# Preface

This volume presents the accepted papers for the 2018 International Conference on Web Services (ICWS 2018), held in Seattle, USA, during June 25–30, 2018. The International Conference on Web Services (ICWS) has been a prime international forum for both researchers and industry practitioners to exchange the latest fundamental advances in the state of the art and practice of Web-based services, identify emerging research topics, and define the future of Web-based services. All topics regarding Internet/Web services lifecycle study and management align with the theme of ICWS.

For this conference, each paper was reviewed by three independent members of the international Program Committee. After carefully evaluating their originality and quality, we accepted 32 papers.

We are pleased to thank the authors whose submissions and participation made this conference possible. We also want to express our thanks to the Organizing Committee and Program Committee members for their dedication in helping to organize the conference and reviewing the submissions. We owe special thanks to the keynote speakers for their impressive speeches. We would like to thank the Meikang Qiu and Zhong Ming, who provided continuous support for this conference.

Finally, we would like to thank Haibo Zhang, Keke Gai, De Wang, Aibek Musaev, Jinpeng, and Jing Zeng for their excellent work in organizing this conference.
