISBMS 2014 would not have been possible without the dedication and hard work of the Organizing Committee: Hadrien Courtecuisse (CNRS), Alejandro Granados (ICL), Rosalie Plantefève (Inria), and Audrey Ziliox (IHU).

General Chairs

Fernando Bello	Imperial College London, UK
Stéphane Cotin	Inria, France
Jérémie Dequidt	University of Lille, France
Igor Peterlik	IHU, France and Masaryk University, Czech Republic

Steering Committee

Stéphane Cotin	Inria, France (Chair)
Fernando Bello	ICL, UK (Co-chair)
Nicholas Ayache	Inria, France
Steve Dawson	CIMIT, USA
Hervé Delingette	Inria, France
Matthias Harders	University of Innsbruck, Austria
Dimitris Metaxas	Rutgers University, USA
Gabor Szekely	ETH, Switzerland

Program Committee

Cagatay Basdogan	Koc University, Istanbul, Turkey
Sofia Bayona	University Rey Juan Carlos, Madrid, Spain
Stéphane Bordas	University of Luxembourg, Luxembourg
Hadrien Courtecuisse	Icube Laboratory, CNRS, Strasbourg, France
Elias Cueto	University of Zaragoza, Spain
Hervé Delingette	Inria, Sophia Antipolis, France
Jérémie Dequidt	University of Lille, France
Christian Duriez	Inria, Lille, France
Philip ‘Eddie’ Edwards	Imperial College London, UK
Derek Gould	University of Liverpool, UK

VIII Organization

Matthias Harders	University of Innsbruck, Austria
Arun Holden	University of Leeds, UK
Pierre Jannin	INSERM, Rennes, France
Nigel John	Bangor University, UK
Erwan Kerrien	Inria, Nancy, France
Vincent Luboz	TIMC, Grenoble, France
Dinesh Manocha	University of North Carolina, USA
Maud Marchal	IRISA, Rennes, France
Edoardo Mazza	ETH Zurich, Switzerland
Miguel Otaduy	Rey Juan Carlos University, Madrid, Spain
Mark Ottensmeyer	CIMIT, Boston, USA
Yohan Payan	TIMC, Grenoble, France
Igor Peterlik	Masaryk University, Czech Republic
Emmanuel Promayon	TIMC, Grenoble, France
Stefan Suwelack	Karlsruhe Institute of Technology, Germany
Jocelyne Troccaz	TIMC, Grenoble, France
Sebastian Ullrich	SenseGraphics, Stockholm, Sweden
Pierre-Frédéric Villard	Inria, Nancy, France
Xunlei Wu	SAS, Raleigh, North Carolina, USA

Table of Contents

Training Systems and Haptics

Preliminary Bone Sawing Model for a Virtual Reality-Based Training Simulator of Bilateral Sagittal Split Osteotomy	1
<i>Thomas C. Knott, Raluca E. Sofronia, Marcus Gerressen, Yuen Law, Arjana Davidescu, George G. Savii, Karls H. Gatzweiler, Manfred Staat, and Torsten W. Kuhlen</i>	
Interactive Training System for Interventional Electrophysiology Procedures	11
<i>Hugo Talbot, Federico Spadoni, Christian Duriez, Maxime Sermesant, Stéphane Cotin, and Hervé Delingette</i>	
A Virtual Reality System to Train Image Guided Placement of Kirschner-Wires for Distal Radius Fractures	20
<i>Tian En Timothy Seah, Alastair Barrow, Aroon Baskaradas, Chinmay Gupte, and Fernando Bello</i>	
Using and Validating Airborne Ultrasound as a Tactile Interface within Medical Training Simulators	30
<i>Gary M.Y. Hung, Nigel W. John, Chris Hancock, and Takayuki Hoshi</i>	
Haptics Modelling for Digital Rectal Examinations	40
<i>Alejandro Granados, Erik Mayer, Christine Norton, David Ellis, Mohammad Mobasheri, Naomi Low-Beer, Jenny Higham, Roger Kneebone, and Fernando Bello</i>	

Physics-Based Registration

Patient-Specific Meshless Model for Whole-Body Image Registration ...	50
<i>Mao Li, Karol Miller, Grand Joldes, Ron Kikinis, and Adam Wittek</i>	
Automatic Alignment of Pre and Intraoperative Data Using Anatomical Landmarks for Augmented Laparoscopic Liver Surgery	58
<i>Rosalie Planteffeve, Nazim Haouchine, Jean-Pierre Radoux, and Stéphane Cotin</i>	
Using a Biomechanical Model for Tongue Tracking in Ultrasound Images	67
<i>Matthieu Loosvelt, Pierre-Frédéric Villard, and Marie-Odile Berger</i>	

Intra-Operative Registration for Stereotactic Procedures Driven by a Combined Biomechanical Brain and CSF Model	76
<i>Alexandre Bilger, Éric Bardinnet, Sara Fernandez-Vidal, Christian Duriez, Pierre Jannin, and Stéphane Cotin</i>	

Vascular Modelling and Simulation

3D CFD in Complex Vascular Systems: A Case Study	86
<i>Olivia Miraucourt, Olivier Gènevaux, Marcela Szopos, Marc Thiriet, Hugues Talbot, Stéphanie Salmon, and Nicolas Passat</i>	
Computational Stent Placement in Transcatheter Aortic Valve Implantation	95
<i>Christoph Russ, Raoul Hopf, Simon H. Sündermann, Silvia Born, Sven Hirsch, Volkmar Falk, Gábor Székely, and Michael Gessat</i>	
Testbed for Assessing the Accuracy of Interventional Radiology Simulations	106
<i>Mario Sanz-Lopez, Jeremie Dequidt, Erwan Kerrien, Christian Duriez, Marie-Odile Berger, and Stéphane Cotin</i>	
Simulation of Catheters and Guidewires for Cardiovascular Interventions Using an Inextensible Cosserat Rod	112
<i>Przemyslaw Korzeniowski, Francisco Martinez-Martinez, Niels Hald, and Fernando Bello</i>	

Image and Simulation

3D Interactive Ultrasound Image Deformation for Realistic Prostate Biopsy Simulation.....	122
<i>Sonia-Yuki Selmi, Emmanuel Promayon, Johan Sarrazin, and Jocelyne Troccaz</i>	
Interactive Deformation of Heterogeneous Volume Data	131
<i>Rosell Torres, Jose M. Espadero, Felipe A. Calvo, and Miguel A. Otaduy</i>	
Brain Ventricular Morphology Analysis Using a Set of Ventricular-Specific Feature Descriptors	141
<i>Jaeil Kim, Hojin Ryoo, Maria del C. Valdés Hernández, Natalie A. Royle, and Jinah Park</i>	
Extension of an MRI Simulator Software for Phase Contrast Angiography Experiments	150
<i>Alexandre Fortin, Emmanuel Durand, and Stéphanie Salmon</i>	

Surgical Planning

Preliminary Study on Finite Element Simulation for Optimizing Acetabulum Reorientation after Periacetabular Osteotomy	155
<i>Li Liu, Timo Michael Ecker, Steffen Schumann, Klaus Siebenrock, and Guoyan Zheng</i>	
Computer-Assisted Surgical Planning for Mitral Valve Repair Using 4D Echocardiograms	163
<i>Mark Hillecke, Marco Moscarelli, Nilesch Sutaria, Gianni Angelini, and Fernando Bello</i>	

Modelling

Generic 3D Geometrical and Mechanical Modeling of the Skin/Subcutaneous Complex by a Procedural Hybrid Method	173
<i>Christian Herlin, Benjamin Gilles, Gérard Subsol, and Guillaume Captier</i>	
The MAP Client: User-Friendly Musculoskeletal Modelling Workflows	182
<i>Ju Zhang, Hugh Sorby, John Clement, C. David L. Thomas, Peter Hunter, Poul Nielsen, David Lloyd, Mark Taylor, and Thor Besier</i>	
PGD-Based Model Reduction for Surgery Simulation: Solid Dynamics and Contact Detection	193
<i>Carlos Quesada, Icíar Alfaro, David González, Elías Cueto, and Francisco Chinesta</i>	
Bender: An Open Source Software for Efficient Model Posing and Morphing	203
<i>Julien Finet, Ricardo Ortiz, Johan Andruejol, Andinet Enquobahrie, Julien Jomier, Jason Payne, and Stephen Aylward</i>	

Analysis, Characterisation and Validation

Comparison of CFD-Based and Bernoulli-Based Pressure Drop Estimates across the Aortic Valve Enabled by Shape-Constrained Deformable Segmentation of Cardiac CT Images	211
<i>Jochen Peters, Angela Lungu, Frank M. Weber, Irina Waechter-Stehle, D. Rodney Hose, and Juergen Weese</i>	
FE Simulation for the Understanding of the Median Cystocele Prolapse Occurrence	220
<i>Olivier Mayeur, Gery Lamblin, Pauline Lecomte-Grosbras, Mathias Brieu, Chrystele Rubod, and Michel Cosson</i>	

The Role of Ligaments: Patient-Specific or Scenario-Specific? 228
 Julien Bosman, Nazim Haouchine, Jeremie Dequidt, Igor Peterlik,
 Stéphane Cotin, and Christian Duriez

Experimental Characterization and Simulation of Layer Interaction in
Facial Soft Tissues 233
 Johannes Weickenmeier, Raphael Wu, Pauline Lecomte-Grosbras,
 Jean-François Witz, Mathias Brieu, Sebastian Winklhofer,
 Gustav Andreisek, and Edoardo Mazza
