# Preface

This volume contains the proceedings of the 11th International Symposium on Database Programming Languages (DBPL 2007), held in Vienna, Austria, on September 23–24, 2007. DBPL 2007 was one of 15 meetings co-located with VLDB (the International Conference on Very Large Data Bases).

DBPL continues to present the very best work at the intersection of database and programming language research. The proceedings include a paper based on the invited talk by Wenfei Fan and the 16 contributed papers that were selected by the program committee from 41 submissions. Every submission was reviewed by at least three members of the program committee. In addition, the program committee sought the opinions of additional referees, selected because of their expertise on particular topics. The final selection of papers was made during the last week of July.

We would like to thank all of the authors who submitted papers to the conference, and the members of the program committee for their excellent work. The program committee did not meet in person, but carried out extensive discussions during the electronic PC meeting. We are grateful to Andrei Voronkov for his EasyChair system that made it so easy to manage these discussions.

Finally, we would also like to thank Christoph Koch and Gavin Bierman for their assistance and sound counsel, and the organizers of VLDB 2007 for taking care of the local organization of DBPL.

September 2007

# Table of Contents

## Invited Talk

XML Publishing: Bridging Theory and Practice . . . . .	1
<i>Wenfei Fan</i>	

## Algorithms

Efficient Algorithms for the Tree Homeomorphism Problem . . . . .	17
<i>Michaela Götz, Christoph Koch, and Wim Martens</i>	

Datalog Programs over Infinite Databases, Revisited . . . . .	32
<i>Sara Cohen, Joseph (Yossi) Gil, and Evelina Zarivach</i>	

## XML Query Languages

A Methodology for Coupling Fragments of XPath with Structural Indexes for XML Documents . . . . .	48
<i>George H.L. Fletcher, Dirk Van Gucht, Yuqing Wu, Marc Gyssens, Sofía Brenes, and Jan Paredaens</i>	

Conjunctive Query Containment over Trees . . . . .	66
<i>Henrik Björklund, Wim Martens, and Thomas Schwentick</i>	

A Better Semantics for XQuery with Side-Effects . . . . .	81
<i>Giorgio Ghelli, Nicola Onose, Kristoffer Rose, and Jérôme Siméon</i>	

## Inconsistency Handling

Repairing Inconsistent XML Write-Access Control Policies . . . . .	97
<i>Loreto Bravo, James Cheney, and Iirini Fundulaki</i>	

On the Consistent Rewriting of Conjunctive Queries Under Primary Key Constraints . . . . .	112
<i>Jef Wijsen</i>	

## Data Provenance

Relational Completeness of Query Languages for Annotated Databases . . . . .	127
<i>Floris Geerts and Jan Van den Bussche</i>	

Provenance as Dependency Analysis . . . . .	138
<i>James Cheney, Amal Ahmed, and Umut A. Acar</i>	

## Emerging Data Models

A Theory of Stream Queries . . . . .	153
<i>Yuri Gurevich, Dirk Leinders, and Jan Van den Bussche</i>	
Querying Structural and Behavioral Properties of Business Processes . . . . .	169
<i>Daniel Deutch and Tova Milo</i>	
Efficient Evaluation of <b>HAVING</b> Queries on a Probabilistic Database . . . . .	186
<i>Christopher Ré and Dan Suciu</i>	

## Type Checking

Succinctness of Pattern-Based Schema Languages for XML . . . . .	201
<i>Wouter Gelade and Frank Neven</i>	
Analysis of Imperative XML Programs . . . . .	216
<i>Michael G. Burke, Igor Peshansky, Mukund Raghavachari, and Christoph Reichenbach</i>	
Efficient Inclusion for a Class of XML Types with Interleaving and Counting . . . . .	231
<i>Giorgio Ghelli, Dario Colazzo, and Carlo Sartiani</i>	
Towards Practical Typechecking for Macro Tree Transducers . . . . .	246
<i>Alain Frisch and Haruo Hosoya</i>	
<b>Author Index</b> . . . . .	261
