About the Editors

Michael Filimowicz is Senior Lecturer in the School of Interactive Arts and Technology (SIAT) at Simon Fraser University. He has developed new forms of general purpose multimodal and audiovisual display technology, exploring novel product lines across different application contexts including gaming, immersive exhibitions, process control, command and control, telepresence, and simulation-based training.

Veronika Tzankova is a PhD candidate in SIAT, having previously gained her MA in the same program. Her Master's research was in the areas of interactive technologies within the contexts of social appropriation and democratic inclusiveness. Her current doctoral work is in the area of embodied cognition approaches to interaction design, with a focus on contact sports.
