The LNCS Journal on Data Semantics

Computerized information handling has changed its focus from centralized data management systems to decentralized data exchange facilities. Modern distribution channels, such as high-speed Internet networks and wireless communication infrastructure, provide reliable technical support for data distribution and data access, materializing the new, popular idea that data may be available to anybody, anywhere, anytime. However, providing huge amounts of data on request often turns into a counterproductive service, making the data useless because of poor relevance or inappropriate level of detail. Semantic knowledge is the essential missing piece that allows the delivery of information that matches user requirements. Semantic agreement, in particular, is essential to meaningful data exchange.

Semantic issues have long been open issues in data and knowledge management. However, the boom in semantically poor technologies, such as the Web and XML, has boosted renewed interest in semantics. Conferences on the Semantic Web, for instance, attract big crowds of participants, while ontologies on their own have become a hot and popular topic in the database and artificial intelligence communities.

Springer's *LNCS Journal on Data Semantics* aims at providing a highly visible dissemination channel for most remarkable work that in one way or another addresses research and development on issues related to the semantics of data. The target domain ranges from theories supporting the formal definition of semantic content to innovative domain-specific application of semantic knowledge. This publication channel should be of the highest interest to researchers and advanced practitioners working on the Semantic Web, interoperability, mobile information services, data warehousing, knowledge representation and reasoning, conceptual database modeling, ontologies, and artificial intelligence.

Topics of relevance to this journal include:

- Semantic interoperability, semantic mediators
- Ontologies
- Ontology, schema and data integration, reconciliation and alignment
- Multiple representations, alternative representations
- Knowledge representation and reasoning
- Conceptualization and representation
- Multi-model and multi-paradigm approaches
- Mappings, transformations, reverse engineering
- Metadata
- Conceptual data modeling
- Integrity description and handling
- Evolution and change

- Web semantics and semi-structured data
- Semantic caching
- Data warehousing and semantic data mining
- Spatial, temporal, multimedia and multimodal semantics
- Semantics in data visualization
- Semantic services for mobile users
- Supporting tools
- Applications of semantic-driven approaches

These topics are to be understood as specifically related to semantic issues. Contributions submitted to the journal and dealing with semantics of data will be considered even if they are not from the topics in the list.

While the physical appearance of the journal issues is like the books from the well-known Springer LNCS series, the mode of operation is that of a journal. Contributions can be freely submitted by authors and are reviewed by the Editorial Board. Contributions may also be invited, and nevertheless carefully reviewed, as in the case for issues that contain extended versions of best papers from major conferences addressing data semantics issues. Special issues, focusing on a specific topic, are coordinated by guest editors once the proposal for a special issue is accepted by the Editorial Board. Finally, it is also possible that a journal issue be devoted to a single text.

The Editorial Board comprises an Editor-in-Chief (with overall responsibility), a Co-editor-in-Chief, and several members. The Editor-in-Chief has a four-year mandate. Members of the board have a three-year mandate. Mandates are renewable and new members may be elected anytime.

We are happy to welcome you to our readership and authorship, and hope we will share this privileged contact for a long time.

Stefano Spaccapietra
Editor-in-Chief

Previous Issues

- JoDS I Special Issue on Extended Papers from 2002 Conferences,
LNCS 2800, December 2003
Co-editors: Sal March and Karl Aberer
- JoDS II Special Issue on Extended Papers from 2003 Conferences,
LNCS 3360, December 2004
Co-editors: Roger (Buzz) King, Maria Orlowska, Elisa
Bertino, Dennis McLeod, Sushil Jajodia, and Leon Strous.
- JoDS III Special Issue on Semantic-Based Geographical Information Systems,
LNCS 3534, 2005
Guest editor: Esteban Zimányi
- JoDS IV Normal Issue, LNCS 3730, December 2005
- JoDS V Special Issue on Extended Papers from 2004 Conferences,
LNCS 3870, 2006
Co-editors: Paolo Atzeni, Wesley W. Chu, Tiziana Catarci, and
Katia P. Sycara
- JoDS VI Special Issue on Emergent Semantics, LNCS 4090, 2006
Guest editors: Karl Aberer and Philippe Cudre-Mauroux
- JoDS VII Normal Issue, LNCS 4244, Autumn 2006
- JoDS VIII Special Issue on Extended Papers from 2005 Conferences,
LNCS 4830, Winter 2006
Co-editors: Pavel Shvaiko, Mohand-Saïd Hacid, John Mylopoulos,
Barbara Pernici, Juan Trujillo, Paolo Atzeni, Michael Kifer,
François Fages, and Ilya Zaihrayeu
- JoDS IX Special Issue on Extended Papers from 2005 Conferences
(continued), LNCS 4601, September 2007
Co-editors: Pavel Shvaiko, Mohand-Saïd Hacid, John Mylopoulos,
Barbara Pernici, Juan Trujillo, Paolo Atzeni, Michael Kifer,
François Fages, and Ilya Zaihrayeu

JoDS Volume X

This JoDS volume results from a rigorous selection among 26 full-paper submissions received in response to a call for contributions issued in July 2006.

After two rounds of reviews, eight papers spanning a wide variety of topics were eventually accepted for publication. They are listed in the table of contents.

We would like to thank the authors of all submitted papers as well as all reviewers who contributed to improving the papers through their detailed comments.

The forthcoming volume XI will contain extended versions of the best papers from 2006 conferences covering semantics aspects. Its publication is expected in early 2008.

We hope you'll enjoy reading this volume.

Stefano Spaccapietra

Organization

Reviewers

We are very grateful to the external reviewers listed below who helped the editorial board in the reviewing task:

Michel Adiba, Grenoble University, France
Bernhard Bauer, University of Augsburg, Germany
Davide Bresolin, University of Udine, Italy
Silvana Castano, University of Milan, Italy
Marco Comerio, University of Milano-Bicocca, Italy
Ying Ding, University of Innsbruck, Austria
Gillian Dobbie, University of Auckland, New Zealand
Guillermo Hess, University of Milan, Italy
Giancarlo Guizzardi, CNR Trento, Italy
Ian Horrocks, University of Manchester, UK
Hanjo Jeong, George Mason University, USA
Aditya Kalyanpur, IBM T.J. Watson Research Center, Hawthorne, USA
Roland Kaschek, Massey University, New Zealand
Stephen Kimani, J. Kenyatta University of Agriculture and Technology, Kenya
Andrei Lopatenko, Free University of Bozen-Bolzano, Italy
Luke McDowell, U.S. Naval Academy, USA
Salvador Mandujano, Intel Corporation, USA
Diego Milano, University of Rome “La Sapienza,” Italy
Michele Missikoff, IASI-CNR, Rome, Italy
Angelo Montanari, University of Udine, Italy
Saravanan Muthaiyah, George Mason University, USA
Matteo Palmonari, University of Milano-Bicocca, Italy
Jeff Pan, The University of Aberdeen, UK
Antonella Poggi, University of Rome “La Sapienza,” Italy
Alex Poulouvassilis, University of London, UK
Elaheh Pourabbas, IASI-CNR, Rome, Italy
Pierre-Yves Schobbens, University of Namur, Belgium
Richard Snodgrass, University of Arizona Tucson, USA
Yong Uk Song, Yonsei University, South Korea
Alexei Tretiakov, Massey University, New Zealand
Denny Vrandecic, University of Karlsruhe, Germany

JoDS Editorial Board

Coeditors-in-Chief Lois Delcambre, Portland State University, USA
 Stefano Spaccapietra, EPFL, Switzerland

Members of the Board

Carlo Batini, Università di Milano Bicocca, Italy
Alex Borgida, Rutgers University, USA
Shawn Bowers, University of California Davis, USA
Tiziana Catarci, Università di Roma La Sapienza, Italy
David W. Embley, Brigham Young University, USA
Jerome Euzenat, INRIA Alpes, France

Yair Wand, University of British Columbia, Canada
Eric Yu, University of Toronto, Canada
Esteban Zimányi, Université Libre de Bruxelles (ULB), Belgium

Table of Contents

Asymmetric and Context-Dependent Semantic Similarity Among Ontology Instances	1
<i>Riccardo Albertoni and Monica De Martino</i>	
Query Relaxation in RDF	31
<i>Carlos A. Hurtado, Alexandra Poulouvassilis, and Peter T. Wood</i>	
A Fine-Grained Approach to Resolving Unsatisfiable Ontologies	62
<i>Joey Sik Chun Lam, Derek Sleeman, Jeff Z. Pan, and Wamberto Vasconcelos</i>	
Deploying Semantic Web Services-Based Applications in the e-Government Domain	96
<i>Alessio Gugliotta, John Domingue, Liliana Cabral, Vlad Tanasescu, Stefania Galizia, Rob Davies, Leticia Gutierrez Villarias, Mary Rowlatt, Marc Richardson, and Sandra Stincic</i>	
Linking Data to Ontologies	133
<i>Antonella Poggi, Domenico Lembo, Diego Calvanese, Giuseppe De Giacomo, Maurizio Lenzerini, and Riccardo Rosati</i>	
Context Representation in Domain Ontologies and Its Use for Semantic Integration of Data	174
<i>Guy Pierra</i>	
Semantically Processing Parallel Colour Descriptions	212
<i>Shenghui Wang and Jeff Z. Pan</i>	
A Cooperative Approach for Composite Ontology Mapping	237
<i>Cássia Trojahn, Márcia Moraes, Paulo Quaresma, and Renata Vieira</i>	
Author Index	265
