Acknowledgements

I wish to gratefully thank Professor Heinz Ulbrich for his excellent supervision during my time at the Institute of Applied Mechanics. His continuous support of my ideas made it a pleasant and fruitful period. Many thanks are due to Professor Masayoshi Tomizuka for supporting my research at UC Berkeley. Professor Friedrich Pfeiffer has made an important contribution with his helpful discussions.

I would like to pass on my sincere gratitude to Professor Bernd Heißing and Professor Frank Schiller for serving on my committee as thesis reader and chairman respectively.

A special mention is due to Dr. Stefan Glasauer for engaging in many valuable debates on the neuroscientific aspects of my work, and to my former office mate Philipp Wagner for his efficient cooperation. The work with all partners made FORBIAS a successful project. I would particularly like to acknowledge my industrial partners *BMW*, *Audi* and *Eurocopter* for their excellent and professional cooperation.

I am grateful to my lab-mate Lucas Ginzinger for his in-depth scientific proof-reading.

It is a pleasure to thank Dr. Katherine Richert, Luke Harley, Zoey Rothenberg, Fatma Hassan and Anneke Pot for their useful comments on the manuscript.

Many students decided to undertake research for their Bachelor's or Master's theses under my supervision and contributed to this work. All did a great job. Special mentions go to Chen Zhao and Christian Alt, who have been working with me for more than two years. I would like to thank Georg Mayr, Wilhelm Miller, Walter Wöß, Simon Gerer and Philip Schneider for their high-precision manufacturing of electronic and mechanical components.

This research has been funded by Bayerische Forschungsstiftung and a Heinz Dürr Scholarship. I am fortunate to have received support from the German National Academic Foundation (*Studienstiftung*) throughout my graduate studies. Marius Spiecker gen. Döhmman has also provided valuable advice.

Finally, I would like to thank my family who offered gentle counsel and unconditional support at each fork in the road. This book is the result of their fostering my curiosity and interest in science and technology from early on.
