

Lecture Notes in Electrical Engineering

Volume 429

Board of Series editors

Leopoldo Angrisani, Napoli, Italy
Marco Arteaga, Coyoacán, México
Samarjit Chakraborty, München, Germany
Jiming Chen, Hangzhou, P.R. China
Tan Kay Chen, Singapore, Singapore
Rüdiger Dillmann, Karlsruhe, Germany
Haibin Duan, Beijing, China
Gianluigi Ferrari, Parma, Italy
Manuel Ferre, Madrid, Spain
Sandra Hirche, München, Germany
Faryar Jabbari, Irvine, USA
Janusz Kacprzyk, Warsaw, Poland
Alaa Khamis, New Cairo City, Egypt
Torsten Kroeger, Stanford, USA
Tan Cher Ming, Singapore, Singapore
Wolfgang Minker, Ulm, Germany
Pradeep Misra, Dayton, USA
Sebastian Möller, Berlin, Germany
Subhas Mukhopadhyay, Palmerston, New Zealand
Cun-Zheng Ning, Tempe, USA
Toyoaki Nishida, Sakyo-ku, Japan
Bijaya Ketan Panigrahi, New Delhi, India
Federica Pascucci, Roma, Italy
Tariq Samad, Minneapolis, USA
Gan Woon Seng, Nanyang Avenue, Singapore
Germano Veiga, Porto, Portugal
Haitao Wu, Beijing, China
Junjie James Zhang, Charlotte, USA

About this Series

“Lecture Notes in Electrical Engineering (LNEE)” is a book series which reports the latest research and developments in Electrical Engineering, namely:

- Communication, Networks, and Information Theory
- Computer Engineering
- Signal, Image, Speech and Information Processing
- Circuits and Systems
- Bioengineering

LNEE publishes authored monographs and contributed volumes which present cutting edge research information as well as new perspectives on classical fields, while maintaining Springer’s high standards of academic excellence. Also considered for publication are lecture materials, proceedings, and other related materials of exceptionally high quality and interest. The subject matter should be original and timely, reporting the latest research and developments in all areas of electrical engineering.

The audience for the books in LNEE consists of advanced level students, researchers, and industry professionals working at the forefront of their fields. Much like Springer’s other Lecture Notes series, LNEE will be distributed through Springer’s print and electronic publishing channels.

Preface

This is the fifth edition of the ApplePies Conference, held in Rome, Italy, in September 2016. The conference aims at offering a wide and reasoned overview of electronic applications in several domains, demonstrating how electronics has become pervasive and ever more embedded in everyday objects and processes.

The computational, storage, and communication power of current electronic systems is such that we may really say that their applications are limited only by the designer's fantasy. This represents a great challenge for practitioners, managers, and academicians in ICT Engineering. The challenge also stresses the importance of multidisciplinary knowledge, expertise, and collaboration, in order to support a virtuous iterative cycle from user needs to new products and services. The cycle goes through the whole system engineering process, which typically encompasses requirement elicitation, specification management, software and hardware design, laboratory and user testing and verification, and maintenance management.

For either an embedded or cyberphysical system to be successful in the current globalized market competition, at least one of the following features must be provided: innovation, high performance, and good cost/performance ratio. Designing and implementing each one of such features requires a deep knowledge of both the system's target application and domain, and of the technologies that are potentially able to fulfill the expected goals.

One of the most important factors for the success of a project consists in the adoption of a suited design flow and related tools. Only seldom are simple top-down or bottom-up methods able to meet the time- and cost-related challenges of nowadays market scenarios. Even if every application stems from recognizing one or more key user needs, a proper design, implementation, and maintenance require mastering the most suited technologies and tools in order to support efficient and effective development and life cycle management of electronics applications. Support tools must also be able to capture and share a team's experience in the design and implementation process, as it allows anticipating possible problems that may not appear on the paper.

All these challenging aspects call for the importance of the role of the university as a place where new-generation designers can learn and practice with

cutting-the-edge technological tools and are stimulated to devise solutions for challenges coming from a variety of application domains, such as healthcare, transportation, education, tourism, entertainment, cultural heritage, and energy.

This conference wants to report and discuss several examples of designs and become a reference point in the field of electronics systems design, trying to fill at scientific and technological R&D level a gap that the most farsighted industries have already indicated and are striving to cover.

Genoa, Italy

Contents

Energy and Environment

Long-Range Radio for Underground Sensors in Geothermal Energy Systems	3
Davide Brunelli, Emanuele Bedeschi, Marco Ferrari, Francesco Tinti, Alberto Barbaresi, and Luca Benini	
Embedding Monitoring Systems for Cured-In-Place Pipes	12
Leonardo Mistretta, G. Costantino Giaconia, Antonino Valenza, Enrico Napoli, Chiara Gianguzzi, Marco Lo Presti, and Francesco Di Puma	
Delay Tolerant Wireless Sensor Network for Animal Monitoring: The Pink Iguana Case	18
L. Bracciale, A. Catini, G. Gentile, and P. Loreti	
Low Dose-Rate, High Total Dose Set-Up for Rad-Hard CMOS I/O Circuits Testing	27
Calogero Pace, Letizia Fragomeni, Aldo Parlato, Andrea Solano, Nicolò Marchese, and Daniela Fiore	
Engaging Self-powered Environmental Sensors via Serious Gaming	34
Michele Pozzi and Pavlos Sgardelis	
Flora Monitoring with a Plant-Microbial Fuel Cell	41
Davide Brunelli, Pietro Tosato, and Maurizio Rossi	

Automotive

Developing ICT Solutions for Dynamic Charging of Electric Vehicles	51
Oussama Smiai, Francesco Bellotti, Riccardo Berta, Alessandro De Gloria, Andrew Winder, Theodoros Theodoropoulos, Yannis Damousis, Ramon S. Schwartz, Nadim El Sayed, Stéphane Laporte, and Marc Revilloud	
Maximizing Power Transfer for Dynamic Wireless Charging Electric Vehicles	59
Vincenzo Cirimele, Oussama Smiai, Paolo Guglielmi, Francesco Bellotti, Riccardo Berta, and Alessandro De Gloria	
A Serious Game Architecture for Green Mobility	66
Pratheep K. Paranthaman, Gautam R. Dange, Francesco Bellotti, Riccardo Berta, Alessandro De Gloria, Ermanno Di Zitti, Stefano Massucco, and Giuseppe Sciutto	
Design and Implementation of an Electronic Control Unit for a CFR Bi-Fuel Spark Ignition Engine	77
Carmelo Maniscalco, Vincenzo Di Majo, Emiliano Pipitone, and G. Costantino Giaconia	
Testing of DC/DC Converters for 48 V Electric Vehicles	86
Arcangelo Sisto, Sergio Saponara, Gabriele Ciarpi, Fabrizio Iacopetti, and Luca Fanucci	
Miscellaneous	
Wake up for Power Line Communication in Street Lighting Networks	95
Parian Golchin, Pietro Tosato, and Davide Brunelli	
High Resolution Time Domain Reflectometry for Dielectric State Monitoring in High Voltage Cables	104
Gaetano Randazzo, Antonio Di Stefano, and G. Costantino Giaconia	
A Calorimetry Based System for Measuring the Power Losses of Switching Power Devices	111
Demetrio Iero, Francesco Della Corte, and Massimo Merenda	
ZnO-rGO Composite Thin Film Resistive Switching Device: Emulating Biological Synapse Behavior	117
Gauravmani Khanal, Simone Acciarito, Gian Carlo Cardarilli, Abhishek Chakraborty, Luca Di Nunzio, Rocco Fazzolari, Alessandro Cristini, Gianluca Susi, and Marco Re	

Embedded System for Prosthetic Interface Mapping of Lower Limbs Amputees 124
 Maurizio Rossi, Leandro Lorenzelli, and Davide Brunelli

Wideband mmWave Antenna for Wireless Network-On-Chip/Network-On-Board Communications. 132
 Sergio Saponara and Bruno Neri

Failure Effect Analysis of Patch-Clamp Electronic Instrumentation in Electrophysiology Experiments 138
 Sergio Saponara, Fabio Fusi, Simona Saponara, and Massimo Macucci

ICs and Memories

Performance Evaluation of Non Volatile Memories with a Low Cost and Portable Automatic Test Equipment 147
 Gineuve Alieri, G. Costantino Giaconia, Leonardo Mistretta, Francesco La Rosa, and A. Angelo Cimino

An Emulator for Approximate Memory Platforms Based on QEmu 153
 Francesco Menichelli, Giulia Stazi, Antonio Mastrandrea, and Mauro Olivieri

Failure Analysis of Plastic Packages for Low-Power ICs 160
 Sergio Saponara, Gabriele Ciarpi, and Luca Fanucci

Smart Cities

Towards a Virtual Reality Interactive Application for Truck Traffic Access Management 169
 Alberto Cavallo, Alessio Robaldo, Francesco Bellotti, Riccardo Berta, Ivan Carmosino, and Alessandro De Gloria

A Contactless, Energy-Neutral Power Meter for Smart City Applications. 177
 Clemente Villani, Simone Benatti, Davide Brunelli, and Luca Benini

Signal Processing and Communications

Emerging Applications of Whispering Gallery Mode Photonic Resonators 185
 C. Ciminelli, G. Brunetti, F. Dell’Olio, F. Innone, D. Conteduca, and M.N. Armenise

Compressive Sensing Reconstruction for Complex System: A Hardware/Software Approach 192
 S. Acciarito, G.C. Cardarilli, L. Di Nunzio, R. Fazzolari, G.M. Khanal, and M. Re

Experimental Evaluation of 3D Ultrasound Palmprint Recognition Techniques Based on Curvature Methods and Under Skin Principal Lines 201
Antonio Iula and Donatella Nardiello

RFID Eavesdropping Using SDR Platforms 208
F. Le Roy, T. Quiniou, A. Mansour, R. Lababidi, and D. Le Jeune

Non Destructive Ultrasound Equipment to Evaluate the Concrete Compressive Strength 215
Valentino Meacci, Stefano Ricci, Armin Bruehwiler, and Didier Lootens

Pulse Compression: From Radar to Real-Time Ultrasound Systems 221
Alessandro Ramalli, Alessandro Dallai, and Enrico Boni
