

Commenced Publication in 1973

Founding and Former Series Editors:

Gerhard Goos, Juris Hartmanis, and Jan van Leeuwen

Editorial Board

David Hutchison

Lancaster University, Lancaster, UK

Takeo Kanade

Carnegie Mellon University, Pittsburgh, PA, USA

Josef Kittler

University of Surrey, Guildford, UK

Jon M. Kleinberg

Cornell University, Ithaca, NY, USA

Friedemann Mattern

ETH Zurich, Zurich, Switzerland

John C. Mitchell

Stanford University, Stanford, CA, USA

Moni Naor

Weizmann Institute of Science, Rehovot, Israel

C. Pandu Rangan

Indian Institute of Technology, Madras, India

Bernhard Steffen

TU Dortmund University, Dortmund, Germany

Demetri Terzopoulos

University of California, Los Angeles, CA, USA

Doug Tygar

University of California, Berkeley, CA, USA

Gerhard Weikum

Max Planck Institute for Informatics, Saarbrücken, Germany

Preface

The International Conference on Informatics in Schools: Situation, Evolution and Perspectives (ISSEP) celebrated its 10th anniversary in Helsinki, the capital of Finland. The year 2017 also marked the anniversary of Finland: One month after the conference, on December 6, Finland celebrated its 100th year of independence.

ISSEP is a forum for researchers and practitioners in the area of informatics education, in both primary and secondary schools. The conference provides an opportunity for educators and researchers to reflect upon the goals and objectives of this subject matter, its curricula, various teaching and learning paradigms and topics, as well as the connections to everyday life – including the various ways of developing informatics education in schools. This applies in an even larger extent to the didactics of informatics. ISSEP provides an opportunity to take stock of developments in the field and on the extent these developments are relevant for everyday school life.

This conference brings together delegates to address pressing issues in informatics education. On the basis of these challenging areas, participants consider how to cope with future demands of education in informatics and IT-related subjects. Teachers, those working in teacher education and in-service training as well as in school administration come to participate in workshops and to share their experience or vision on an international platform.

The ISSEP conference started in 2005 in Austria, Klagenfurt University (now Alpen-Adria University of Klagenfurt), where the conference was a part of the celebration of 20 years of teaching informatics in Austrian secondary schools. The following year, ISSEP took place in Vilnius, Lithuania, celebrating 20 years of informatics in Lithuanian secondary schools. The ISSEP conference expanded: In Vilnius there were over 200 researchers from 37 countries, and an additional day for local teachers was established and had over 250 attendants from all over Lithuania. In 2008, ISSEP was in Torun, Poland, and in 2010, ISSEP was organized in Zürich. Then followed Bratislava, Slovakia, in 2011, Oldenburg, Germany, in 2013, Istanbul, Turkey, in 2014, Ljubljana, Slovenia, in 2015 and Münster, Germany, in 2016.

In these proceedings, all research papers were blind reviewed by at least three reviewers. A final selection phase was conducted by the co-chairs who reviewed all reviews and recommendations before making their final decisions. From the 41 submitted articles, 18 were selected for presentation and inclusion in the proceedings.

This year, participants at ISSEP discussed a broad range of themes ranging from making informatics accessible to visually impaired students and computational thinking to context- and country-specific challenges as well as teacher development and training. The conference hosted several workshops where teachers and researchers were familiarized with, e.g., robotics and teaching programming as well as unplugged activities for computational thinking. Preliminary work and new ideas were presented

as posters, creating a unique opportunity for the participants to discuss the ideas in a supportive environment. ISSEP also hosted CSERC (Computer Science Education Research Conference) as a special track at the conference.

Organization

Conference Chairs and Co-chairs

Valentina Dagienė	Vilnius University, Lithuania
Arto Hellas	University of Helsinki, Finland

Program Committee

Erik Barendsen	Radboud University Nijmegen and Open Universiteit, The Netherlands
Andreas Bollin	University of Klagenfurt, Austria
Andrej Brodnik	University of Ljubljana, Slovenia
Michalis Giannakos	Norwegian University of Science and Technology, Norway
David Ginat	Tel Aviv University, Israel
Bruria Haberman	Holon Institute of Technology, Tel Aviv, Israel
Juraj Hromkovič	Swiss Federal Institute of Technology Zurich, Switzerland
Peter Hubwieser	Technical University of Munich, Germany
Petri Ihantola	Tampere University of Technology, Finland
Ivan Kalas	Comenius University, Slovakia
Tiina Korhonen	University of Helsinki, Finland
Peter Micheuz	University of Klagenfurt and Gymnasium Völkermarkt, Austria
George A. Papadopoulos	University of Cyprus, Cyprus
Sergey Pozdniakov	Saint Petersburg Electrotechnical University, Russia
Ralf Romeike	University of Erlangen (FAU), Germany
Maciej M. Syslo	University of Wrocław, Poland

Local Organizing Committee

Antti Laaksonen	Aalto University, Finland
Juho Leinonen	University of Helsinki, Finland
Leo Leppänen	University of Helsinki, Finland

Contents

Keynote Paper

The Computer Science Way of Thinking in Human History and Consequences for the Design of Computer Science Curricula	3
<i>Juraj Hromkovič and Regula Lacher</i>	

Accessibility, Visualizations and Physical Computing

Adolescent and Adult Student Attitudes Towards Progress Visualizations. . .	15
<i>Onni Aarne, Petrus Peltola, Antti Leinonen, Juho Leinonen, and Arto Hellas</i>	
3D Printing as Medium for Motivation and Creativity in Computer Science Lessons	27
<i>Petra Kastl, Oliver Krisch, and Ralf Romeike</i>	
Teaching Materials in Informatics for Lower Secondary School Blind Students	37
<i>Ludmila Jašková and Mária Stankovičová</i>	
Teachers' Expectations and Experience in Physical Computing.	49
<i>Mareen Przybylla, Finn Henning, Carla Schreiber, and Ralf Romeike</i>	

Teacher Development and Assessment

Investigating Informatics Teachers' Initial Pedagogical Content Knowledge on Modeling and Simulation	65
<i>Nataša Grgurina, Erik Barendsen, Cor Suhre, Klaas van Veen, and Bert Zwaneveld</i>	
A Notation for Sets, Sequences and Series: Possible Benefits for Understanding and Use.	77
<i>Susanna H. du Plessis and Vreda Pieterse</i>	

Bebras Tasks

Bebras Task Analysis in Category Little Beavers in Slovakia	91
<i>Lucia Budinská, Karolína Mayerová, and Michaela Veselovská</i>	

Promoting Computational Thinking Skills: Would You Use this Bebras Task?	102
<i>Annalisa Calcagni, Violetta Lonati, Dario Malchiodi, Mattia Monga, and Anna Morpurgo</i>	

Country Reports

Introducing Programming and Digital Competence in Swedish K-9 Education	117
<i>Fredrik Heintz, Linda Mannila, Lars-Åke Nordén, Peter Parnes, and Björn Regnell</i>	

Preparedness of Japan's Elementary School Teachers for the Introduction of Computer Programming Education	129
<i>Yutaro Ohashi</i>	

Baltic and Nordic K-12 Teacher Perspectives on Computational Thinking and Computing	141
<i>Arnold Pears, Valentina Dagiene, and Egle Jasute</i>	

Computational Thinking/Programming, Computational Abilities

Identifying Students' Misconceptions on Basic Algorithmic Concepts Through Flowchart Analysis.	155
<i>Ebrahim Rahimi, Erik Barendsen, and Ineke Henze</i>	

A Preliminary Investigation on Computational Abilities in Secondary School	169
<i>Ugo Solitro, Margherita Pasini, Debora De Gradi, and Margherita Brondino</i>	

Solving Everyday Challenges in a Computational Way of Thinking	180
<i>Bernhard Standl</i>	

System Papers

Teaching Basic Elements of OOP in School Informatics During Constructing Virtual Micro-worlds	195
<i>Evgeny A. Eremin</i>	

Real-Time Data Analyses in Secondary Schools Using a Block-Based Programming Language	207
<i>Andreas Grillenberger and Ralf Romeike</i>	

XLogoOnline: A Single-Page, Browser-Based Programming Environment for Schools Aiming at Reducing Cognitive Load on Pupils	219
<i>Juraj Hromkovič, Giovanni Serafini, and Jacqueline Staub</i>	

Introduction to Bebras Challenge Management: Overview and Analyses of Developed Systems	232
<i>Valentina Dagiene, Gabriele Stupuriene, Lina Vinikiene, and Rimantas Zakauskas</i>	
Author Index	245
