

Advances in Intelligent Systems and Computing

Volume 761

Series editor

Janusz Kacprzyk, Polish Academy of Sciences, Warsaw, Poland
e-mail: kacprzyk@ibspan.waw.pl

The series “Advances in Intelligent Systems and Computing” contains publications on theory, applications, and design methods of Intelligent Systems and Intelligent Computing. Virtually all disciplines such as engineering, natural sciences, computer and information science, ICT, economics, business, e-commerce, environment, healthcare, life science are covered. The list of topics spans all the areas of modern intelligent systems and computing such as: computational intelligence, soft computing including neural networks, fuzzy systems, evolutionary computing and the fusion of these paradigms, social intelligence, ambient intelligence, computational neuroscience, artificial life, virtual worlds and society, cognitive science and systems, Perception and Vision, DNA and immune based systems, self-organizing and adaptive systems, e-Learning and teaching, human-centered and human-centric computing, recommender systems, intelligent control, robotics and mechatronics including human-machine teaming, knowledge-based paradigms, learning paradigms, machine ethics, intelligent data analysis, knowledge management, intelligent agents, intelligent decision making and support, intelligent network security, trust management, interactive entertainment, Web intelligence and multimedia.

The publications within “Advances in Intelligent Systems and Computing” are primarily proceedings of important conferences, symposia and congresses. They cover significant recent developments in the field, both of a foundational and applicable character. An important characteristic feature of the series is the short publication time and world-wide distribution. This permits a rapid and broad dissemination of research results.

Preface

In this volume, we would like to present the reader with proceedings of the Thirteenth International Conference on Dependability and Complex Systems *DepCoS-RELCOMEX*, which took place in the Brunów Palace in Poland from 2 to 6 July 2018.

DepCoS-RELCOMEX is an annual conference series organized since 2006 at the Faculty of Electronics, Wrocław University of Science and Technology, initially by Institute of Computer Engineering, Control and Robotics (CECR) and now by Department of Computer Engineering. Its idea came from the heritage of the other two cycles of events: RELCOMEX (1977–1989) and Microcomputer School (1985–1995) which were organized by the Institute of Engineering Cybernetics (the previous name of CECR) under the leadership of Prof. Wojciech Zamojski, now also the DepCoS chairman. In this volume of “Advances in Intelligent Systems and Computing”, we would like to include results of studies on selected problems of contemporary complex systems and their dependability. Proceedings of the previous DepCoS events were published (in historical order) by the IEEE Computer Society (2006–2009), by Wrocław University of Technology Publishing House (2010–2012) and recently by Springer in AISC volumes no. 97 (2011), 170 (2012), 224 (2013), 286 (2014), 365 (2015), 479 (2016) and 582 (2017).

Published by Springer Nature, one of the largest and most prestigious scientific publishers, the AISC series is one of the fastest growing book series in their programme. Its volumes are submitted for indexing in ISI Conference Proceedings Citation Index (now run by Clarivate), Ei Compendex, DBLP, SCOPUS, Google Scholar and SpringerLink, and many other indexing services around the world.

The selection of papers in these proceedings illustrates a broad variety of topics which are investigated in dependability analyses of today’s complex systems. Dependability came naturally as a contemporary answer to new challenges in their reliability evaluation. This kind of systems cannot be interpreted only as (however complex and distributed) structures built on the base of technical resources (hardware), but their analysis must take into account a unique blend of interacting people (their needs and behaviours), networks (together with mobile properties, iCloud organization) and a large number of users dispersed geographically and producing

an unimaginable number of applications (working online). A growing number of research methods apply the newest results of artificial intelligence (AI) and computational intelligence (CI). Today's complex systems are *really* complex and are applied in many different fields of contemporary life.

Dependability approach in theory and engineering of complex systems (not only computer systems and networks) is based on multidisciplinary approach to system theory, technology and maintenance of the systems working in real (and very often unfriendly) environment. Dependability concentrates on efficient realization of tasks, services and jobs by a system considered as a unity of technical, information and human assets, in contrast to "classical" reliability which is more restrained to the analysis of technical resources (components and structures built from them). This difference has shaped natural evolution in topical range of subsequent DepCoS conferences which can be seen over recent years.

The Programme Committee of the 13th International DepCoS-RELCOMEX Conference, its organizers and the editors of these proceedings would like to gratefully acknowledge participation of all reviewers who evaluated conference submissions and in this way helped to refine the contents of this volume. The list includes, in alphabetic order, Andrzej Białas, Ilona Bluemke, Eugene Brezhniev, Dejiu Chen, Frank Coolen, Mieczysław Drabowski, Francesco Flammini, Manuel Gil Perez, Zbigniew Gomółka, Zbigniew Huzar, Igor Kabashkin, Vyacheslav Kharchenko, Wojciech Kordecki, Alexey Lastovetsky, Jan Magott, István Majzik, Jacek Mazurkiewicz, Marek Młyńczak, Yiannis Papadopoulos, Krzysztof Sacha, Rafał Scherer, Mirosław Siergiejczyk, Robert Sobolewski, Janusz Sosnowski, Jarosław Sugier, Victor Toporkov, Tomasz Walkowiak, Bernd E. Wolfinger, Wojciech Zamojski and Wlodek Zuberek.

Expressing our thanks to all the authors who have chosen DepCoS as the publication platform of their research, we would like to stress our desire that their papers will help in further developments in design, analysis and engineering of dependability aspects of complex systems, creating a valuable source material for scientists, researchers, practitioners and students who work in these areas.

Thirteenth International Conference on Dependability and Complex Systems DepCoS-RELCOMEX

Organized by Department of Computer Engineering, Wrocław University of Science and Technology, Brunów Palace, Poland, July 2–6, 2018

Programme Committee

Wojciech Zamojski (Chairman)	Wrocław University of Science and Technology, Poland
Ali Al-Dahoud	Al-Zaytoonah University, Amman, Jordan
Włodzimierz M. Barański	Wrocław University of Science and Technology, Poland
Andrzej Białas	Institute of Innovative Technologies EMAG, Katowice, Poland
Ilona Bluemke	Warsaw University of Technology, Poland
Eugene Brezhniev	National Aerospace University “KhAI”, Kharkiv, Ukraine
Dariusz Caban	Wrocław University of Science and Technology, Poland
Frank Coolen	Durham University, UK
Mieczysław Drabowski	Cracow University of Technology, Poland
Chen De-Jiu	KTH Royal Institute of Technology, Stockholm, Sweden
Francesco Flammini	University of Naples “Federico II”, Italy
Manuel Gill Perez	University of Murcia, Spain
Zbigniew Huzar	Wrocław University of Science and Technology, Poland

Igor Kabashkin	Transport and Telecommunication Institute, Riga, Latvia
Janusz Kacprzyk	Polish Academy of Sciences, Warsaw, Poland
Vyacheslav S. Kharchenko	National Aerospace University “KhAI”, Kharkiv, Ukraine
Mieczysław M. Kokar	Northeastern University, Boston, USA
Krzysztof Kołowrocki	Gdynia Maritime University, Poland
Wojciech Kordecki	The Witelon State University of Applied Sciences in Legnica, Poland
Leszek Kotulski	AGH University of Science and Technology, Krakow, Poland
Henryk Krawczyk	Gdansk University of Technology, Poland
Alexey Lastovetsky	University College Dublin, Ireland
Jan Magott	Wrocław University of Science and Technology, Poland
Istvan Majzik	Budapest University of Technology and Economics, Hungary
Jacek Mazurkiewicz	Wrocław University of Science and Technology, Poland
Marek Młyńczak	Wrocław University of Science and Technology, Poland
Yiannis Papadopoulos	Hull University, UK
Ewaryst Rafajłowicz	Wrocław University of Science and Technology, Poland
Krzysztof Sacha	Warsaw University of Technology, Poland
Elena Savenkova	Peoples’ Friendship University of Russia, Moscow, Russia
Rafał Scherer	Częstochowa University of Technology, Poland
Mirosław Siergiejczyk	Warsaw University of Technology, Poland
Czesław Smutnicki	Wrocław University of Science and Technology, Poland
Robert Sobolewski	Białystok University of Technology, Poland
Janusz Sosnowski	Warsaw University of Technology, Poland
Jarosław Sugier	Wrocław University of Science and Technology, Poland
Victor Toporkov	Moscow Power Engineering Institute (Technical University), Russia
Tomasz Walkowiak	Wrocław University of Science and Technology, Poland
Max Walter	Siemens, Germany
Bernd E. Wolfinger	University of Hamburg, Germany
Min Xie	City University of Hong Kong, Hong Kong SAR, China
