About this Series

“Lecture Notes in Electrical Engineering (LNEE)” is a book series which reports the latest research and developments in Electrical Engineering, namely:

- Communication, Networks, and Information Theory
- Computer Engineering
- Signal, Image, Speech and Information Processing
- Circuits and Systems
- Bioengineering

LNEE publishes authored monographs and contributed volumes which present cutting edge research information as well as new perspectives on classical fields, while maintaining Springer’s high standards of academic excellence. Also considered for publication are lecture materials, proceedings, and other related materials of exceptionally high quality and interest. The subject matter should be original and timely, reporting the latest research and developments in all areas of electrical engineering.

The audience for the books in LNEE consists of advanced level students, researchers, and industry professionals working at the forefront of their fields. Much like Springer’s other Lecture Notes series, LNEE will be distributed through Springer’s print and electronic publishing channels.

Preface

The present book includes extended and revised versions of a set of selected papers from the 13th International Conference on Informatics in Control, Automation and Robotics (ICINCO 2016), held in Lisbon, Portugal, from 29 to 31 July 2016.

ICINCO 2016 received 183 paper submissions from 47 countries, of which 11% were selected and invited to submit an extended and revised version for this book. The papers were selected by the event chairs based on several criteria including rankings and comments provided by the program committee members, the session chairs' assessments and the program chairs' outlook of maintaining a globally coherent and balanced assortment of included papers.

The purpose of the 13th International Conference on Informatics in Control, Automation and Robotics (ICINCO), is to bring together academicians and practitioners interested in the application of informatics to Control, Automation and Robotics. Following the spirit of the conference, the editors aspire to reflect on the most up-to-date developments in aforementioned fields. We believe this book will serve as a source of the latest knowledge and inspiration for researchers, engineers and Ph.D. students.

The contents of the book cover the topics of the four parallel tracks we had elaborated for ICINCO 2016 program, namely:

- Intelligent Control Systems and Optimization;
- Robotics and Automation;
- Signal Processing, Sensors, Systems Modelling and Control;
- Industrial Informatics.

Moreover, as editors, we have paid a special attention to covering not only theoretical aspects of these fields but also applicative and implementation accomplishments. Based on the high quality of the ICINCO contributions, the result is, we believe, a factual and well-balanced prospect of current achievements in the field. Finally, one might pinpoint our particular attention to emphasizing the trend for Control of Intelligent Robots that provides a special flavour to the contributions proposed in this book.

We would like to thank all the authors for their contributions, and to address special acknowledgements to the reviewers who were decisive in pledge of the quality of this publication.

Contents

Part I Intelligent Control Systems and Optimization

A Method for the Energy Optimization of a Multisource Elevator	3
Chloé Desdouits, Mazen Alamir, Rodolphe Giroudeau, and Claude Le Pape	
Visual Servoing Path-Planning with Elliptical Projections	30
Tiantian Shen and Graziano Chesi	
Fractional Models of Lithium-Ion Batteries with Application to State of Charge and Ageing Estimation	55
Jocelyn Sabatier, Franck Guillemard, Loic Lavigne, Agnieszka Noury, Mathieu Merveillaut, and Junior Mbala Francico	
Co-operation of Biology Related Algorithms for Solving Opinion Mining Problems by Using Different Term Weighting Schemes	73
Shakhnaz Akhmedova, Eugene Semenkin, and Vladimir Stanovov	
Bifurcation Analysis and Active Control of Surge and Rotating Stall in Axial Flow Compressors via Passivity	91
Gholam-Reza Sari, Ouassima Akhrif, and Lahcen Saydy	
Task Controller for Performing Remote Centre of Motion	117
Bassem Dahroug, Brahim Tamadazte, and Nicolas Andreff	
Toward an Automatic Fongbe Speech Recognition System: Hierarchical Mixtures of Algorithms for Phoneme Recognition	133
Fréjus A.A. Laleye, Eugène C. Ezin, and Cina Motamed	

Part II Robotics and Automation

Spatial Fusion of Different Imaging Technologies Using a Virtual Multimodal Camera	153
Sebastian P. Kleinschmidt and Bernardo Wagner	

Fusing LiDAR and Radar Data to Perform SLAM in Harsh Environments 175
Paul Fritsche, Simon Kueppers, Gunnar Briese, and Bernardo Wagner

On Redundancy Resolution in Minimum-Time Trajectory Planning of Robotic Manipulators Along Predefined End-Effector Paths 190
Alexander Reiter, Hubert Gattringer, and Andreas Müller

Parameter Identification and Model-Based Control of Redundantly Actuated, Non-holonomic, Omnidirectional Vehicles 207
Christoph Stöger, Andreas Müller, and Hubert Gattringer

Passivity-Based Control Design and Experiments for a Rolling-Balancing System 230
Alejandro Donaire, Martin Crespo, Fabio Ruggiero, Vincenzo Lippiello, and Bruno Siciliano

Time-Optimal Paths for a Robotic Batting Task 256
Diana Serra, Fabio Ruggiero, Aykut C. Satici, Vincenzo Lippiello, and Bruno Siciliano

An Adaptive Terminal Sliding Mode Guidance Law for Head Pursuit Interception with Impact Angle Considered 277
Cheng Zhang, Ke Zhang, and Jingyu Wang

Kinematic and Dynamic Approaches in Gait Optimization for Humanoid Robot Locomotion 293
Ramil Khusainov, Alexandr Klimchik, and Evgeni Magid

Part III Signal Processing, Sensors, Systems Modelling and Control

Identification and Control of the Waelz Process Using Infrared Image Processing 323
Jörg Matthes, Patrick Waibel, Hubert B. Keller, and Lutz Gröll

Modeling and Calibrating Triangulation Lidars for Indoor Applications 342
Anas Alhashimi, Giovanni Pierobon, Damiano Varagnolo, and Thomas Gustafsson

A Comparison of Discretization Methods for Parameter Estimation of Nonlinear Mechanical Systems Using Extended Kalman Filter: Symplectic versus Classical Approaches 367
Daniel Beckmann, Matthias Dagen, and Tobias Ortmaier

Dynamics Calibration and Real-Time State Estimation of a Redundant Flexible Joint Robot Based on Encoders and Gyroscopes 385
Dennis Schütthe, Felix Wenk, and Udo Frese

**Mathematical Model for the Output Signal’s Energy of an Ideal DAC
in the Presence of Clock Jitter** 410
Paola Loreti, Sima Sarv Ahrabi, and Pierluigi Vellucci

**Stochastic Integration Filter with Improved State Estimate Mean-
Square Error Computation** 423
Jindřich Havlík, Ondřej Straka, Jindřich Duník, and Jiří Ajgl

Author Index. 440
