# Preface

The International Conference on Edge Computing (EDGE) is aimed at becoming a prime international forum for both researchers and industry practitioners to exchange the latest fundamental advances in the state of the art and practice of edge computing, to identify emerging research topics, and to define the future of edge computing.

This volume presents the accepted papers for the 2018 International Conference on Edge Computing (EDGE 2018), held in Seattle, USA, during June 25–30, 2018. EDGE 2018 placed its focus on the state of the art and practice of edge computing, in which topics covered localized resource sharing and connections with the cloud. We accepted 12 papers, including nine full papers and three short papers. Each was reviewed and selected by at least three independent members of the EDGE 2018 international Program Committee. We are pleased to thank the authors whose submissions and participation made this conference possible. We also want to express our thanks to the Organizing Committee and Program Committee members, for their dedication in helping to organize the conference and reviewing the submissions. We owe special thanks to the keynote speakers for their impressive speeches.
