Preface

Software reuse depicts a great vision for the software industry. It has been widely viewed as a promising way to improve both the productivity and quality of software development. However, despite of the successes we have achieved, there are still many issues that have limited the promotion of software reuse in the real world. Therefore, software reuse has remained an important hotspot of research. ICSR is the premier international conference in the field of software reuse. It has been an important venue for presenting advances and improvements within the software reuse domain, and a powerful driving force in promoting the interaction between researchers and practitioners.

The theme of ICSR 10 was "High Confidence Software Reuse in Large Systems." A high confidence system is one that behaves in a well-understood and predictable fashion. Today's trends towards widespread use of commercial off-the-shelf (COTS) technology, increased integration, continuous evolution, and larger scale are yielding more complex software systems. So, the problem of how to build high confidence complex systems and how to reuse software with a high level of confidence has become a new attractive topic for research. Furthermore, high-level software asset reuse has been a goal for the last 20–30 years, and it can still be considered an unsolved question. Components-based development, MDA-MDE-MDD, extreme programming, and other techniques or methods are promising approaches to software reuse that still need more research.

These proceedings report on the current state of the art in software reuse. The topics covered in the proceedings include software architecture, software components, high confidence technology, domain engineering, product line approaches, service-oriented engineering, model-based approaches and several other aspects of software reuse.

May 2008

Organization

Organizing Committee

General Chair	Juan Llorens, University Carlos III of Madrid, Spain
Program Chair	Hong Mei, Peking University, China
Workshops Chair	Jianjun Zhao, Shanghai Jiao Tong University, China
Tutorial Chair	Jeff Poulin, Lockheed Martin Systems Integration-Owego, USA
Doctoral Symposium Chair	Gregory Kulczycki, Virginia Tech, USA
Tools Demo Chair	Jose Luis Barros, Universidad de Vigo, Spain
Local Arrangements Chair	Bing Xie, Peking University, China
Publicity Co-chairs	Bill Frakes, Virginia Tech, USA Ge Li, Peking University, China
Finance Chair	Chuck Lillie, ISASE, USA Wei Zhang, Peking University, China
Web Chair	Donggang Cao, Peking University, China

Program Committee

Sidney Bailin	Knowledge Evolution, USA
Jose Luis Barros	Universidad de Vigo, Spain
Ted Biggerstaff	SoftwareGenerators.com, USA
Sholom Cohen	Software Engineering Institute, USA
Reidar Conradi	Norwegian University of Science and Technology, Norway
Hakan Erdogmus	NRC Institute for Information Technology, Canada
John Favaro	Consulenza Informatica, Italy
Robert Feldt	Blekinge Institute of Technology, Sweden
Bill Frakes	Virginia Tech, USA
Cristina Gacek	University of Newcastle upon Tyne, UK
Gonzalo Genova	Universidad Carlos III Madrid, Spain
Birgit Geppert	Avaya Labs, USA
Hassan Gomaa	George Mason University, USA
Yanxiang He	Wuhan University, China
Zhi Jin	Institute of Mathematics Chinese Academy of Sciences, China
Merijn de Jonge	Philips, Netherlands
Kyo Kang, Postech	Korea
Gregory Kulczycki	Virginia Tech, USA

VIII Organization

Patricia Lago	Vrije Universiteit Amsterdam, Netherlands
Filippo Lanubile	Università di Bari, Italy
Xuandong Li	Nanjing University, China
Chuck Lillie	ISASE, USA
Chao Liu	Beihang University, China
Juan Llorens	Universidad Carlos III Madrid, Spain
Mike Mannion	Glasgow Caledonian University, UK
Masao Matsumoto	Kyushu Sangyo University, Japan
Hong Mei	Peking University, China
Ali Mili	New Jersey Institute of Technology, USA
Maurizio Morisio	Polytechnic of Turin, Italy
Markku Oivo	University of Oulu, Finland
Rob van Ommering	Philips Research Laboratory, Netherlands
Witold Pedrycz	University of Alberta, Canada
Jeff Poulin	Lockheed Martin Systems Integration- Owego, USA

Table of Contents

Architecture and Reuse Approaches

Introducing Architecture-Centric Reuse into a Small Development Organization	1
<i>Hans-Jörg Beyer, Dirk Hein, Clemens Schitter, Jens Knodel, Dirk Muthig, and Matthias Naab</i>	
An Architectural Style for Data-Driven Systems	14
<i>Reza Mahjourian</i>	
Architectural Analysis Approaches: A Component-Based System Development Perspective.....	26
<i>Novia Admodisastro and Gerald Kotonya</i>	

High Confidence and Reuse

Component-Based Abstraction and Refinement	39
<i>Juncao Li, Xiuli Sun, Fei Xie, and Xiaoyu Song</i>	
High Confidence Subsystem Modelling for Reuse	52
<i>Birgit Penzenstadler and Dagmar Koss</i>	
A Trustable Brokerage Solution for Component and Service Markets ...	64
<i>Colin Atkinson, Daniel Brenner, Oliver Hummel, and Dietmar Stoll</i>	

Component Selection and Reuse Repository

Recommending Typical Usage Examples for Component Retrieval in Reuse Repositories	76
<i>Yan Li, Liangjie Zhang, Ge Li, Bing Xie, and Jiasu Sun</i>	
A Reuse Repository System: From Specification to Deployment	88
<i>Vanilson Arruda Burégio, Eduardo Santana de Almeida, Daniel Ludrédio, and Silvio Lemos Meira</i>	
COTS Selection Best Practices in Literature and in Industry	100
<i>Rikard Land, Laurens Blankers, Michel Chaudron, and Ivica Crnković</i>	
Mining Open Source Component Behavior for Reuse Evaluation	112
<i>Ji Wu, Chun Wang, Xiao-xia Jia, and Chao Liu</i>	

Product Line

Combining Different Product Line Models to Balance Needs of Product Differentiation and Reuse 116
Juha Savolainen, Juha Kuusela, Mike Mannion, and Tuomo Vehkomäki

Integrating Component and Product Lines Technologies 130
Elder Cirilo, Uirá Kulesza, Roberta Coelho, Carlos J.P. de Lucena, and Arndt von Staa

Feature Implementation Modeling Based Product Derivation in Software Product Line 142
Xin Peng, Liwei Shen, and Wenyun Zhao

Feature-Oriented Analysis and Specification of Dynamic Product Reconfiguration 154
Jaejoon Lee and Dirk Muthig

Managing Large Scale Reuse Across Multiple Software Product Lines... 166
N. Ilker Altintas and Semih Cetin

Quality Assessment in Software Product Lines 178
Leire Etxeberría and Goñuria Sagardui

Managing Variability in Reusable Requirement Models for Software Product Lines 182
Hassan Gomaa and Erika Mir Olimpiew

Domain Models and Analysis

A BDD-Based Approach to Verifying Clone-Enabled Feature Models' Constraints and Customization 186
Wei Zhang, Hua Yan, Haiyan Zhao, and Zhi Jin

Performing Domain Analysis for Model-Driven Software Reuse..... 200
Daniel Lucrédio, Renata P. de M. Fortes, Eduardo S. de Almeida, and Silvio Lemos Meira

Exploiting COTS-Based RE Methods: An Experience Report 212
Nan Niu and Steve Easterbrook

Towards Reusable Automation System Components 217
Thomas Aschauer, Gerd Dauenhauer, and Wolfgang Pree

Service Oriented Environment

An Approach to Domain-Specific Reuse in Service-Oriented Environments 221
Jianwu Wang, Jian Yu, Paolo Falcarin, Yanbo Han, and Maurizio Morisio

View-Based Reverse Engineering Approach for Enhancing Model Interoperability and Reusability in Process-Driven SOAs	233
<i>Huy Tran, Uwe Zdun, and Schahram Dustdar</i>	

A Lightweight Approach to Partially Reuse Existing Component-Based System in Service-Oriented Environment	245
<i>He Yuan Huang, Hua Fang Tan, Jun Zhu, and Wei Zhao</i>	

Components and Services

Towards Variable Service Compositions Using VxBPEL	257
<i>Chang-ai Sun and Marco Aiello</i>	

Abstract Reachability Graph for Verifying Web Service Interfaces	262
<i>Xutao Du, Chunxiao Xing, and Lizhu Zhou</i>	

Reuse: From Components to Services	266
<i>Alberto Sillitti and Giancarlo Succi</i>	

Active Binding Technology: A Reuse-Enabling Component Model	270
<i>Anmo Jeong, Seungnam Jeong, Yoonsun Lim, and Myung Kim</i>	

Collective Reuse of Software Components Speeds-Up Reliability	274
<i>Iaakov Erman, Guy Zohar, and Yehuda Hassin</i>	

Refinement of Component Model Standards and Conventions	278
<i>Hazleen Aris and Siti Salwah Salim</i>	

Reuse Approaches and Pattern

Identifying and Improving Reusability Based on Coupling Patterns	282
<i>Andrea Capiluppi and Cornelia Boldyreff</i>	

Conquering Fine-Grained Blends of Design Patterns	294
<i>L. Sabatucci, A. Garcia, N. Cacho, M. Cossentino, and S. Gaglio</i>	

Pattern-Based Transformation Rules for Developing Interaction Models of Access Control Systems	306
<i>Dae-Kyoo Kim and Lunjin Lu</i>	

Reuse Approaches and Frameworks

Balancing Quantification and Obliviousness in the Design of Aspect-Oriented Frameworks	318
<i>Linda Seiter</i>	

Lightweight, Semi-automated Enactment of Pragmatic-Reuse Plans	330
<i>Reid Holmes and Robert J. Walker</i>	

Constructing Flexible Application Servers with Off-the-Shelf
Middleware Services Integration Framework 343
Yan Li, Minghui Zhou, Donggang Cao, and Lu Zhang

Reuse Approaches and Methods

SAM: Simple API for Object-Oriented Code Metrics 347
Adam Edelman, William Frakes, and Charles Lillie

Leveraging Source Code Search for Reuse 360
Hans-Jörg Happel, Thomas Schuster, and Peter Szulman

An Experimental Evaluation of Documentation Methods and
Reusability 372
Martin Blom, Eivind J. Nordby, and Anna Brunstrom

An Empirical Comparison of Methods for Reengineering Procedural
Software Systems to Object-Oriented Systems 376
William B. Frakes, Gregory Kulczykcki, and Natasha Moodliar

Appendix: Workshop and Tutorial Abstracts 390
Jianjun Zhao and Jeff Poulin
