# Preface

The sixth international conference on AD-HOC NetWOrks and Wireless was held in the city of Morelia, Michoacan State, Mexico. It follows the tradition of a multidisciplinary research program on all aspects of ad hoc networks that aims to create a collaborative forum between mathematicians, computer scientists and engineers. Previous Ad-Hoc Networks and Wireless conferences were held in Ottawa, Canada (2006), Cancun, Mexico (2005), Vancouver, Canada (2004), Montreal, Canada (2003), and Toronto, Canada (2002).

This year there were 50 submissions of which 20 were accepted for presentation and inclusion in the conference proceedings. We would like to express thanks to the members of the the Program Committee (see the organization page) for their work with reviewing and selecting the papers for the conference. Many thanks also to Lali Barriere, Stephane Durocher, Angelo Fanelli, Vinay Kolar, Georgios Lioudakis, Jan Manuch, Nathalie Mitton, Gianpiero Monaco, Luca Moscardelli, Alfredo Navarra, Katerina Potika, Christine Stoll for their help in additional refereeing of the submitted papers.

We would like to thank the invited speakers Andrea Werneck Richa, Breno de Medeiros, and Jorge Urrutia for their excellent tutorials and research presentations. Many thanks to Christine Laurendeau for maintaining the conference Web page, Edgar Chavez for coordinating local activities, and Cuauhtemoc Rivera, Chair of local arrangements of ENC 2007 (the annual conference of the Mexican Computer Science Society).
