Preface

This volume of the Springer book series Communications in Computer and Information Science contains the proceedings of WIVACE 2014, the Ninth Italian Workshop on Artificial Life and Evolutionary Computation, held from May 14 to 15, 2014, in Vietri Sul Mare, Italy.

The goal of WIVACE 2014 was to provide researchers in evolutionary computation, complex systems, and artificial life with an opportunity for the presentation of relevant novel researches in a strongly multidisciplinary context. Artificial Life and Evolutionary Computation (ALEC) are core research areas of what has become an exciting cross-fertilization between evolutionary biology, computer science, and engineering. Computer scientists and engineers, inspired by evolution in nature, realized that they could apply the same powerful Darwinian mechanism in computers for practical purposes, such as complex industrial design.

In recent years, there has been a market trend in the ALEC community toward realworld applications. Techniques, inspired by ALECs wide ambition to produce more intelligent systems, are not only gaining acceptance in other fields of scientific research, but also in areas such as business, commerce, and industry. The integration of these disciplines by different learning and adaptation techniques has in recent years contributed to the emergence of large numbers of new superior class of intelligence known as Hybrid Intelligence. Hybridization of different intelligent systems is an innovative approach to construct computationally intelligent systems consisting of artificial neural network, fuzzy inference systems, rough set, approximate reasoning, and optimization methods such as evolutionary computation, swarm intelligence, and particle swarm optimization.

To broaden its range, this year WIVACE 2014 was held in conjunction with the 24th Italian Workshop on Neural Networks WIRN 2014 (May 15–16). Participation in both workshops has been strongly encouraged in order to favor the interdisciplinary viewpoint of both communities.

The editors wish to express their sincere gratitude to all persons who supported this venture and made it feasible. In particular, we wish to thank all the authors who spent time and effort to contribute to this volume. We would also thank reviewers who, as members of the Program Committee, not only assessed papers, but also acted as session chairmen during the workshop. Special thanks, finally, to the invited speakers who, during the workshop gave three very interesting and inspiring talks: Enrique Alba, professor at University of Malága, Spain, Yaroslav D. Sergeyev, professor at University of Calabria, Italy, and Roberto Serra, professor at University of Modena and Reggio Emilia, Italy.

May 2014

Organization

WIVACE 2014 is organized by the Institute of High Performance Computing and Networking (ICAR) of National Research Council of Italy (CNR).

Program Chairs

Clara Pizzuti	Institute of High Performance Computing and Networking (ICAR) of National Research Council of Italy (CNR), Italy
Giandomenico Spezzano	Institute of High Performance Computing and Networking (ICAR) of National Research Council of Italy (CNR), Italy
Local Chairs	
Alessia Amelio	Institute of High Performance Computing and Networking (ICAR) of National Research Council of Italy (CNR). Italy
Andrea Giordano	Institute of High Performance Computing and Networking (ICAR) of National Research Council of Italy (CNR), Italy
Andrea Vinci	Institute of High Performance Computing and Networking (ICAR) of National Research Council of Italy (CNR), Italy

Program Committee

Alberto Acerbi	University of Bristol, UK
Marco Antoniotti	Università degli Studi di Milano-Bicocca, Italy
Michele Amoretti	Università degli Studi di Parma, Italy
Luca Ascari	Henesis Srl, Italy
Antonia Azzini	Università degli Studi di Milano, Italy
Lucia Ballerini	University of Edinburgh, UK
Armando Bazzani	Università di Bologna, Italy
Vitoantonio Bevilacqua	Politecnico di Bari, Italy
Leonardo Bocchi	Università degli Studi di Firenze, Italy
Andrea Bracciali	University of Stirling, UK
Ernesto Burattini	Università degli Studi di Napoli Federico II, Italy
Stefano Cagnoni	Università degli Studi di Parma, Italy
Raffaele Calabretta	ISTC-CNR, Italy

Contents

Building Energy Management Through Fault Detection Analysis Using Pattern Recognition Techniques Applied on Residual Neural Networks Imran Khan, Alfonso Capozzoli, Fiorella Lauro, Stefano Paolo Corgnati, and Stefano Pizzuti	
Qualitative Particle Swarm Optimization (Q-PSO) for Energy-Efficient Building Designs Debora Slanzi, Matteo Borrotti, Davide De March, Daniele Orlando, Silvio Giove, and Irene Poli	13
Introducing Interactive Evolutionary Computation in Data Clustering Anna Russo, Onofrio Gigliotta, Francesco Palumbo, and Orazio Miglino	26
Living Emerging Worlds for Games Nicolas Jakob and Carlos Andrés Peña	37
Studying the Evolutionary Basis of Emotions Through Adaptive Neuroagents: Preliminary Settings and Results Daniela Pacella, Onofrio Gigliotta, and Orazio Miglino	47
Approaches to Molecular Communication Between Synthetic Compartments Based on Encapsulated Chemical Oscillators Pasquale Stano, Florian Wodlei, Paolo Carrara, Sandra Ristori, Nadia Marchettini, and Federico Rossi	58
Multi-objective Parameter Tuning for PSO-based Point Cloud Localization Roberto Ugolotti and Stefano Cagnoni	75
A Multithreaded Implementation of the Fish School Search Algorithm Marcelo Gomes Pereira de Lacerda and Fernando Buarque de Lima Neto	86
Evolutionary Applications to Cellular Automata Models for Volcano Risk Mitigation <i>Giuseppe Filippone, Roberto Parise, Davide Spataro, Donato D'Ambrosio,</i> <i>Rocco Rongo, and William Spataro</i>	99
On RAF Sets and Autocatalytic Cycles in Random Reaction Networks Alessandro Filisetti, Marco Villani, Chiara Damiani, Alex Graudenzi, Andrea Roli, Wim Hordijk, and Roberto Serra	113
Learning Multiple Conflicting Tasks with Artificial Evolution Delphine Nicolay, Andrea Roli, and Timoteo Carletti	127

On Some Properties of Information Theoretical Measures for the Study of Complex Systems	140
Investigating the Role of Network Topology and Dynamical Regimes on the Dynamics of a Cell Differentiation Model Alex Graudenzi, Chiara Damiani, Andrea Paroni, Alessandro Filisetti, Marco Villani, Roberto Serra, and Marco Antoniotti	151
Molecular Communication Technology: General Considerations on the Use of Synthetic Cells and Some Hints from In Silico Modelling <i>Fabio Mavelli, Giordano Rampioni, Luisa Damiano, Marco Messina,</i> <i>Livia Leoni, and Pasquale Stano</i>	169
Examples of the Usage of Infinities and Infinitesimals in Numerical Computations	190
The Complex Systems Approach to Protocells	201
Author Index	213
