# Preface

The 7th International Conference on Electronic Government and the Information Systems Perspective, EGOVIS 2018, took place in Regensburg, Germany, during September 3–6. The conference belongs to the 29th DEXA Conference Series.

The international conference cycle EGOVIS focuses on information systems and ICT aspects of e-government. Information systems are a core enabler for e-government/governance in all its dimensions: e-administration, e-democracy, e-participation, and e-voting. EGOVIS brought together experts from academia, public administrations, and industry to discuss e-government and e-democracy from different perspectives and disciplines, i.e., technology, policy and/or governance, and public administration.

The Program Committee accepted 19 papers from recent research fields such as open data, digitalization, identity management and e-government architectures, innovation, open government, intelligent systems, and semantic technologies. Beyond theoretical contributions, papers cover e-government experiences from all over the world; cases are presented from Europe and South America.

This proceedings volume is organized into six sections according to the conference sessions.

We were honored that the EGOVIS 2018 keynote speech was given by Prof. Roland Traunmüller: He is one of the pioneers in e-government studies and has contributed for many years to identifying limits and opportunities in the field. Prof. Traunmüller's speech discussed digitalization as challenge for e-government.

The chairs of the Program Committee wish to thank all the reviewers for their valuable work; the reviews raised several research questions to discuss at the conference. We would like to thank Gabriela Wagner for the administrative support and assisting us in proper scheduling.

We wish pleasant and beneficial learning experiences for the readers. We hope that the discussion will continue after the conference between the researchers and contribute to building a global community in the field of e-government.

July 2018
